

# RAZZLE DAZZLE & KIDS KONNECTION

February 2024

What's Happening:

Pink Shirt Day  
February 28<sup>th</sup>

### What is Pink Shirt Day?

The idea comes from two Nova Scotia high school students in 2007. When a fellow student was being bullied for wearing a pink shirt, they decided to take a stand.

They went out and bought pink shirts to give to fellow students to show their support for a boy who was being bullied simply for wearing a pink shirt.

On February 28<sup>th</sup>, everyone is encouraged to wear a pink shirt.

***Educators!! Do you know someone interested in opening a licensed dayhome?***

***Refer them to us and you could receive a referral bonus! Ask us for more information.***

Mission Statement: Provide quality childcare with an in-home, play based learning environment for every individual child. Recognizing each child is unique and he/she has different abilities, which enable every child to attain independence at their own rate of development.

# PROGRAMMING

## Valentine's Day Bubble Foam

Clear Sensory Bin (Large) or a Sensory Table  
Water  
Bubble bath or dish soap  
Real or fake rose petal  
Kitchen tools such as spoons, slotted spoons, soup laden, jugs and strainers, bowls

In a large bowl or a stand mixer combine 1/4 cup of water and 4 teaspoons of bubble bath. General rule of thumb is 2 water to 1 bubble bath. The more bubble bath you add the more bubbles you will get. Use your stand mixer or hand blender to quickly whip up thick frothy bubbles. You can also use a regular whisk to make the bubbles. You can also add a few drops rose water or rose essential oil. Then add some acrylic red and pink rose petals and kitchen tools like spoons, slotted spoons, soup laden, bowls, strainers. This activity is great for Colour Recognition, Language and Vocabulary Development, Hand-Eye Coordination, Fine Motor Skills, Visual Perception, Cognitive Development, Imaginative and Sensory Play.

## PARENT CORNER

### Kindness Is Contagious

According to the Random Acts of Kindness Foundation, performing acts of kindness increases the feel-good chemicals in our body. When we do something that makes us feel good, we usually want to repeat that behavior.

Not only does giving kindness increase good feelings, but witnessing kindness can also increase feel-good chemicals and encourages those who simply watched a kind act to follow suit.

With this in mind, teaching children kindness through modeling the behavior and expanding their awareness through books may help spread kindness among other children. If we instill these characteristics in them now, they are likelier to maintain these values throughout their lives.
