Length: 12 min.  
This module gives participants working with children, youth and adults with Autism Spectrum Disorder (ASD) an in-depth look at how the diagnosis is made, prevalence rates, and factors to consider. Participants will gain an understanding of common co-morbid mental health diagnoses such as, Anxiety, Obsessive Compulsive Disorder, Depression, and Attention Deficit Hyper-Activity Disorder, and how each presents in individuals with ASD. Viewers will learn how family dynamics must also be considered and how to use the Biopsychosocial model. A case study is reviewed to demonstrate the course material.

The content you have opened will also appear on your CLL dashboard.

The screenshot displays a user interface for a Learning Management System (LMS). At the top, a green navigation bar contains the text "Home" and a user profile icon labeled "AP". Below this, a secondary navigation bar lists "Home", "Content Library", "Achievements", "Live Sessions", and "Instructor". A welcome message "Welcome, Angela Paylor" is positioned below the navigation.

The main content area is divided into two primary sections. On the left is a "Recently Viewed" sidebar, which features a card for the course "Autism Spectrum Disorder (ASD) and Mental Health" by "The Ohio State University". This card is highlighted with a red circle. Below this sidebar is a "Recent Achievements" section with a "View All" button.

The right section is a grid of course cards, filtered by "All", "In Progress", "Overdue", "Not Started", and "Completed". A search bar at the top of this grid is labeled "Search for assigned courses and learning paths". The grid contains several cards, including:
