## Levels of Consciousness: Organisations

As we start to realise all is not as it seems in this third dimensional projected reality, we are beginning to see some professions being called into question for supporting or providing information of questionable authenticity, such as the political, medical and educational establishments. We thought it would be interesting to understand what the average levels of consciousness in these organisations are so you can understand why the information they support seems to be losing its relevance in a society that is growing in consciousness.

### We Gravitate Towards Organisations with a Similar Level of Consciousness

This difference in level of consciousness between people and organisations may also explain why some organisations have become increasingly meaningless to you and yet still hold fascination or esteem with your family or friends. Just as we gravitate towards different types of music or different films, we have found that we tend to lose interest when there is a big gap between our levels of consciousness and that of the music, film or organisation. We publish the levels of consciousness for a range of films in our services starting [Levels of Consciousness Films 2000 - 2022](#) and also of various different types of music in [Levels of Consciousness: Music](#). Those who are starting to question the information and systems of various organisations are typically those who have significantly higher levels of consciousness than these organisations. They are starting to operate from an all-knowing soul perspective where are beginning to be able to see beyond the third dimensional projection. If you are curious to know what your own level of consciousness is we test this in our service [Know Your Own Level of Consciousness](#).

### Low Level Consciousness Organisations Operate from the Limiting Ego

However, there are still many organisations; particularly the medical establishment, with low levels of consciousness because they continue to operate from the limited 3 dimensional, ego perspective and you can see this in the information delivery. We have heard doctors say many times 'if you don't take/do this then...' which is the use of fear to coerce you into taking this drug/treatment'. *Please note: We are describing the system and NOT the individual. There are many doctors within the medical establishment who, often to their peril, have questioned the system and the basis for its information, who are clearly of a much higher consciousness than the average in their industry.*

### **Levels of Consciousness for Various Organisations**

So with this in mind, we have tested the average levels of consciousness of the organisations - not the individual members - for a range of different organisations. The list is not meant to be comprehensive but to show you the variation that still exists in certain sectors.

### **Emergency Room: Dedicated to Saving Consciousness**

What we found interesting is the high levels of consciousness of the Emergency Room, where staff are dedicated to saving lives and enabling people to retain their consciousness. This is in complete contrast to standard medical doctors whose training means that they are dedicated to providing drugs that alleviate symptoms but which over the long term cause more illness or even death.

### **Military: Dedicated to Serving We the People**

Also of note is the huge difference between the levels of consciousness of the military who are dedicated to upholding the constitution and serving we the people, and the police whose training and direction has seen their roles change to become enforcement agents for the government and suppression of free speech and no longer serving we the people.

### **Gold & Silver Investments: From the Ego**

We were also interested to see that there is no difference in the levels of consciousness between standard investments and gold/silver investments that have recently been marketed as the new spiritual currency by some Spiritual/Truth providers. We believe this scores low because investing is not of benefit to the collective, but to the individual, and an investment is a decision motivated by the ego 'I need' rather than the soul 'We need'. In our opinion, the new spiritual currency is love as this is a currency that benefits the whole of society and enables everyone to thrive.

### **Renewal Energy: In Alignment with the New Earth**

We also loved to see the truly high consciousness score of Renewal Energy which indicates is a source of potential energy that is closely in alignment with the current global levels of consciousness, until free energy technology has been released for all to use.

### **Organisations at Zero or Low Scoring: Will Dissolve or Reform**

All organisations that have scored a zero or with low scores will simply fade away as no longer being relevant to the new higher global levels of consciousness or instead they will go through a realignment of their systems until new ones can be put into place that are of higher consciousness.
