This is a great opportunity to own an existing Home Care business that is truly poised for growth and success in both the short and long term. This established franchise is a part of one of the nation's premiere in-home care provider networks. The business consists of a large exclusive territory with further room to grow into other adjacent markets.

They pride themselves in training Caregivers to act as more than just assistants. They create personalized care plans designed to suit each client's specific needs. For the clients, they embody everything the franchise stands for: trusted expertise, reliable care and a culture that prioritizes complete peace of mind. Their primary goal is to bring more enjoyment to the lives of those who find it increasingly difficult to function well on their own.

The high growth in-home personal care industry has proven its pandemic proof nature. More than ever, families need assistance in keeping vulnerable seniors safe. Demand for in-home personal care and living assistance continues to expand from the 79 million US baby boomers, the oldest of whom turn 75 this year. Most are steadfast in their intention to age in place. In addition, families are relocating their elderly loved ones back home from group settings to minimize risk of infectious diseases like Covid 19.
