

OWNERS MANUAL

POULTRY HOUSE SPRAYER

Since VAN'S EQUIPMENT'S beginnings we have used a generic owners manual. It was just too costly to have printed and keep on hand owner manuals specific to each size and type sprayer we manufacture.

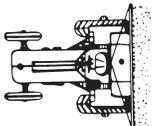

We now have the technology in house to create sprayer specific manuals and to print them only as needed. We think we have made a good beginning, but these manuals are still in the development stage. At this point we would appreciate the input of our end user customer and our dealers as to how we can make these manuals more useful and user friendly.

This is the prototype manual. Please look over the manual and give us your input.

CALL VANS EQUIPMENT AT 1-800-765-1101 AND ASK FOR CRAIG

We appreciate your input on these manuals.

Thanks Vans Equipment

**VAN'S EQUIPMENT
BUILT FOR FARMING INTEGRITY**

WHEN SELECTING EQUIPMENT FOR FARMING THE NAME VAN'S means availability, reliability, and proven superiority. Maintaining a close association with farming customers has resulted in equipment design and manufacturing philosophy that reflects the exacting requirements of our customers.

Van's Equipment Company, Inc. appreciates your purchase of a new spray unit. This unit, is designed to give years of service with proper care. The following pages will be helpful in set-up and maintenance of your new unit.

PLEASE READ THIS MANUAL CAREFULLY BEFORE INITIAL START-UP IS ATTEMPTED.

**WE APPRECIATE YOU
AND YOUR BUSINESS**

CAUTIONS AND SAFETY

- A. Never allow anyone to ride sprayer while in operation.
- B. Be sure all driveline shields are in place and drive shaft is securely attached at both ends and shaft turns freely.
- C. NEVER SHUT RETURN LINE COMPLETELY OFF.
- D. Hitch only to recommended hitch points.
- E. Do not exceed pump Maximum RPM of 540.
- F. Never run pump dry.
- G. Check lug and hitch bolts before transporting.
- H. When Transporting always check that adjustable items are secure . Use lights or other warning devices to warn other vehicles.
- I. Always shut tractor off before attaching drive shaft.
- J. Check agitation frequently.
- K. Always have tank half full before adding chemical.
- L. Always adjust regulator while pump is running and never exceed capacity of gauge.
- M. Always use clean water and check strainer daily.
- N. Thoroughly clean sprayer after each use.

BEFORE RUNNING PUMP

- A. Be sure oil is half way up sight tube. If needed fill with 20w-30w NON DETERGENT oil.
- B. Be sure there are no suction line restrictions.
- C. Check that all clamps are tight.
- D. All VAN,S sprayers with diaphragm pump come with 20 MESH screens in the strainer. Be sure when replacing the screen to use 20 MESH.
- E. Pulsation damper should be charged to 20 percent of operating pressure,(min 5 psi). There is a valve stem like on a tire on the damper head for this purpose.
- F. Run pump at 0 pressure for 1 minute to remove air from system.
- G. Donot exceed recommended pump speed and pressure.
- H. Do not restrict pump on suction side.VAN'S recommends wire coil hose on suction lines.
- I. Change oil every 200 hours or at end of season.To drain oil from pump,remove the drain plug,(see manufactures manual or see breakdown in this manual), slowly turn shaft until all oil is drained.To fill pump with oil,slowly pour oil into sight tube while turning shaft.Turning shaft purges air from crankcase. REQUIRES 87 oz. OF OIL.

SETUP AND USE

- A. Before every use inspect for damage.
- B. Look in tank to make sure its clean.
- C. Attach hitch to draw bar.Sprayer hitch has some adjustment to help level unit.
- D. Add about 50 Gallons of clean water,(no chemicals at this time.
- E. Open ball vale in suction line and adgitator line and check for leaks.
- F. Start pum and check for leaks throughout system.

- G. Always leave bypass line open during operation of pump. NEVER shut bypass completely off, This can cause serious injury or death and damage pump. Again NEVER shut pressure regulator completely off.
- H. The hand gun has an inline shut off ball valve at pump to shut off flow to gun. The trigger on gun can be used for intermittent use. The front handle on gun barrel is used to adjust spray pattern.
- I. The tips and boomless nozzle have individual shut offs on the manifold on rear of sprayer.
- J. The tips can be adjusted up and down and side to side. The boomless nozzle can be rotated 180 degrees the spray either floor or ceiling.

CLEANUP AND STORAGE

- A. Clean thoroughly, remove all chemical residues from tank, pump strainer, and tips. Flush entire system with clean water, followed by a solution of 1 quart household ammonia to 25 gallons of water.
- B. Clean all tips, nozzles, including gun tip with soft brush. NEVER use metal object to clean tips.
- C. Inspect tips for wear.
- D. Drain tank completely and leave outside to dry. Be sure all residue has been removed.
- E. For long term or off season storage, do all of above then add a few gallons of antifreeze and run at low pressure until liquid come out all tips then immediately shut off pump. This will fill system with antifreeze.
- F. Store in dry place out of weather. Keeping sprayer out of sunlight will lessen UV effects on tank.
- G. Never change from one chemical to another without thoroughly cleaning sprayer.

