INTRODUCTION

Russo Dental Laboratory was originally founded in the small town of Greenwich, Connecticut. What was once a single story small workable space is now in the works of becoming a 2,000 square foot state of the art facility on July 1st 2020. Russo Dental Laboratory will be moving to our new location on July 1st 2020. We hold true to a small laboratory feel but have made strides and have developed into a large laboratory competitor. Featuring 2 state of the art 3D CAD CAM Zirconia Milling Unit's, a 4.0 Axis MasterMill (K4) and a 5.0 Axis MasterMill (S1). We are constantly staying ahead of the curve by continuing our education regularly to keep up with the demand of the new ever changing technologies of dentistry.
