Introduction

Welcome to Beach-Topia! We hope you have tons of fun, sun, and relaxation! *Beach-Topia* has all the comforts of home. We take pride in offering the amenities, furnishings, and equipment you would expect for a vacation home. If there's anything missing, broken, or you want to suggest something, please use the "Contact Us" feature on our website at <https://beachtopia.us> for consideration.

If you're looking for a particular topic, you may want to download this *Welcome Guide*, including the Tabs, from our website (under the "Downloads for Guests" section) and conduct a search (e.g., use "Control-F" to find based on a keyword).

Our Story: We live in Washington, DC, and wanted to expand our investments to the OBX (the Outer Banks).

So instead of staying in DC for the 2021 Presidential Inauguration, we packed our bags and headed to the OBX. Since it was off-season, we rented a beach house (from Twiddy, to check them out), contacted a realtor, and looked at twenty properties. We narrowed our selection to *Beach-Topia* in The Villages at Ocean Hill in Corolla, NC.

We immediately made an offer and after some back-and-forth, the seller accepted. After all of the inspections and due diligence, there are no termites, no issue with the survey, but the property needed work. As in any real estate purchase, the inspections resulted in immediate, short-term, and long-term needs. It was a scramble to solicit quotes, schedule repairs, contend with COVID-19, and devise a plan, all before the 2021 peak season for beach house rentals.

From the time we returned home, after ratifying the contract, we immediately started preparations. We already knew what items the house desperately needed, nice to haves, and before you knew it, a 16' rental truck was needed.

To view a comprehensive list, download *Beach-Topia Enhancements* posted under the "Downloads for Guests" section on our website at <http://beachtopia.us>.

Time was running out from purchasing *Beach-Topia*, prepping it for the upcoming season, obtaining estimates, and realistically doing repairs and enhancements while not disrupting any guest bookings. We closed on March 1st and arranged to stay at the house for the entire month in order to conduct repairs/enhancements, deep clean, and prepare for the 2021 rental season. Thanks to family and friends who helped us out! Some of our efforts will help save water, energy, and natural resources, while reducing the carbon footprint (see the "Eco-Friendly" section showing the  icon).

After your vacation, Twiddy will send you a survey about your stay and the overall condition of the house. **We will also send you a survey of our own!** We will seriously review all feedback and consider any suggestions. Due to high volume of the season, Twiddy may take a few weeks to inform us of your survey results and/or post on the Twiddy listing.

Beach-Topia's Website (<https://beachtopia.us>): Our intent is to provide a thorough one-stop-shop of information (maybe too much). The website provides the following (same list from "TAB W: Website"):

- A QR Code that you can use your camera to go directly to our listing on Twiddy’s website (or click on the **Book Now** button).
- A scrolling banner on the number of weeks *Beach-Topia* is available or other newsworthy announcements, followed by “Welcome to Beach-Topia”.
- Season Updates: To inform guests of any changes impacting the forthcoming season.
- What’s New or Coming Soon: A section to inform guests on what’s new or coming soon.
- Mid-Currituck Bridge Update: A section on any updates to the proposed Mid-Currituck Bridge.

- Facebook: A QR Code that you can use your camera to go directly to our Facebook page. Use our Facebook page to check-in, post reviews, add comments, questions, or photos.
- Photo Gallery: A gallery of house photos. It is faster of us to update the photos on our website than the Twiddy listing.
- About *Beach-Topia*: Columns of information on Rooms, Amenities, Availability & Rates, Kitchen, What’s NOT Included, and What Else Is There.
- Awesome Photos (taken within steps of *Beach-Topia*): Other photos submitted by guests, showing sunrises, sunsets, local habitat, beaches, and more.
- Local Information: Click on to find out more about Community Amenities, Local Attractions, The OBX, and Currituck Visitor Guides.
- Shopping, Restaurants, Activities, and More: Click on to find out more about Shopping, Restaurants, Activities, Boating, Churches, and Medical Services.

