

Genial: Global Leaders in Quality and Information Management

Genial is a leading provider of market-leading quality and information management software to businesses across the globe.

Designed specifically for healthcare organisations, our flagship platform, iPassport helps NHS trusts, laboratories, and clinical services manage compliance, streamline audits, and maintain high standards of patient safety. With Genial, healthcare teams gain the tools they need to stay inspection-ready, reduce risk, and operate with confidence in regulated environments.

Our Areas of Expertise

- **Compliance and Quality Management** - A trusted partner to over 50,000 users worldwide, our iPassport system can offer you a fully featured, cloud-based and affordable Quality Management Software service.
- **Genetics Information Management** - iGene is a software solution designed specifically for genomic workflows and clinical services to help digitise, streamline and improve day to day processes and information management.

The Benefits of Partnering with Genial

Enhance Quality & Compliance - Achieve and maintain accreditation with systems designed around regulatory best practices and continuous improvement.

Reduce Administrative Burden - Automate document control, training, audits, and equipment tracking - cutting down on paper-based processes and freeing up staff time to focus on their core responsibilities.

Drive Efficiency in Genetics Services - iGene supports the full clinical genetics workflow, ensuring consistent, traceable, and high-quality outcomes for patients.

Secure, Cloud-Based Access - All systems are securely hosted and accessed via browser - no local installs, no complex IT systems.

Trusted Worldwide - Genial powers quality information management and genetics systems across the UK, Europe, North America, Australia and New Zealand and more.
