**SEA POINT GENERAL
TRADING L.L.C**

THE PROFILES YOU CAN COUNT ON

Architectural Structural Finish Products

ABOUT SEA POINT GENERAL TRADING L.L.C

We, **Sea Point General Trading L.L.C** are pleased to introduce ourselves as a trading firm expert & specialist in the field of civil construction supply of custom made material as per project specifications and within budget. Serving diversified service sectors for the last four years. We are involved in trading & supply of Civil Construction Materials, Mechanical, Electrical & Plumbing products, and Architectural Structural Finish Products. We assure you our competitive prices, prompt delivery and best services for your project specified and custom made materials' inquiries. We look forward to serve your esteemed organization on a long-term basis as a local, friendly reliable supplier. We are certified with ISO 9001:2015

MISSION

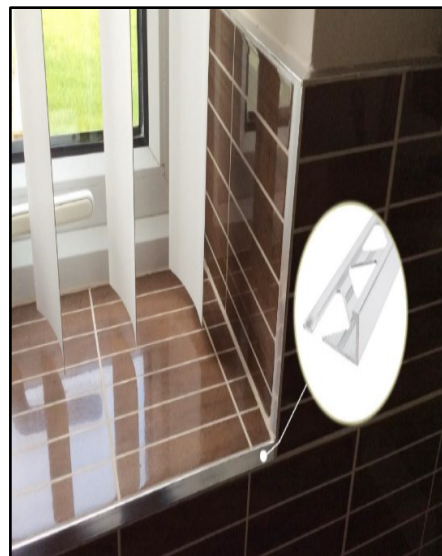

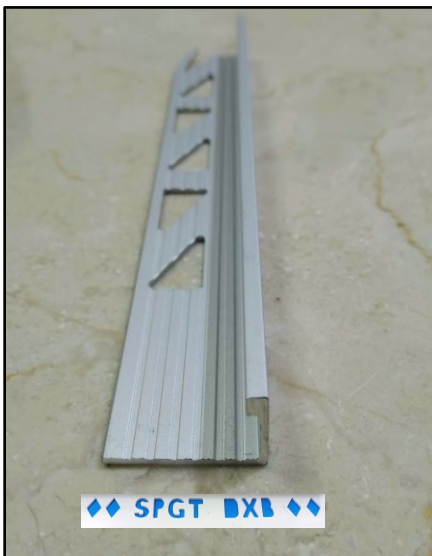

Our mission is to become a name synonymous with perfection, quality and excellence, by serving the needs of our customer with utmost care, commitment, honesty, and integrity. We aim to become a leader in the field of civil construction materials by constantly improving our focus on specialization and customization of the world's best products for our valuable clients. Analyze the needs of our customers and provide customized, individually tailored solutions in the form of products and services. Deliver quality and service of the highest order to our customers and provide them with complete satisfaction. Our core values are:

- Honesty
- Integrity
- Diligence
- Innovation
- High quality

VISION

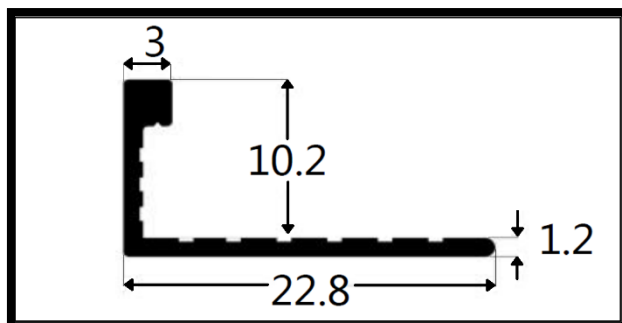

Our vision is to become a name synonymous with excellence and to stand at the forefront of innovation and customer satisfaction. Being admired for our business values and ethics in providing complete solutions of procurement as per the customer's specifications. To become a leading one stop solution in the field of entire customization and procurement of Civil construction materials, Architectural Structural Finish products, and Mechanical, Electrical and Plumbing products by providing/supplying highest quality products to our customers.

ALUMINIUM TILE TRIM L SHAPE

Product Code: SPGT-DXB-AL-L-10.2-MS/PS		Grade: ALUMINIUM 6063 5T
Type : L Shape		Sightline Thickness : 3 mm
Length : 270 cm	Dimension : Height 10.2 mm	
Finish	Matt Silver, Polish Silver, Brush Silver, Matt Bronze, Gold, Black, Powder coating in any RAL color, All other colors refer our Color chart.	
Application Usage	<ul style="list-style-type: none">Aluminium L Shape Tile Trim is ideal for a clean separation of different surfaces & suitable to use for floor & wall tiles horizontally and verticallyA perforated anchoring leg highlights fixing glue or mortar bond beneath the tiled surfaceIt is designed to give a 90 degree straight edge appearance with sightline thickness of 3mmHides and protects exposed raw edges of tiles & prevents chipping	
Features	<ul style="list-style-type: none">Framing of decorative elements, nice straightnessHigh corrosion, weather & wear resistance. Reduces collisionsEnvironment friendly, attractive and elegant looking	
Available Sizes	Height: 10.2mm Other sizes can be customized as per requirement

Substrate: wood, vinyl, laminate flooring, ceramic **Installation:** Adhesive fixing

