

September 23, 2020

Dear President Donald J. Trump, Members of Congress and Members of the Senate:

We, the American people, demand that the very concepts of "viruses" and "viral contagion" be put on public trial for all Americans to see - for the entire world to see. It is time for the truth to prevail. It is time for the Freedoms, Liberties and Rights that Americans have long enjoyed under the United States Constitution, Bill of Rights and Federal Civil Rights to be restored once and for all. If the mere concept of an "invisible enemy" can strip the people of their Freedoms, Liberties and Rights, then that concept MUST be challenged – it MUST be proven to be VALID or INVALID. Information and details are being compiled at: [TheBigVirusHoax.com](http://TheBigVirusHoax.com)

There is a large community of scientists, doctors and health practitioners, including PhDs from MIT, who refute the existence of so-called "viruses." When one looks into the history of the "virus" narrative and considers its close association with the many Industries that profit in the billions of dollars each year - industries that rely upon the concepts of "viruses" and "viral contagion" to thrive - then it becomes crystal clear that there are tremendous motives and incentives for having strategically orchestrated the "Coronavirus Global Pandemic," as well as the politically motivated and monetarily incentivized push for government-mandated vaccinations and the myriad of other alleged "pandemic" emergencies – all of which have not only deceived the American people – and peoples throughout the world – but stripped and robbed us all of our Freedoms, Liberties and Rights.

We know there are corrupt career politicians who are bought off, bribed and paid for by the mega corporations - especially by the pharmaceutical and chemical companies that produce the many products that rely upon the "virus" narrative in order to be profitable. We also know that the lying FAKE NEWS mainstream media is paid handsomely by them to herald their narratives.

Our demand is a simple one. If "viruses" and "viral contagion" exist, then they can easily be proven to exist. They can be proven to exist on public broadcasts with both scientific communities presenting their case. True science is based upon observable and repeatable processes and methods that have been definitively established and can be duplicated by other third parties. It is not based upon assumptions, theories and models that render different results at different times for different people. The author of this letter, along with the many scientists, doctors and health practitioners known to this author, must be present at that trial. The magnitude of this issue demands an honest, fair, open, comprehensive and revealing public trial for the alleged existence of "viruses" and "viral contagion." We The People demand it.

Signed and dated below by an American Citizen, Resident and/or Inhabitant
