

We are looking for an experienced technical recruiter to help us identify and engage the best and brightest talent on the planet.

Responsibilities:

- Create a pipeline of top talent through multiple sourcing platforms.
- Work closely with department chiefs/hiring managers to execute sourcing strategies for key hires.
- Work closely with Hiring Managers to understand staffing criteria and create candidate search and selection strategy.
- Efficiently source top talents while keeping our bar crazy high.
- Track and report candidates throughout the pipeline.
- Take part in hiring and university events.

Requirements:

- Previous experience in HR/Recruitment desired.
- 2+ years of resourcing experience necessary.
- Sourcing experience within automotive or related engineering environments.
- You are excited to work in a small, dynamic team who loves challenge.
- You are detail oriented with an analytical and continuous improvement mindset, and constantly looking to improve processes.
- You are resourceful, able to execute on ambitious timelines with limited resources.
- You are able to quickly adapt to changes in requirements and scope.
- Exceptional knowledge of English.
