Because it is made of strands of fibre, certain Timber is incredibly durable and strong. It can withstand a lot of pressure, so it is perfect for walking over, sitting on, for holding the weight of plants and trees, or to make structures out of and for holding the weight of the roof of that structure.

Garden Timbers adds structure, character and texture to your garden or outside space. It allow you to create an area where you can sit, relax and enjoy your garden.
