- Powerful vacuum motors offer up to 205" water lift for efficient solution recovery that results in better extraction and faster carpet drying.

MODELS

Carpet Extractors dispense water, either hot or cold, into a carpet at various rates called PSI (pounds per square inch). The higher the PSI, the more water output into carpet. The solution hose dispenses the water and the vacuum hose sucks the water out of the carpet.

Ultimate Solutions offers a variety of PSI and vacuum pump choices to meet the needs of your specific job.