- About KAPmins Holdings: A short introduction by Jeff & Rob, owners of KAPmins Holdings LLC.
- Downloads for Guests: Guests can download the following: a Beach-Topia Brochure, Floorplans, List of Enhancements, a full copy of the Welcome Binder, Kitchen Inventory & Layout, Vacation Planner, Suggested Packing List, a copy of The Villages at Ocean Hill Community Information and Map brochure, a Currituck Corolla Map, a Bucket List, and Calendars.
- Past Guest Reviews: Snippets from past guest reviews. Additional reviews can be found on our Twiddy listing at <https://www.twiddy.com/outer-banks/corolla/villagesocean-hill/rentals/beachtopia/>.
- Contact Us: A section for guests to contact us for any questions, comments, and submit photos.

Please check the website for any updates, including the most current *Welcome Binder* (which includes the *Welcome Guide* and all of the Tabs). An “Updated” date stamp appears in the bottom right-hand corner of the website.

Please contact Twiddy for any questions, issues, or broken items during your stay. Twiddy provides office coverage daily and has after-hours coverage during the peak season.

- A copy is posted on the left-side of the top-freezer refrigerator in the Kitchen on the top floor and on the left-side of the refrigerator in the Game Room on the ground floor.

Baby & Children Gear:

- Due to liability concerns from our property management company, Twiddy, we do not supply gear for babies and children (e.g., high chairs, booster seats, stair gates, or play pens).
 - You can rent such equipment from “Just For The Beach Rentals” at 1-866-OBX-RENT or <https://justforthebeach.com>; they are located at 520 B Old Stoney Rd, Corolla, near the Visitor’s Center, and offers online reservations.
- If you will be brining and using a baby gate for any of the stairwell entrances:
 - The measurements are as follows, but may vary due to gate placement:
 - Ground floor (from stairs between ground and middle floors): 41-42”
 - Top floor (from stairs between middle and top floors): 42-43”
 - Please also consider the gate height when selecting your gate. There is a custom wood handrail on one side of the lower stairwells (ground to middle floors) that sits

approximately 33" off the ground floor and approximately 27.5" off the steps. The railing is approximately 4" tall and thick, constructed of 2"x4" lumber, which could help or hinder gate installation depending on gate design.

Beach Access, Conditions, & Locations:

- Specific to *Beach-Topia*:
 - The house is next to the VOH (The Villages at Ocean Hill) community's "Tasman" beach parking lot and beach access path. The parking lot is *strictly* for VOH members only, requires a parking permit, no overnight parking, and patrolled by the Sheriff.
 - Next to the North/Left Carport is a private path on the property that connects to the "Tasman" parking lot and beach access path. The path crosses over the Ocean Hill Property Owners Association, the neighboring community. Ocean Hill is responsible for maintaining the beach path from the street through the dunes. An agreement exists between VOH and Ocean Hill to allow owners and guests to use this path for accessing the beach.
 - Driving on the Ocean Hill property, picking up and dropping off at the beach access, and parking on their streets is prohibited; Ocean Hill routinely enforces these rules.

 - Free Public Parking
 - Elevated Ramp to the Beach
 - Restroom/Shower Facilities

Neither Agent nor Owner are providing any other warranty of any kind, except as otherwise expressly provided herein, whether written or oral, statutory or contractual, express or implied, including, without

limitation, THE WARRANTY OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE OR USE, which are hereby expressly excluded. You agree that Your pet(s) must be leashed or placed in safe keeping should Agent or its service staff access the Premises to inspect and make repairs. Your breach of this provision shall be considered material, and shall result in the termination of Your tenancy. You agree to be immediately responsible for any damages including additional cleaning expenses caused by Your pet(s).
21. Disputes: This Agreement shall be governed by and interpreted in accordance with the laws of the State of North Carolina, and shall be treated as though it were executed in the County of Dare, State of North Carolina. TAB K: Kitchen Inventory

Check the *Beach-Topia* website at <https://beachtopia.us> for any updates.

