

Quicksilva: The NHS Integration Partner

Quicksilva is a trusted provider of NHS integration and digital managed services, empowering healthcare providers with quick and secure access to national systems and critical patient data.

With over 20 years of experience connecting NHS Spine and GP data with a range of organisations, Quicksilva is dedicated to supporting safer, more connected care every day.

Our Areas of Expertise

- **NHS Integration** - Seamless, compliant integration with NHS Spine features including Summary Care Records, Electronic Prescription Service, and Child Protection-Information Sharing.
- **Cloud Hosting & Migrations** - Reliable, 24/7 cloud hosting on world-class platforms, backed by expert support - from everyday queries to strategic guidance from skilled platform engineers. Quick and secure cloud migrations delivered by in-house experts, minimising disruption while ensuring performance, compliance, and long-term scalability.
- **Bespoke Development & Professional Services** - Custom solutions and expert consultancy to support complex integrations, legacy migrations, and tailored NHS workflows, from design to delivery.

The Benefits of Partnering with Quicksilva

Improve Patient Safety - Access critical patient data at the point of care, enabling informed clinical decisions and reducing duplication or risk of human error.

Reduce Administrative Burden - Automate data sharing and reduce time spent navigating between systems, freeing up time for clinicians to spend time doing what they do best.

Accelerate Interoperability - We make NHS integrations easy by simplifying the process with pre-built connectors and proven expertise.

Easy Adoption - Tools like conneQt Toolbar integrate easily into existing clinical systems such as EMIS or TPP, with no disruption to clinical services.

Reliable and Supported - Our solutions are fully supported and actively maintained. We're a trusted NHS Integration Partner with a strong track record.

Scalable for the Future - Our technology grows with you to suit your needs from small practices to ICS-level integrations.
