RE: Pocock Design Solutions, Inc. (PDS, Inc.)

Subject: Letter of Recommendation

To Whom It May Concern:

Pro-Craft Construction, Inc. has enjoyed working with Tim Pocock for more than 10 years in the K-12 market on both new construction and modernizations. Our Company has always appreciated the level of detail, accuracy and completeness of each set of drawings produced by Tim.

Currently we are working with PDS, Inc. on several projects in the Long Beach Unified School District. Tim's values and commitment to detail reflect in the project's delivered by PDS, Inc. Their designs are complete, well thought out and consideration has been taken for all disciplines such as Architectural, Structural, end user serviceability and lifespan. Submittals, RFI's and course of construction issues are handled timely and thoroughly. The level of service, quality of documents and professionalism continue today.

PDS, Inc. is current with today's technology and uses Revit MEP and BIM tools. They have demonstrated great relationships with manufacture reps and are current on code update's.

Based on my years of experience in the plumbing trade, I would highly recommend PDS, Inc. to Architects, Contractors and Owners, and look forward to partnering on more projects in the future.

Respectfully,

Timothy McFayden
CEO/SEC