The following is a kitchen inventory (as of the date stamp appearing in the footer) to provide guests an idea of what may be provided. The inventory shows the quantity and item by topic and is subject to change. See “TAB Z: User Manuals” referenced in the *Welcome Binder* for a list of available manuals for appliances. See “TAB U: Kitchen Layout” where contents are located in cabinets and drawers (a copy is posted on the left-side of the top-freezer refrigerator in the kitchen). Please inform Twiddy of any broken or missing items or use the “Contact Us” feature on our website at <https://beachtopia.us> to let us know. Let us know if there are any other items you suggest and we’ll consider.

Major appliances consist of the following: (1) Dishwasher (2) Electric Range with multiple dual burners (e.g., small and large), (3) Electric Oven (bake, broil [Hi/Lo], and storage underneath), (4) Microwave (with exterior exhaust vent, 1.7 cu. Ft., 1000 watts, with a surface fan and light; a second microwave is located in the Game Room), (5) GE Side-by-Side Refrigerator/Freezer (with 2 ice makers, filtered water dispenser, and door alarm), and (6) a GE Top-Freezer Refrigerator (with an ice maker); a second top-freezer refrigerator (with ice maker) is located in the Game Room on the ground floor. Reference to “+” indicates multiple quantities.

Storage: Food can be stored in the pantry cabinet, on the baker’s rack, and on the buffet cabinet.

Some notes to be aware of: (1) upon arrival and stocking the refrigerators, it may take a few hours to reach full cooling temperature (avoid blocking any vents or overpacking; a third refrigerator is located in the Game Room), (2) ice maker trays are emptied after each rental for sanitary reasons and may take a few hours to replenish, (3) the garbage disposal switch is on the right-hand side of the sink, and (4) the linens provided from Twiddy includes dish hand towels, but you may want to bring extra and launder throughout the week. All cabinets and drawers (including baker’s rack and buffet cabinet) have shelf liners.

TAB M: Thermostat (Ecobee) Instructions

Check the *Beach-Topia* website at <https://beachtopia.us> for any updates.

After reading these instructions, contact Twiddy if you suspect the system is not operating properly, or if you have questions. You may contact Twiddy at (252) 457-1504 or text to (252) 888-2598; refer to Property ID# P141, *Beach-Topia*, at 1271 Windance Lane in Corolla.

Seasonal Heating & Cooling (“HVAC”) is enabled based on historic seasonal temperature.

- Spring & Fall (March – April and Late-September – October): Both heating and cooling may be enabled. Because OBX weather varies considerably, systems may automatically switch between heating and cooling, as needed.
- Summer (May – September): Only cooling is enabled. If you require heating during an unusually cold season, please contact Twiddy to submit your request.
- Winter (October – March): Only heating is enabled.

Please use the ceiling fans to help balance the temperature. This makes everyone feel more comfortable, saves energy and the environment!

This house is equipped with two separate HVAC systems that operate independently; each system is controlled by an Ecobee thermostat:

- *Upstairs*: The upstairs thermostat controls the temperature on the top floor ONLY. The thermostat is located on the top floor, in the Living Room, on the wall outside of the Half Bathroom.
- *Downstairs*: The downstairs thermostat controls the temperature on the middle AND ground floors. The thermostat is located on the middle floor, in the Hallway, on the wall across from the Hall Bathroom.

Temperature is listed in Fahrenheit (°F). The thermostat display looks like this:

The minimum and maximum temperature settings protect the house and HVAC from damage.

- Cooling range: 68° – 80°
- Heating range: 60° – 72°

	<p>DO NOT RUN THE HEATING/COOLING WITH THE DOORS OR WINDOWS OPEN. This damages the system, which may leave you without ventilation or comfort for an extended period. If you wish to leave windows and doors open, please adjust the temperature so that the HVAC will not turn on.</p> <p>Auto Shutoff: Leaving the great room sliding doors, Game Room doors/windows, and Entry Doors open for longer than 5 minutes, or tampering with any door/window sensor, will cause the system to automatically shut off. The system will resume once doors are closed and sensors restored.</p> <p>Sensors: There are temperature monitors in the Corolla Bedroom and Game Room; and on all exterior doors. STATUS:

- *Actual:* The current temperature is displayed in **large white numbers** in the **center** of the display.
- *Desired:* The set temperature is displayed at the bottom in a “bubble” in either blue (air conditioning) or orange (heating).

