

Army MICC Facility Sustainment IDIQ

Awardee contact roster, teaming and subcontracting target list

Why this list matters

Task orders under this vehicle will be competed among these 41 firms only. For the next five years that roster is the entire addressable market for this work at the prime level. For a supplier or specialty trade outside the vehicle, the route in is as a subcontractor or teaming partner to one of the companies listed here, and the useful window is now, before the first task orders are solicited.

Quick reference
