

HOW TO CONTINUE ANNUAL FLUID ANALYSIS

You elected to do fluid sampling and analysis as part of your recent RV inspection. **Great decision!** The NRVIA¹ fluid sampling database shows that fluid sampling is the best way to assure continued reliability of your RV driveline and power generation components. We strongly recommend that you continue to sample and analyze these fluids on an annual basis and there are (2) options available to you.

OPTION 1: Take Advantage of NRVIA's Fluid Sampling Program

Call us back about the same time every year to have your RV component fluids tested. We'll add you to our schedule. It's easy and we'll do all the work. If you're not close to us, you can simply go to www.nrvia.org/locate and find your closest NRVIA certified inspector.

OPTION 2: Do it Yourself (DIY) Method

Call JG Lubricant Services at 877-971-7799. JG Lubricant Services is an NRVIA affiliate and the national supplier of fluid sampling and analysis test kits and supplies. They'll be happy to help and tell you exactly what you'll need in order to draw fluid samples and send them for analysis. Here are some helpful tips!

- Visit the RV webpage at www.jglubricantservices.com/rv.html.
- Read "All About Oils for RV and Tow Vehicle Owners" at . You'll find it's a great way to learn more about oils and oil life factors. See link below:
 - https://www.jglubricantservices.com/docs/rv_technical_sheet.pdf.
- Review their Recommended Sampling Frequency Chart and watch the "How To" sampling videos.
- Listen to their podcast at http://www.beyondthewheelpodcast.com/?powerpress_pinw=206-podcast.
- Once you're ready to order your test kits and vacuum pumps, just visit the Online Store at www.jglubricantservices.com/online_store.html. They'll be shipped "to your door" via UPS.
 - Once you place your order, JG Lubricant Services sets you up with your own private account where they'll store your historical data. Then, future reports will be placed under your private account. HORIZON (Electronic Database) accounts are free with your first order. The samples we took during your inspection can be transferred to your account at no extra cost. Call JG Lubricant Services at 877-971-7799 (Ext 2, Technical) and give them the inspection sample report numbers. They'll transfer the inspection sampling reports.

Questions? Call JG Lubricant Services at 877-971-7799. Ask how to get started with their "DIY" program. They have hundreds of RV owners as direct clients and will be happy to assist you in getting started with sampling your RV or Tow Vehicle systems to keep them as **worry free as possible**.