It is normal for the actual temperature to vary a couple degrees from the set temperature. The digital temperature gauge is sensitive, and minor fluctuations are unavoidable. When the system is actively cooling/heating a large outline will encompass the display (see example of outline in image below).

- *Blue Outline:* Indicates the system is cooling.
- *Orange Outline:* Indicates the system is heating.
- *No Outline:* Indicates the system is in standby. The system may be in standby because:
 - It is within a range of the desired temperature.
 - The Great Room sliding doors, Game Room doors/windows, or Entry Doors were left open for longer than 5 minutes, or the system detected tampering with sensor. The system will resume once doors/windows are closed and sensors restored.
 - The system has overloaded, potentially freezing the compressor. This may happen when running the cooling system on colder days or when lowering the temperature more than a few degrees at a time. The system goes into standby to defrost; this may take up to 1 hour to defrost depending on outdoor temperatures.
 - The system has malfunctioned. Please contact Twiddy.

Weather Forecast: Touch the icon (e.g., cloud/sun) to view the weather forecast, if available.

CHANGING TEMPERATURE: You may change the temperature setting by following the instructions below. Setting the temperature very high or very low will NOT change how FAST the house adjusts temperature; and might damage or freeze the system, causing the system to shut down or fail entirely, leaving you without cooling. We advise changing the temperature only by a few degrees at a time until the house reaches a desired temperature.

1. **Check the current settings:** If someone changed the settings, the thermostat displays a **box** that looks similar to this:

To *Cancel* this setting, tap the “⊗” icon.

2. **Select desired temperature:** Tap once on the large white numbers. The below should display:

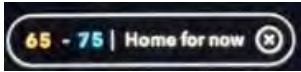

- **Summer:** You will see only a **blue** bubble, indicating only cooling is enabled.
 - Set the desired temperature by tapping the “+” and “-” controls until your desired maximum (cooling) temperature is displayed.
 - Tap the center LARGE WHITE number to accept your new settings and return to the main screen.
- **Spring & Fall:** You may see **two** bubbles when both heating and cooling are enabled. You must set a maximum (cooling) and minimum (heating) range. The range must be at least 5-degrees. The system will go on standby when within this range, turning on when maximum or minimum setting is exceeded.
 1. *Cooling:* Tap the SMALL BLUE bubble on the left to set the desired cooling (maximum) temperature. Tap the “+” and “-” controls until the desired temperature is displayed.
 2. *Heating:* Tap the SMALL ORANGE bubble on the left to set the desired heating (minimum) temperature. Tap the “+” and “-” controls until the desired temperature is displayed.
 3. *Accept:* Tap the center LARGE WHITE number to *accept your settings*. If you properly adjusted the temperature, the display should return to the main menu and the small bubble at the bottom of the display indicates the range you selected, similar to the below image:

- The temperature should remain at your setting until changed.
- The system may require a couple of hours to cool the house, especially on hot days. To speed up the process, ensure all doors/windows remain closed, turn on ceiling fans to help circulate the air, and delay any cooking.
- If after an hour, with ALL the doors/windows CLOSED, the system is not adjusting the temperature, see below troubleshooting.

TROUBLESHOOTING:

