ARTWORK—CREATING AND SAVING FILES

Full Color Process

Sublimated full color process items require RGB artwork unless noted on the specific page. All other digital full color products are full color CMYK process. Every element of the file must be colored with process CMYK colors. If RGB or other non-CMYK colors are used in your files the necessary conversions to CMYK will change the appearance of the colors when printed, sometimes dramatically. Create full color process item files with Adobe® Acrobat PDF files. Create one item sized correctly per document. Artwork must be at least 300 dpi. For highest quality output, 600 dpi is recommended. Requested file formats should be Tiffs, PDFs or Illustrator files with the fonts embedded in the file. Do not include any punctuation in the PDF file name and please keep it short as possible.

Engraving

Include typestyle, upper case, lower case or both along with the position of the engraving on the item on your order. If no logo will be utilized, providing artwork is not necessary. Artwork must be at least 300 dpi. For highest quality output, 600 dpi is recommended. Requested file formats should be Tiffs, PDFs or Illustrator Files with the fonts embedded in the file.

ADA Signage

When ordering ADA signage you may choose a pictogram from the general information page or list CUSTOM if custom artwork is being sent. The custom artwork needs to be clean, black and white artwork scaled to fit the imprint area. Artwork must be at least 600 dpi. Screens are not available on all items.

Engraved Plastic Color Combinations

Engraved signs and badges are constructed from 1/16" two-ply plastic. Color combinations are available only as shown. Specify color number when ordering. If no color is indicated, L6 (black sign with white lettering) will be used. Some colors may fade if used outdoors.
