July 17, 2024

To whom it may concern:

We have had many training events with Legacy Tactics, and each time, their training staff has completely surpassed all expectations. Each training event they have led for our department has accelerated our understanding of the kinetic aspects of law enforcement and has made our officers much more effective in performing their duties in the community.

Legacy has trained our department in active shooter response, tactical emergency medicine, and building searches. Their ability to break down advanced concepts and create a program that addresses the data-driven principles they have calculated as significant threat points have made our officers much safer as they find themselves in these situations in real-time.

We had over 1,024 man-hours of training with Legacy throughout 2022-2024, which is irreplaceable. No one else in the training industry provides law enforcement with what Legacy offers. We will continue to utilize Legacy for our training needs.

Sincerely,

*Andy Simmons*

Major Andy Simmons  
Assistant Chief of Police
