

THANK YOU FOR YOUR PURCHASE!

HPF-1

(THE HPF-1 IS FOR RECEIVE ONLY, DO NOT ATTEMPT TO TRANSMIT THROUGH THIS DEVICE)

The HPF-1 is a high pass filter designed to reduce the RF signal levels below 3.5 MHz. The HPF-1 is effective in reducing or eliminating interference caused from nearby AM broadcast transmitters. The HPF-1 will strongly attenuate signals below the 80 meter amateur band. The filter is bipolar, this means it can be installed with input at either port.

Impedance: 50 Ohms

Attenuation Range: DC – 3.5 MHz

Insertion Loss: 1.5dB

Case: Diecast Aluminum Alloy

Connectors: SMA or BNC
