

# The Site: ~4 acres with current elevation of ~50'

As Planned, the project will:

- Cut down over 630 mature trees
- Excavate 134,000 cu yds to take elevation to 10'
- Replace w/2 - 45' buildings – total height = 55'
- Total storage now ~69,000 sq ft – 1.5x more
- Heated Buildings – 8,000 gal propane on site
- Remove a natural feature that protects against the effects of climate change and natural buffer to the Mill Road Preserve

Current Buildings (*pictured*) Left Pair: 28' & 24' high; total 22,425 sq ft Right: 24' high; 15,076 sq ft

New Buildings: 17' higher & 4.5x larger than left pair
