

## COMMITMENT LETTER

NALOU SPORT is fully committed to the United Nations Sustainable Development Goals (SDGs), set for 2030, aimed at creating a fairer, more equitable, and sustainable future for all. We share the UN's vision and are proud to support this ambitious program, which is based on key pillars such as fighting inequality, protecting the environment, and ensuring access to quality education and infrastructure.

In our field, we make a concrete contribution to these goals by designing sustainable and accessible sports facilities, especially in countries where access to quality infrastructure is limited. Our commitment goes beyond the mere construction of sports surfaces: we aim to create spaces that inspire and bring people together, while respecting the environment and using responsible practices.

Based between France and Guinea, NALOU SPORT offers its expertise to many countries, particularly in Africa, to support the development of safe and sustainable venues that meet international standards. We believe that sport is a powerful driver of change and solidarity, and we are determined to work alongside the United Nations to build stronger communities and a more sustainable world by 2030.

By promoting sport for all, in safe and suitable facilities, we contribute to **good health and well-being (SDG 3)**, encouraging regular physical activity and improving overall well-being.

We also support **quality education (SDG 4)** by developing spaces that promote learning through sport, especially for young people, helping them acquire values such as teamwork, respect, and discipline.

Our projects help to stimulate the local economy by creating sustainable jobs in the sports infrastructure sector, thus supporting **decent work and economic growth (SDG 8)**.

The sports infrastructures we implement are accessible to all, helping to **reduce inequalities (SDG 10)** and strengthen community cohesion. By facilitating access to sport for diverse populations, we create inclusive spaces where everyone can feel valued and connected.

Our initiatives also aim to build **sustainable cities and communities (SDG 11)**, through the development of environmentally friendly and inclusive facilities that enhance urban life.

Finally, we believe in the power of sport as a tool for peace and dialogue. We contribute to **peace, justice, and strong institutions (SDG 16)** by using sport as a vehicle for social cohesion, respect for rules, and shared values.
