Non-refundable

Session 1

June 17 - July 18

No class on July 4th

Session 2

July 22 - Aug 22

Policy:

All children must be completely potty-trained

REGISTER TODAY!

Our Summer Programs operate on the notion that children have limitless potential and are highly capable of thinking and figuring out how things work. So, we've created a program to help ignite their imagination and curiosity that's fun, interactive, and hands-on necessary to ensure a successful transition to kindergarten.

Our daily summer programs are a combination of early childhood development activities through movement and play that help acquire fine and gross motor skills and ways to activate and stimulate the body's important senses. We also help develop skills in social-emotional and self-regulation, literacy, science, engineering, art, music and math through hands-on projects, experiments, songs and more.

Your child will have fun this summer learning and playing both inside and outside of the classroom. We believe that small children learn best in an environment where they feel safe, loved, and secure and we provide this for them.

Learn, Play, Grow!

KINDER - 3RD

Our qualified staff will help your child get ready for the next school year by reviewing and expanding skills in math, science, literacy and social development in a fun and nurturing way. Our indoor and outdoor program is also designed to inspire and support creative minds through art, music and story development.

PRE-ALGEBRA MATH COURSE - 8 WEEK COURSE

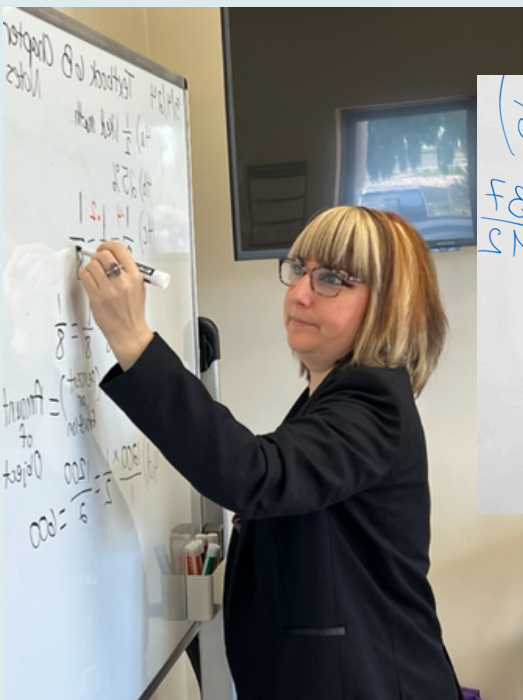

Welcome! This session is for the enrollment of a Pre-algebra math course.

We know that each student learns differently. Therefore, instruction is based on a student's academic level, and progress is based on their level of knowledge and understanding. Our instructor works closely to ensure students gain academic self-reliance by developing a total comprehension of math. Our goal is to close the learning gap and see them fully understand each problem at hand.

1. This program is designed to help the following types of students:
2. A student who previously didn't pass pre-algebra
3. A student who would like a refresher course before taking Algebra 1
4. Someone who is a beginner to learning algebra

This program is designed to help the following type of student:

1. Gain confidence in math
2. Gain the knowledge, attitude, and skills needed in problem-solving
3. Gain the skills needed to articulate where they are stuck in math so that the instructor can model the process until there is a clear understanding. We believe it is vital that the student not move forward until mastery is shown.

Teacher qualifications: Please refer to the math section of our website:

<https://freedomofchoiceshomeschool.com/math-tutoring>

In this course, students are required to attend each scheduled class time meeting. In the event the student has a scheduling conflict, and cannot attend the class, we ask that you contact the instructor before the meeting.

Why choose us?

We are in-person and provide individualized, group, and one-on-one attention.

We're NOT tutoring, we're teaching. Our instructor is highly qualified with a master's degree in mathematics and possesses a valid California teaching credential.

We will not only save you money, we will give you great results. You'll save hundreds of dollars compared to the hour-to-hour cost of Mathnasium or other private tutors!

Course Description:

Our summer course will offer a full Pre-Algebra experience with an introduction to geometry and probability.

Some topics covered included, but not limited to, prime and composite numbers; fractions & decimals; order of operations, coordinates, exponents, square roots, ratios, the Pythagorean Theorem, surface area, scientific notation, percents, writing expressions, distributive property, solving and graphing equations, simple interest and compound interest, probability, volume, and more.

Certificate of Completion:

Students who pass this course with a C or better will receive a certificate of completion. Please note: FCSCCH is not a WASC-accredited program and the certification will not count toward high school credit.
