Stage Layout

Load In & Parking

Enter the Scheels parking lot from Destination Drive, and turn left at the first road heading towards the parking garage. There is a gated construction area behind the stage you can pull into to load in and out. It is a gravel area, there is no paved roadway. You can pull up to the wooden fence, but any equipment must be walked in from there. **Vehicles cannot be left in this area during the show, they must be moved to a parking lot.** Failure to do so will result in vehicles being towed. You will be able to return to this area after the show for load out. Bus parking to be determined per event, contact Nick for details if applicable.