- *System will not cool/heat entire floors to desired temperature range:*
 1. Ensure ALL doors and windows are completely closed. Guests often leave their bedroom sliding doors/windows open. The system is not able to compensate for drafts and heat. This location is greatly affected by ocean breezes. Drafts from one floor affects other floors.
 2. Great Room (3rd floor) sliding doors left open will cause the upstairs system to shut off after five minutes, and this will be displayed at the bottom of the thermostat: **Off – eco+ is on**
 3. Game Room doors and windows, and main Entry Doors left open will cause the downstairs system to shut off after five minutes and this will be displayed on the bottom of the thermostat: **Off – eco+ is on**
 4. Identify which floor(s) are affected. The top floor system is separate from the two lower floors.
 5. Compare the temperature settings on BOTH thermostat displays (2nd and 3rd floors).
 - The LARGE white numbers indicate the ACTUAL temperature. The *small* numbers in the bubble at the bottom of the display indicate the temperature *settings*, like this:
A close-up of a thermostat display. It shows a temperature range of 65 - 75 in large white numbers. To the right, it says "Home for now" in smaller white text. There is a small "X" icon in a circle to the right of the text.
 - Confirm the correct cooling (maximum temp) and heating (minimum temp) range is set.
 - It is best to match the upstairs and downstairs temperature settings so one system does not need to try to compensate for the other.
 - If necessary, reference the above instructions to change the temperature.
 6. Within 30 minutes, the temperature should be moving towards the desired temperature range. If the system is running but the temperature is not improving, then there may be an issue. During normal conditions, with all doors/windows closed, the system may require up to 2 hours to achieve the desired temperature range and balance the house.
 7. Check the thermostat to see whether a blue (cooling) or orange (heating) outline is displayed. If so, this indicates the system is *attempting* to cool/heat the house.
 8. Check whether the air coming out from the vents is hot/cold. If the air coming from the vents is only marginally warmer/colder, then there may be a problem.
 9. Contact Twiddy for assistance.
- *Individual room(s) are too hot or too cold:*
 1. Rooms on the South-side of the house receive greater airflow than rooms on the North-side. This is unavoidable, due to the location of the HVAC equipment. The Duck and Southern Shores bedrooms receive more airflow.
 2. Keep all bedroom doors open daily to improve air circulation.
 3. Check whether the air supply vents in *all* rooms are open. Closing vents may create hot/cold pockets near the temperature sensors, causing the system to compensate.
 4. Turn on all ceiling fans to circulate air. This helps balance the whole house temperature.
- *Unusual noise (rattling or banging) or water is emanating from the equipment (ground floor near clothes washer or top floor in attic above bedroom):* Contact Twiddy immediately for assistance.

Thank you for your part in conserving energy and helping us maintain an eco-friendly house!

Life on Earth needs both day and night.

For billions of years, life has evolved with Earth's predictable rhythm of light and dark controlled by the length of the day. In fact, it's encoded in the DNA of all plants and animals. Humans have radically disrupted this cycle by lighting up the night.

It used to be that when the sun went down, celestial sources like the moon, stars, planets and the Milky Way lit the sky. Life learned to operate under the glow of these objects. For many animals, the natural night sky signals when to eat, sleep, hunt, migrate and even when to reproduce. It is estimated that half of all species on Earth start their "daily" activities at sundown.

"Near cities, cloudy skies are now hundreds, or even thousands of times brighter than they were 200 years ago. We are only beginning to learn what a drastic effect this has had on nocturnal ecology."

— Christopher Kyba, light pollution research scientist

WHY DARK SKIES?

The need to protect and restore the natural nighttime environment is more urgent than ever. Light pollution, defined as light where it is not wanted or needed, affects our health, the environment, wildlife, and our ability to find awe in the natural night. Research indicates that light pollution is increasing at a global average rate of two percent per year.

Light Pollution Can Harm Wildlife

INTERNATIONAL DARK-SKY ASSOCIATION

ARTIFICIAL LIGHTS DISRUPT THE WORLD'S ECOSYSTEMS

Plants and animals depend on Earth's daily cycle of light and dark to govern life-sustaining behaviors such as reproduction, nourishment, sleep and protection from predators. Scientific evidence suggests that artificial light at night has negative and deadly effects on many creatures, including amphibians, birds, mammals, invertebrates, and plants.

CORAL

More than 130 different species of coral on the Great Barrier Reef spawn new life by moonlight. Bright urban lights can mask the moon's phases, throwing the corals' biological clocks out of sync.

SEA TURTLES

Sea turtles live in the ocean but hatch at night on the beach. Hatchlings find the sea by detecting the bright horizon over the ocean. Artificial lights draw them away from the ocean. In Florida alone, millions of hatchlings die this way every year.

FROGS AND TOADS

Glare from artificial lights can impact wetland habitats that are home to amphibians, such as frogs and toads, whose nighttime croaking is part of the breeding ritual. Artificial lights disrupt this nocturnal activity and interfere with reproduction, which reduces populations.

