Using Primed wood has its own benefits for the product itself and you.

Benefits for Using Primed Profiled Wood:

- ▶ Provides additional protection to the wood.
- ▶ Improves the appearance for the final coating.
- ▶ Prevents peeling, cracks and fading of the paint.
- ▶ Seals the original wood so that paint doesn't soak into it.
- ▶ Helps to hide joints or seams
- ▶ Ensure better adhesion, primers physically and chemically bond the paint to the surface.
- ▶ Increases wood durability.
- ▶ Often works out cheaper.
- ▶ It covers imperfections like repairs in the wood.
- ▶ Helps block out stains and odours.
