

NESARA Research 10-12-22

NESARA is the covert National Economic Security and Reformation Act (March/October 2000). **Notice that the S stands for Security; not for Stability. (S for Stability is a Bait-and-Switch mirror fraud.**

In November 2020, Benjamin Fulford commented that "NESARA was a good idea that has been used by criminals to con people out of their money". **In speaking thus, he may have been talking about the Bait-and-Switch mirror fraud version of NESARA.**

Every major positive and benevolent financial reform is mirrored by the Nazi-Continuum banking syndicate for the purposes of deception, theft, and subversion. The gold-backed global currency reset is an example. An attempt has been made to repackage elements of this as The Great Reset by a clique of panicking negative players (Jesuit and Davos rogue factions etc).

Over the last twenty-five years or so, since 1996, a lot of money and wealth diverted or stolen by the now diminishing Nazi-Continuum banking syndicate has been retrieved by benevolent White Hat teams. For example, between about 2012 and 2014, seventy trillion dollars was recovered from Nazi-Continuum black fund accounts. That money will be given back to humanity through the Global Collateral Accounts after the benevolent financial reset.

NESARA is an American legal initiative with radical and benevolent global consequences. It started life in 1962 as a reaction against private farmland grabs in the USA. General Roy Schwasinger and the military pioneered it. Back then, NESARA had an R which stood for Restoration. It was about restoring the stolen property of American farmers.

Now the NESARA global prosperity programs are on the cusp of being announced and activated. One of the protected funds said to be involved is called The Saint Germain World Trust. This fund contains deliverable precious metals and currencies worth upwards of one quattuordecillion US dollars. The word quattuordecillion is sometimes spelled quattodecillion. It means ten thousand, million dollars. Or \$1 with forty noughts after it.

\$10,000,000,000,000,000,000,000,000,000,000,000,000,000,000,000,000.

Hard-nosed business people, some perhaps of limited spiritual awareness, understandably have doubts about the reality, reach, and influence of Ascended

NESARA Research 10-12-22

Masters such as Violinio St Germain (aka Count of Saint Germain, François Rákóczi, Christian Rosenkreutz) in the modern world of global banking.

Yet there is a huge executive overlap on this planet between the esoteric spirituality of wealth, abundance, and generously-resourced human well-being, and the negative (Satanic) control systems of scarcity, taxes, debt, poverty, and unbacked paper or electronic money. Without money, we'd all be rich. Money is the mechanism that keeps us poor.

It was interesting in this connection, in August 2021, to notice a leading American constitutional lawyer making substantial reference to the financial history of Violinio St Germain. Anna Von Reitz (Anna Maria Riezinger; Fiduciary, The United States of America) noted that St Germain demonstrated that he knew how to create gemstones, gold, and other precious metals in his lifetime, and did so repeatedly in front of Church Officials, Royal Courts, and others. He left behind an absolutely stupendous fortune deposited all over the planet and left in the care of his acolytes.

The Saint Germain side of the story, Von Reitz says, has been temporarily blocked by a Breach of Trust seeking to incorporate the Family Trust and Foundation, and thus bring it under the control of the (English) Queen again (London Crown Temple). That action, however, is and was in obvious breach of the Trust Indenture, and Anna Von Reitz has placed a protective lien on the whole shebang. More here (22.08.21).

Among other projects, The Saint Germain World Trust's wealth and monies will be used to buy out all oil corporations, banks, and pharmaceutical cartels. And it will zero out (permanently cancel) all personal, corporate, and national debts worldwide. More about universal debt forgiveness and the imminent global debt jubilee can be found here. The Saint Germain World Trust resources are additional to, and separate from, The World Global Settlement Funds and the Global Collateral Accounts (pdf; 120pp).

The Saint Germain World Trust resources are also added to the Chinese Manchu dynasty's gold. This gold is held privately by the successors of the last Chinese Emperor, Pu Yi. This is private gold, not Chinese government gold.

In October 2018, the Manchu family syndicate donated a \$1.16 billion-worth 1934 Henry Morgenthau Bond to the White Dragon Society in Japan to seed finance the establishment of a meritocratic future planning agency for the whole planet. This was sufficient startup funding to begin the work of ending global poverty, stopping environmental destruction, and financing human expansion into the Solar System and beyond. Most human and humanoid races live on planets and in star systems beyond Planet Earth, and always have done.