BIRDS

Birds that migrate or hunt at night navigate by moonlight and starlight. Artificial lights can cause them to wander off course towards dangerous nighttime landscapes of cities. Every year millions of birds die colliding with needlessly illuminated buildings and towers.

Other Wildlife Harmed by Light Pollution

We are only just beginning to understand the negative effects of artificial light at night on wildlife. Every year new research adds even more wildlife to the list of animals affected by too much light, including:

- Hummingbirds
- Wallabies
- Little penguin
- Zebrafish
- Sweat bees
- Seabirds
- Monarch butterflies
- Atlantic salmon
- Zooplankton
- European perch
- Songbirds
- Peahens
- Bats
- Owls
- Mice
- Insects
- Geckos
- Fireflies

SAFE LIGHTING SOLUTIONS

- Use only fully shielded, IDA dark sky certified fixtures for all outdoor lighting, so lights shine down, not up.
- Use only the right amount of light needed. Too much light is wasteful and harms wildlife.
- Install timers and dimmer switches and turn off lights when not in use. If you must have security lighting, use motion sensors.
- Turn off lights in office buildings and homes when not in use.
- Use only lighting with a color temperature of 3000K and below to reduce the blue (cool) light that is more harmful to many animal species.
- Work with your neighbors and local governments to ensure outdoor lighting isn't harming the wildlife in your area.

What Every Visitor Needs To Know Before The Storm

Historically, it was difficult to predict when a hurricane was expected to hit the Outer Banks. But with modern meteorological studies and weather tracking systems becoming increasingly sophisticated, we generally have quite a bit of advance notice for a bad storm. If you are visiting Currituck County during hurricane season (June 1st-November 30th), there is always a small chance that severe weather could coincide with your vacation plans, so be sure you know what to do and where to go to stay safe.

Visitors are encouraged to closely monitor weather conditions and contact their accommodation provider before leaving home to travel to the Currituck Outer Banks.

Numbers to Know

To Receive Updates on Hazardous Beach Conditions (including Red Flags):

- Corolla Beaches: Text: SAFECOROLLA To: 888777
- Other OBX Beaches: Text: JOIN OBXBEACHCONDITIONS To: 30890

Keep these phone numbers handy to call in the event of a coming tropical storm or hurricane.

- Currituck Emergency Management – (252) 232-2115
- Currituck County Public Information – (252) 232-0719

You will find phone numbers listed below for Currituck County's emergency, medical, and information services. We hope you and your family have a wonderful stay in the Currituck Outer Banks. Please do not hesitate to contact us if you have further questions.

Hurricane Watch

A hurricane or tropical storm WATCH indicates that storm conditions are possible in the specified area, usually within 36 hours. Gather information ahead of time: Check weather predictions for the Currituck Outer Banks. If a storm WATCH is issued before leaving your home, contact your vacation rental company to receive weather information and instructions.

During your vacation: If a storm WATCH is issued while you're on vacation, monitor weather information for storm developments. Secure outside items at your rental home and prepare to evacuate. Fuel vehicles and have belongings packed and ready to go.

Protect your vacation investment: Contact your rental company for information on travel insurance.

Hurricane Warning

A hurricane or tropical storm WARNING indicates that storm conditions are expected in the specified area, usually within 36 hours.

Monitor the situation: Closely monitor the storm's progress on local radio and television stations, and log on to [CurrituckGovernment.com](https://www.currituckgovernment.com) [which redirects you to <https://co.currituck.nc.us/>] for public advisories.

What to do: Listen and watch for evacuation notices. Beware of flooding. It only takes one foot of water to sweep away a car. Vacationers in the four-wheel-drive areas north of Corolla should pay attention to tide warnings and storm surge. Rising waters may make the beach impassable, so be prepared to leave ahead of time.

Evacuation In North Carolina, local counties have the authority to determine when an evacuation is necessary. If an evacuation is ordered, ALL vacationers must leave the Currituck Outer Banks.

The only route off the northern beaches is South NC 12. During peak tourist season, more than 100,000 people may be evacuating on this two-lane road. Follow orderly traffic procedures and heed any directions from emergency officials.

