UHMW Poly Capped Bolts A Better Choice for Fastening Material

At Pride Solutions, we take great pride in manufacturing poly capped bolts to your specification. All of our poly capped bolts are manufactured by overmolding Ultra High Molecular Weight Polyethylene (UHMW-PE) directly to the bolt right here in our production facility in Hutchinson, Minnesota. The entire bolt head is covered with UHMW, greatly reducing the possibility of detachment, unlike snap-on caps which can easily detach. Every bolt is inspected for quality assurance.

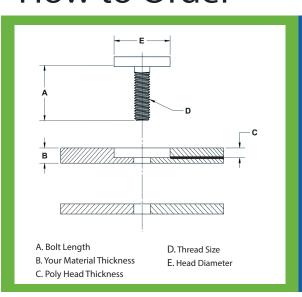

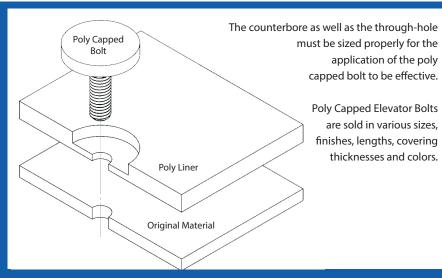

Ideal for High Friction and Wear or High Velocity Applications

Our poly capped bolts are an excellent solution for applications where there is excessive friction and wear or high velocity. They excel at protecting steel, aluminum and wood surfaces. Our bolts can also be used to fasten poly surfaces to achieve a 100% poly surface.

How to Order

General Information

ELEVATOR BOLT THREAD SIZES: 1/4", 5/16" and 3/8" APPLICATIONS:

Plain Bolts:

Steel or "carbon steel" is the most common and most economical bolt material. It is not corrosion resistant. Typically used in indoor applications.

Zinc Bolts:

Typically a low carbon steel coated in zinc, relatively inexpensive. Provides moderate corrosion resistance. Suitable for indoor and outdoor applications.

Stainless Steel Bolts:

Good corrosion resistance; suitable for outdoor and marine applications. Call for pricing.

LENGTHS: 1", 1 1/4", 1 1/2", 1 3/4" and 2"

HEAD THICKNESSES: .14, .24, .34, .44, .52 and .74

POLY HEAD COLORS:

Poly capped bolts are available in a wide range of colors upon request. Common colors are Black, White, Natural, Silver, Red, Yellow, Green, Blue and Orange. Please inquire about our custom colors.

MINIMUM ORDER:

\$150 minimum order per bolt dimension

PRODUCTION NOTES:

Due to production processing, Pride Engineered Plastics reserves the right to ship +10% of order quantity. Orders greater than 1,000 bolts, +1% of order.

The Original Poly People
Pride Solutions offers far more than poly capped bolts.
Our contract manufacturing services include compression molding and over-molding, custom plastic fabrication - cutting/shearing/bending/punching, CNC routing and lathe, plastic forming – line bending, and thermoforming. We also offer In-house CNC metal turning for manufacturing

clients who require over-molded metal parts. In addition, we offer custom electro-mechanical assembly services as well as competitively priced plastic sheet goods, plastic shaft and bar stock. We work with many polymers, specializing in UHMW-PE. Please visit our website to learn more.