NESARA Research 10-12-22

The whole series of 1934 Henry Morgenthau Bonds is backed by 70,000 tons of Manchu gold now worth a total of \$4.5 trillion. The bonds are denominated in US dollars.

The NESARA money was originally scheduled to be released in the year 2000, but the US Bush syndicate and White House, its banking and legal conspirators worldwide, and the 9/11 attacks in 2001 prevented the disbursement. And through corporate pan-global control of mainstream media outlets, nearly all knowledge of NESARA's existence was suppressed. This is now changing.

When the NESARA prosperity programmes are openly and publicly announced, perhaps during September or October 2022, they will permanently change human civilisation in every money-related way.

In early to mid 2017, there was said to be a delay among lead agents of Tier 1 signatories due to technical disagreements about how best to monetise and book the vast quantities of off-ledger gold held in Asian and other bunkers. Some of this gold was not quantised or stamped in bar form.

..... +++

The funds are now ready. The gold-backed global currency reset is ready. The conduits for the benevolent capital flows are clean and clear; they will bypass the BIS, SWIFT, the US Fed and the ECB completely. People have begun to talk numbers not in Quadrillions, but in Quintillions.

And by the beginning of 2020, people were also beginning to talk about the new global (and benevolent) Quantum Financial System. This system was well-prepared and tested. It now looks as if the new QFS will take about twenty four months to roll out completely, having started invisibly in 2020. It should be openly and visibly completed by the middle of 2022.

On Wednesday 25th August 2021, Simon Parkes of Connecting Consciousness put out a short post declaring that the new financial system had started. He was referring to the QFS. Attached to his post was this document from Africa.

The document shown was an official Zimbabwe government press statement over the signatures of the Minister of Finance and Economic Development, and the Governor of the Reserve Bank of Zimbabwe. It announced the receipt of SDR 677.4 million from the IMF, cleared for value on Monday 23rd August 2021.

At that date, IMF SDR 677.4 million was equivalent to USD 961 million. This sum was a small part of the IMF's total USD 650 billion SDR allocation to provide additional liquidity to the global financial system at that time.

NESARA Research 10-12-22

The new Quantum Financial System is said to involve a radical migration away from Stochastic Equilibrium-based central banking towards Recursive Complexity-based central banking. This is a very big change indeed and will mark the end of all fiat-based currencies, derivatives trading, and debt. Several significant off-ledger asset pieces such as the Asian gold reserves and various Legacy Accounts (for example, the V.K.Durham Trust) are understood to have been built in to the new global banking arrangements.

The aim of the Quantum Financial System (QFS, QuantFS) is not just to re-establish steady ongoing stability. It is much more comprehensive than that. It will enable exponential global growth in every benevolent aspect of human endeavour including climate repair, biodiversity support, free energy, free water, free health and healing, free housing, universal basic incomes, clean and quiet transport, new agrisystems and live ET-contact interplanetary and interstellar exploration.

QFS works from inside CIPS, not SWIFT. It is run by benevolent AI (artificial intelligence) with no 3D human access or oversight. It is supervised by the Higher Evolution from 5D. Individual spiritual masters operating in 5D such as Violinio St Germain and Quan Yin are understood to have executive involvement.

Down in 3D here, all nations in the surface human population have now signed up to QFS. The first country in was North Korea, and the last country to join was Lebanon.

When the top banking people in each nation saw the foundation QFS documents they quite quickly realised two things:

- (1) The new Quantum Financial System was actually going to happen; nothing could stop it.
- (2) If their own country did not commit and sign up by a certain closing date (now passed) their country would not be able to trade with other countries, even by physical piracy through the global subterranean tunnel systems.

Also none of their citizens would be able to travel or move personal money to other countries or be visited by the citizens of other countries. Such restrictions would be anathema to those with élite banking lifestyles.

In the summer of 2020, during the extended coronavirus psyop, a new development became visible. QFS insiders and associated White Hats, despite the non-disclosure agreements they had signed, began to drop explicit hints about NESARA on social media channels.

For example, in July, in a discussion between Robert David Steele (USA) and Charles Ward (UK), Steele asked Ward if he could assure his viewers that the 2020 American

NESARA Research 10-12-22

Presidential elections would go ahead as scheduled, and not be delayed by the virus psyop. Ward said yes, it would go ahead, probably in November, unless Trump decided to announce NESARA shortly before that month.

In that event, there would new Presidential and Congressional elections a maximum of 120 days after the date of the announcement.