During an evacuation: Be prepared to drive a considerable distance away from the storm area. There are no storm shelters on the Currituck Outer Banks.

Visitors should take all belongings and pets with them when evacuating. You will not be guaranteed re-entry into the Currituck Outer Banks following the storm.

Re-Entry

Re-entry into the Currituck Outer Banks is granted by County officials, who decide when the area is safe.

Visitors wishing to return to their rental homes must provide a rental agreement or other relevant documentation at the time of re-entry [NOTE: If using the Twiddy App, you can show authorities your rental reservation as proof].

1. Priority One – Essential Personnel: County Public Safety Agencies, Utilities/Infrastructure Teams, County/State Damage Assessment Teams, Power/Energy Companies, Disaster Relief Agencies, and Designated Hotel Employees.
2. Priority Two – Residents, Property Owners, and Critical Businesses: Pharmacies, Food Service, Grocery Stores, Financial/Banks, Gas Stations, Insurance, Property Management, Debris Removal, Supply Chain & Building Suppliers/Distributors, Contractors, and Trades (electrical, plumbing, etc.).
3. Priority Three – Visitors and General Public.

We value your safety during your stay in Currituck. Please pay close attention to any warnings that are issued by authorities and emergency personnel, and follow the safety guidelines and recommendations associated with activities.

In the event of a hurricane or tropical storm, we will post updates from Currituck County officials and The National Weather Service on our website. Please take a few minutes and read over our hurricane information and our beach safety tips.

TAB T: N.E.S.T. (Network for Endangered Sea Turtles)

Check the *Beach-Topia* website at <https://beachtopia.us/> for any updates.

At the end of the rental season, some proceeds from Beach-Topia are donated to N.E.S.T.

N.E.S.T. is an all-volunteer 501(c)(3) non-profit organization dedicated to the protection and conservation of sea turtles and other protected marine wildlife on the Outer Banks of North Carolina from the Virginia line to south Nags Head.

N.E.S.T. partners with North Carolina Aquariums at the Roanoke Island location in Manteo, Southern Outer Banks (<https://www.ncaquariums.com/sea-turtles>) and with the North Carolina Wildlife Resources Commission (<https://www.ncwildlife.org/Learning/Education-Centers/Outer-Banks>). The following comes from N.E.S.T.'s website (<https://www.nestonline.org/>), where you can also subscribe to their newsletter via email.

N.E.S.T. Hotline: Report all nesting turtles, turtle crawls, stranded/dead turtles, or hatching events on the Outer Banks to the N.E.S.T. Hotline at **252-441-8622**. Please do NOT interfere or interact with the turtles.

How You Can Help Sea Turtles on the Outer Banks

- If you see a sea turtle call the N.E.S.T. Hotline at 252-441-8622
- Keep away from turtles on the beach especially moving turtles that may be looking for a nesting site. To observe, sit quietly away from the turtle.
- Leave turtle hatchlings on the beach. Call N.E.S.T. Hotline for direction.
- Turn off flashlights, cell phone screens, and all other ocean side lighting during hatching or nesting events.
- Respect all nest markers. Report disturbances to the N.E.S.T. Hotline.
- Remove beach litter such as balloons and plastic bags (they may be mistaken for food in the ocean and ingested by sea turtles).
- Fill in all holes on the beach at the end of the day as they may become traps for female turtles that generally nest on the beach at night.
- Remove all beach furniture at the end of the day.
- Keep pets on a leash and away from sea turtles and nests

Sea Turtle Facts

- The Outer Banks is one of the northernmost ranges for sea turtle nesting.
- The sex of a sea turtle is determined by the temperature of the nest during fetal maturation. Colder temperatures result in as many as 100% males and warmer temperatures as many as 100% females. As our climate changes and oceans warm, colder northern breeding grounds such as those covered by N.E.S.T., though not as prolific as those in the south, are essential to providing sufficient numbers of male hatchlings to sustain and grow overall sea turtle populations.

