

“It's now time to maximise your largest asset.”

Does your Business Plan maximise the value of your business?

When the unexpected occurs:

- Does your business contingency plan secure your family's future?
- Do you have all your business legal and financial affairs in order?
- Have you worked on your wealth protection plan this year?

A good succession plan includes the right exit strategy and securing the value of your business for your family.

“ The majority of owners have substantial part of their family's wealth tied up within their business. ”

"This poses a significant risk if they become seriously ill or disabled."

Consider the following risk migration strategies:

- Regular review of the business legal documents and risk migration strategies
- Independent Business Power of Attorney
- Triggered Buy/Sell contingency agreement
- Comprehensive Estate Plans for all Directors and key Personnel.

"A comprehensive Estate Plan together with your Business Contingency and Succession Plan is the only way to ensure your greatest asset is protected for future generations."

To get started on your Business Contingency Plan contact your LGen Estate Plan Facilitator today, LGen, ensuring your most valuable asset is fully protected with the best Business Contingency Plan.
