

Introduction

Specializing In Crown and Bridge, Screw-Retained Custom Implants, and Custom Shades

Russo Dental Laboratory was originally founded in the small town of Greenwich, Connecticut. What was once a single story small workable space has now become an 1,800 square foot state of the art facility. We hold true to a small laboratory feel but have made strides and have developed into a large laboratory competitor. Featuring 2 state of the art 3D CAD CAM Zirconia Milling Unit's, a 4.0 Axis MasterMill (K4) and a 5.0 Axis MasterMill (S1). We are constantly staying ahead of the curve by continuing our education regularly to keep up with the demand of the, new ever changing, technologies of dentistry.

Here at Russo Dental Laboratory, we have a state-of-the-art facility featuring both, a 4.0 Axis MasterMill (K4) and a 5.0 Axis MasterMill (S1) 3D CAD/CAM, which allows us to create better fitting restorations than traditional methods.

Whether supplying physical PVS impressions or taking digital intra-oral scans, Russo Dental Laboratory has the capability to handle all modern methods of dentistry. Send .STL files directly through our Dentsply Sirona Connect Portal, My iTero, or MeditLink, with ease.

Every doctor has their own individualized preferences which is noted at each station, we offer a distinct one-of-a-kind fitting crown for every personal preference (Contacts, Occlusion, Occlusal Stain, Gingival Warmth, Contours, Emergence Profiles, Pontic Relations, Abutment Preferences).

Communication is the key to every Dental Practice/Dental Laboratory relationship. Schedule a consultation with Russo Dental Laboratory to ensure our ability to achieve your patient's overall goal. Custom shades are offered either in-office or in-lab, patient's choice. As we offer over 100+ shades to find a true custom match for each individual's characteristics. (Vitapan Classical, Vitapan 3-D Master, Vitapan 3-D Bleach, Chromoscope, Ivoclar Porcelain).

Offering the highest quality grade products made available. All materials are measured out precisely per the manufacturer's instruction for all dental cases, to ensure consistent quality, (liquid/powder ratios). We offer the quickest possible turnaround times, however we do request a 10 day in-lab production time. Quality control ensures that every case is carefully checked before being packaged and delivered.

Our Milling Center offers an array of material selection in Zirconia (Zirconium Dioxide). Select a manufacturer, select a strength rating (megapascal rating), anterior or posterior, select a value shade (white with pre-sinter stain, pre-shaded, multi-layered). Sintering included.

Our laboratory offers more than an exceptional product, we provide service. Offering a range of knowledge, professionalism, and articulate craftsmanship.