- Sea Turtles are air-breathing reptiles.
- Healthy sea turtles that visit the Outer Banks never come on shore – the only exception is female turtles ready to nest and lay eggs.
- Nesting females go right back into the ocean as soon as their eggs are laid and have no contact with their offspring,
- Sea turtles visit the Outer Banks from early to mid-summer to lay eggs. Those eggs hatch 50-80 days after they are laid. Sea turtle nests are 18-22 inches deep and on average hold 75 to 150 ping-pong ball sized eggs. Most adult sea turtles nest every 2-3 years, laying 3-4 clutches of eggs during a nesting season. (May-August)
- Sea turtle hatchlings are about 2 inches long.
- Scientists guesstimate that only one sea turtle hatchling in 1,000 survive to full maturity which for Loggerheads is approximately 30 years old.
- Weighing 250-400 pounds, adult Loggerheads can grow to more than 3 feet long. Adult Leatherbacks can reach the size of a VW bug!
- There are five species of sea turtles that visit the Outer Banks.
 - Loggerhead – most common (<https://www.nestonline.org/loggerhead-caretta-caretta/>)
 - Green – common especially as juveniles (<https://www.nestonline.org/green-sea-turtle-chelonia-mydas/>)
 - Kemp’s Ridley – common especially as juveniles (<https://www.nestonline.org/kemps-ridley-lepidochelys-kempii/>)
 - Hawksbill – very rare (<https://www.nestonline.org/hawksbill-eretmochelys-imbricata/>)
 - Leatherback – uncommon especially nearshore (<https://www.nestonline.org/leatherback-dermochelys-coriacea/>)
- All of these species are protected under the Endangered Species Act which makes it illegal to harass, harm, pursue, hunt, shoot, wound, capture, or collect sea turtle eggs, hatchlings, adults, or any body parts. Violators can be prosecuted under Civil and Criminal laws and be assess heavy penalties (up to \$25,000 fine and up to one year in jail.)
- Depending on species sea turtles feed on mollusks, crabs, sponges, sea grasses and jellyfish.

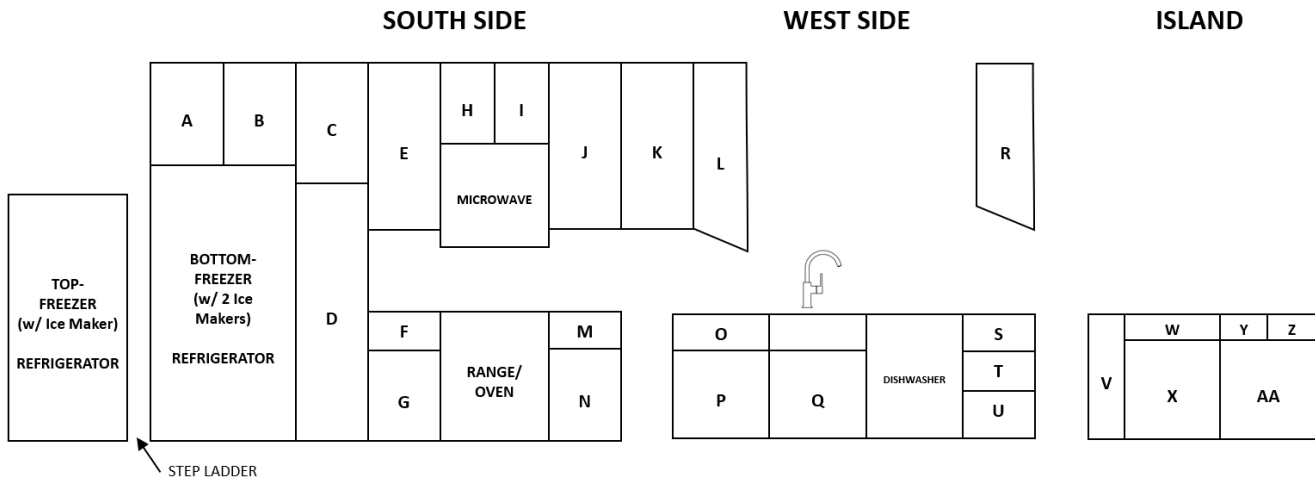

See the N.E.S.T. signs posted at various beach access paths and bulletin boards.
