DESCRIPTION OF VITAMINS AND MINERALS

VITAMIN C:

One of the most popular antioxidants. It may help destroy cancer cells and supports immune function and fight off illnesses

GLUTATHIONE:

Antioxidant. Reduces cellular damage caused by alcohol and helps the body create energy. Improves insulin resistance.

VITAMIN B12:

A nutrient that helps keep the body's nerve and blood cells healthy. Increases energy levels and concentration, supports the immune system, helps improve sleep patterns, helps improve mood and depression.

B-COMPLEX:

Improves liver function and memory. Protects the body's immune system and helps with breaking down fats and carbohydrates into energy. It can have positive effects on hair, skin and nails.
