

K2 Medical Systems: The Digital Maternity Experts

K2 Medical Systems is a leading provider of digital maternity solutions, designed to support maternity services in delivering safer, more efficient care.

Our cutting-edge technology enhances maternity services across the pregnancy journey, including community and acute settings, ensuring the best outcomes for mothers and babies.

Our Areas of Expertise

- **Community** – Digital solutions for midwives to efficiently manage antenatal & postnatal care in the community, that works online & offline.
- **Clinics** – Clinics that work for you, linked with the EPR & automated based on attendance.
- **Pregnancy pathways** – Manage the entire pregnancy pathway, in line with national requirements & still personalised to each individual.
- **Labour & Birth** – Integrated fetal monitoring & central surveillance, including point of care decision assistance, supporting safe & effective labour & delivery.
- **Integrations** – Integrates with specialist systems to support the multidisciplinary nature of maternity, aggregating all data in one central maternal record & disseminating the data where needed.
- **Caseload management** – Both individual & team caseload management built in to support day to day working & manage specialist referrals.

The Benefits of Partnering with K2 Medical Systems

Enhance Patient Safety – Our solutions offer real-time decision support, supporting clinicians with the tools they need to make informed and consistent decisions, reducing risks and ultimately improving outcomes for mothers and babies.

Streamline Workflows – Digitise maternity records, automate processes, and reduce administrative burden, allowing clinicians to focus on patient care.

Ensure Compliance & Standardisation – Our systems align with national guidelines, supports local workflows, and includes best practices, ensuring consistency in quality of care.

Empower Your Workforce – Provide your teams with advanced digital tools and training to enhance their skills and confidence in delivering maternity care.

Seamless Integration – K2 solutions work with existing hospital systems, ensuring a smooth transition to a completely digital maternity pathway

A Complete System – We develop and maintain all products (*we do not simply bolt on other solutions*), providing the most comprehensive maternity system - from self-referral through our online notes all the way through to outcome and discharge from maternity services.