PROBLEM	PROBABLE CAUSE	POSSIBLE REMEDY
Erratic pressure indication on pressure gauge	air leaking into suction line	Tighten all fittings and hoses between pump and tank
	Trash in control valve or pressure gauge	Remove and clean parts
	Suction line kinked or clogged	Remove suction line and clean-check tank and strainer
	Air leak in suction hose	Replace hose
Pressure gauge fluctuates excessively	Suction hose collapsed	Replace hose
	Pump is sucking in air through the suction line or air has not been entirely evacuated from strainer	Examine the suction hose and make sure it is firmly secured. Run the pump with outlet hose open to evacuate air from pump
Pump loses suction	Suction strainer clogged	Clean strainer and tank
	Air leak in suction hose	Replace hose
	Suction hose collapsed	Replace hose
	Pump air locked	Remove discharge line and pump liquid through pump
	Pump worn and clearances too great	Replace or repair pump
Pump does not draw water	Seals worn out or deteriorated	Replace pump seals
	One or more valves are seated improperly	Examine the valve seatings and clean them
	Suction line is plugged or collapsed clogged strainer	Examine suction line Clean strained
Noisy pump	Excessive pump speed	Slow the pump
	Air leak in suction line	Replace suction hose
	Partially clogged strainer	Clean strainer
Pump shows decreased capacity	Suction strainer clogged	Clean strainer
	Air leak in suction hose	Replace suction hose
	Moving parts worn	Replace worn parts
	Worn seal	Replace seal
	Pump roller stuck	Clean pump inside
	Pump operating too slow	Speed up pump
	Nozzles too large for capacity of pump	Use smaller nozzles or reduce number of nozzles on boom
Pump leaks	Worn out seal	Replace seal

POULTRY HOUSE SPRAYER

500 GALLON

HEAVY DUTY

MODEL NO. T50010	STANDARD
MODEL No. T50016	ECONOMY

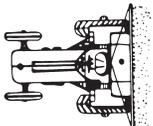

The Van's Poultry House Sprayer is another proven work horse from the Van's Stable. This machine takes most of the work out of Broiler Production. It will save you many hours labor in washing down and cleaning your houses between grow outs. Four stainless steel high pressure nozzles mounted on the right rear of the machine on adjustable brackets supplied by a high volume, 700 PSI Diaphragm Pump, allows you to clean each side curtain with a single pass. The ceiling can be done easily with the center mounted boomless nozzle. By simply inverting this same nozzle, you can make an additional pass to disinfect the floor. To complete the job, we have included a hand gun & 50 feet of hose on an auto rewind hose for washing down tight corners, fans & even feed tanks. You will also find this attachment handy in cleaning other farm equipment & maybe even spraying insect control on cattle.

CAUTION: Chemicals can be dangerous. Always follow instructions on the chemical container label. Improper selection or use of chemicals can cause serious injury to humans and the environment. Be Safe. Select the right chemical and handle it with care.

Standard Features Include:

- | | |
|---|---|
| 1) 500 Gallon Low Profile Polyethylene Tank | 6) Auto Rewind Hose Reel |
| 2) Udor Beta 150 Diaphragm Pump
700 PSI - 40 GPM | 7) Quick Fill Attachment |
| 3) Four Stainless Steel Side Mounted Tips | 8) Heavy Duty Trailer w/5 Year
Structural Warranty |
| 4) Center Mounted Swivel Spray Nozzle | 9) New 11L-15 Rib Implement Tires |
| 5) High Pressure Hand Gun, 50 Feet Hoses | 10) Fully Assembled and Factory Tested |

BETA-150/CC

High Pressure Diaphragm Pump

BETA-150/CC high pressure, high volume diaphragm pumps are excellent for various horticultural and agricultural spraying applications. Simplicity of design and common parts allow easy and affordable maintenance. Control valve, pulsation dampener and pressure gauge are standard.

The BETA-150/CC is constructed of aluminum, brass and stainless steel with brass and stainless steel liquid handling parts.

For industrial uses and spraying applications not listed, please consult UDOR U.S.A. For all PTO drive app. safety shield part # 1219.02 is recommended.

Splined Q-2 bushing for pulley drive is available upon request. For thru shaft protection part # 1219.15 is recommended.

OMEGA-140/CC

High Pressure Diaphragm Pump

OMEGA-140/CC 3-cylinder high pressure, high volume diaphragm pumps are excellent for various horticultural and agricultural spraying applications. Simplicity of design and common parts allow easy and affordable maintenance. Control valve, pulsation dampener and pressure gauge are standard.

