Cedar is a versatile and durable softwood that grows in the North America. Although there are many different types of cedar trees, the one we used for our lumber are Western Red Cedar and Alaskan Yellow Cedar.

Western Red Cedar is one of the least dense wood types, which is why it's been historically used to make canoes and boats.

We produced some of these following product:

**Finger Jointed/Laminated Double Primed:**

- ▶ Fascia/Weatherboards
- ▶ Cladding/Sidings:
  - Tongue & Groove
  - Bevel
  - Shiplap

**Solid Products:**

- ▶ Bevel Siding
- ▶ Shiplap
- ▶ Rhombus/Parallelo
- ▶ Tongue & Groove
- ▶ 4 Sides Tongue & Groove
- ▶ Sauna Components
- ▶ Hot Tub Components
- ▶ Decking
- ▶ S4S

**BENEFITS OF USING CEDAR:**

- ▶ Have the ability to absorb noise.
- ▶ Insect repellent.
- ▶ Environmentally Friendly
- ▶ Durable
- ▶ Versatile
- ▶ Attractive
