INTEGRATION HAS MANY BENEFITS

SERVICE EXCELLENCE

The Westwood Lumber Company was founded in 2017 and our professional team is so proud of our earned reputation of being knowledgeable, reliable, and environmentally conscious. We have built a talent roster who are knowledgeable wood experts producing quality live edge and dimensional lumber. Also, we offer customized sawmill services for commercial customers who require specific sizes.

Our integrated process begins with our own trees, next they are milled at our state-of-the-art sawmill and kiln dried through our High-Tech Radio Frequency Vacuum Kiln to provide furniture-grade lumber that can be used for so many applications.

If you have an inventory of logs, our production facility is available to repurpose the wood for so many applications. Our total commitment is to always to do it RIGHT.

LICENSED AND FULLY INSURED

QUALITY & EFFICIENCY WITH AN ENVIRONMENTAL FOCUS

URBAN WOOD IS A TREASURE

Situations occur where property owners decide specific trees need removal for safety, aesthetics or development reasons. The majority of this wood is useable and deserves a new life in various applications. Unique shapes, grains and sizes can make it attractive for designers, artisans, furniture and cabinet makers, construction firms, lumber resellers and others.

Westwood Tree Services maintains a large variety of:

Walnut - Maple - Ash - Oak – Hemlock and more...

BEFORE

AFTER

CLIENT BENEFITS:

- Custom cuts by our oversized State-Of-The-Art SAWMILL which can accommodate logs up to 84 inch width.
- Reduced drying times (1/10th) with our High-Tech Radio Frequency Vacuum Kiln.
- High-quality finished wood with a reduction in wood defects, warping, cracking or splitting.
- Urban wood can have a marbling curl effect which adds a stylish touch or appeal to residential and commercial environments.