The OMEGA-140/CC is constructed of plasticized aluminum, brass and stainless steel with plasticized aluminum, brass and stainless steel liquid handling parts.

For industrial uses and spraying applications not listed, please consult UDOR U.S.A. For all PTO drive applications safety shield part #1219.02 is recommended.

Splined Q-2 bushing for pulley drive is available upon request. For thru shaft protection part #1219.15 is recommended.

* Parts Included in Repair Kit - #8701.03. ** Parts for 6005.14 Control Unit Only.

OPERATING INSTRUCTIONS

1. Before operating or re-operating pump, lift R.V. Handle (Ref. #1266) so pump will start at zero pressure. FAILURE TO DO SO WILL VOID PUMP WARRANTY.
2. Turn Pressure Adjustment Knob (Ref. #2375) counter-clockwise to relieve spring tension. (Step 2 is only necessary on initial start-up and is not necessary for daily operation.)
3. Start unit and let run until air is evacuated from system, when only liquid is expelled from the bypass line.
4. Return R.V. Handle (Ref. #1266) to down position. Open spray gun or spray boom and turn adjustment knob (Ref. #2375) clockwise until desired operating pressure is achieved.

PROTECT PUMP FROM FREEZING.

If freezing conditions exist, flush pump with a 50/50 mixture of antifreeze and water.

7.901.103 (Turbine) & 13.901.151 (Long Range)

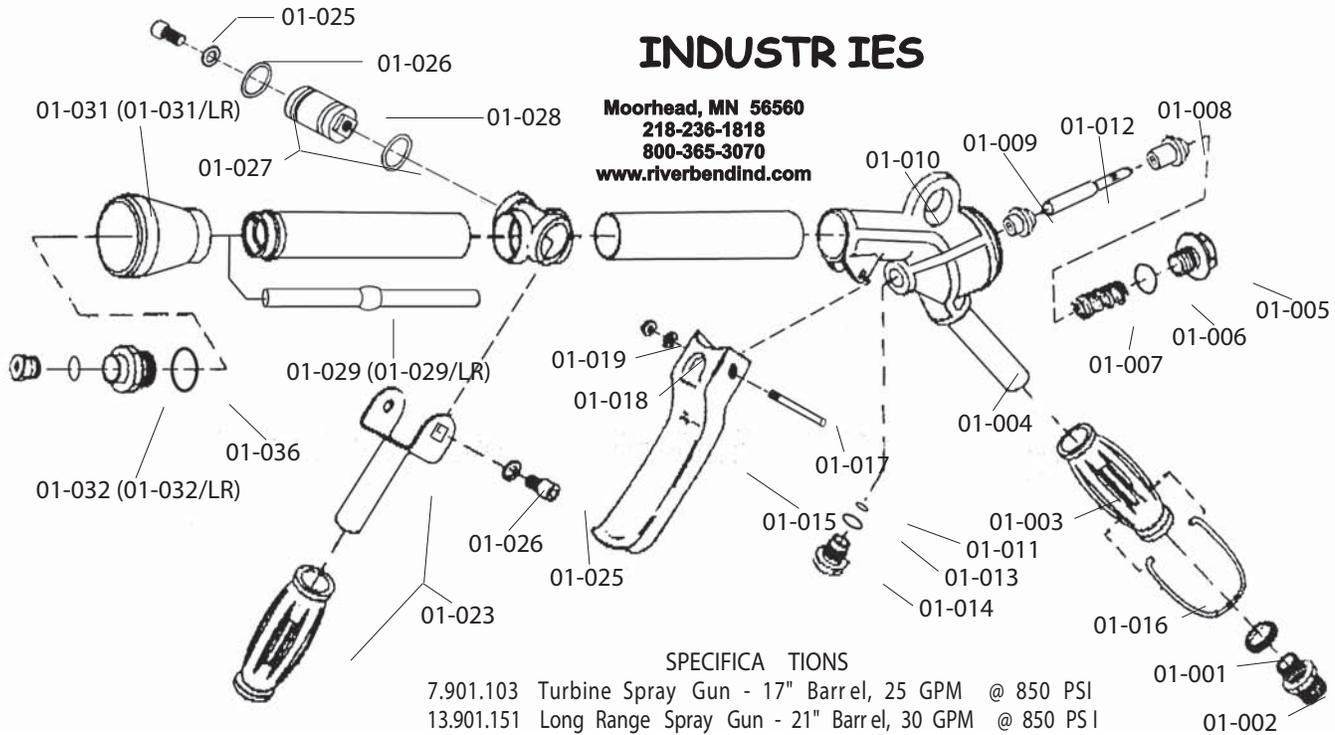

High Performance Adjustable Spray Gun

UDOR High Performance Spray Guns have a spray pattern that is adjustable from a concentrated 0° straight stream to a 60° fine mist cone.

They are an excellent choice for a wide variety of applications including tree & shrub spraying, pest control, fire fighting, air craft de-icing and equipment cleaning.
