

THANK YOU FOR YOUR PURCHASE!

FMB-1

(THE FMB-1 IS FOR RECEIVE ONLY, DO NOT ATTEMPT TO TRANSMIT THROUGH THIS DEVICE)

The FMB-1 is a notch pass filter designed to reduce the RF signal levels in the FM broadcast band to your SDR receiver. The FMB-1 is highly effective in reducing or eliminating interference caused from nearby FM broadcast transmitters. The FMB-1 comes with a bypass switch which allows you to bypass the filter at any time. The SMA connectors are conveniently located on the rear of the unit, this allows you to save space and avoid clutter on your desktop.

- Impedance: 50 Ohms
- Attenuation Range: 88 – 108 MHz
- Bypass: Switchable
- Insertion Loss: 3 dB, 0dB in Bypass
- Case: Diecast Aluminum Alloy
- Connectors: SMA

Place switch to the left to bypass the filter. Place switch to the right to place the filter in line.