Type : Aluminium Stair nosing with Photoluminescent strip

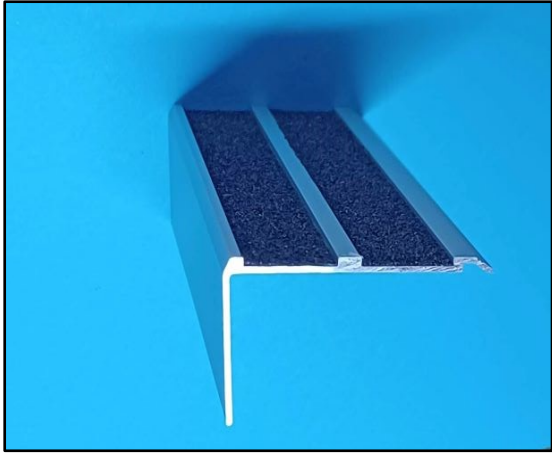

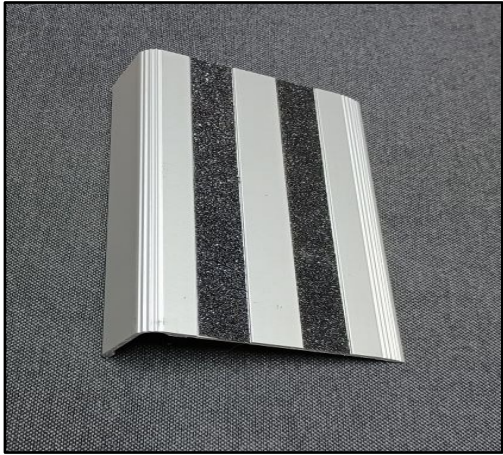

Substrate: ceramic, marble, wood, vinyl & concrete. **Installation:** Mechanical & Adhesive fixing

ALUMINIUM STAIR NOSING RANGE

Type : Aluminium Stair nosing edge with wide thin Carborundum Tape

Substrate: Concrete, Ceramic Tiles, Marble, Granite. **Installation:** Mechanical & Adhesive fixing

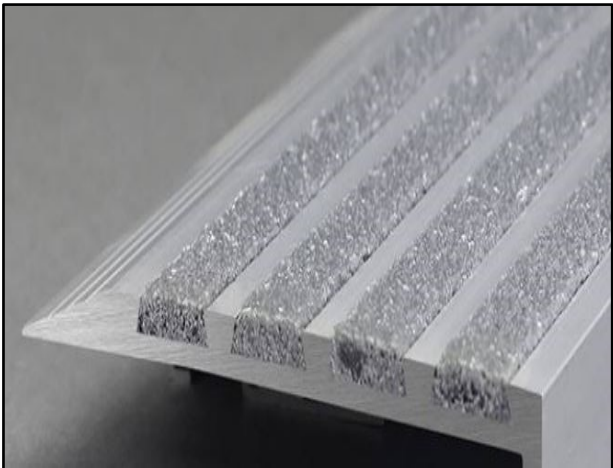

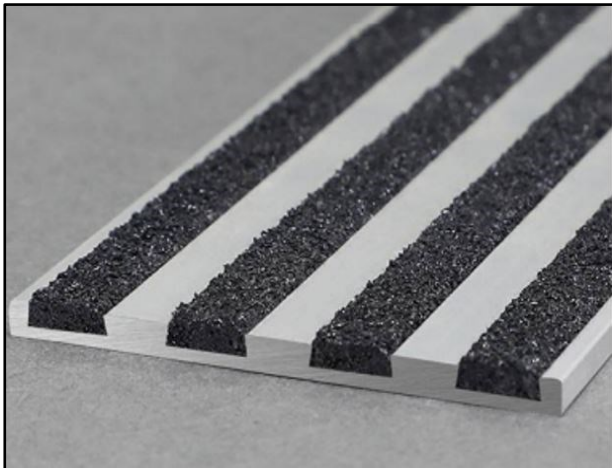

Type : Aluminium Stair nosing Flat Straight with wide thin Carborundum Tape

Substrate: Concrete surfaces, Granite Marble. **Installation:** Mechanical & Adhesive fixing

Type : Aluminium Stair nosing Flat Straight with narrow thick Carborundum Tape

Substrate: Concrete surfaces, Granite Marble. **Installation:** Adhesive fixing

ALUMINIUM STAIR NOSING RANGE

Type : Aluminium Stair nosing Push-in Round Bull nose

Substrate: Laminate and parquet floors. **Installation:** Adhesive fixing

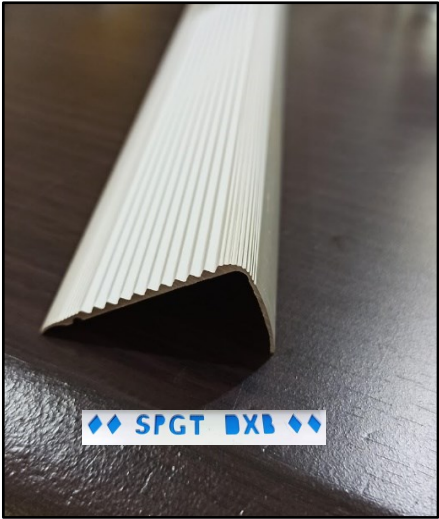

Type : Aluminium Tile-in Stair nosing

Substrate: ceramic, marble, natural stones. **Installation:** Adhesive fixing

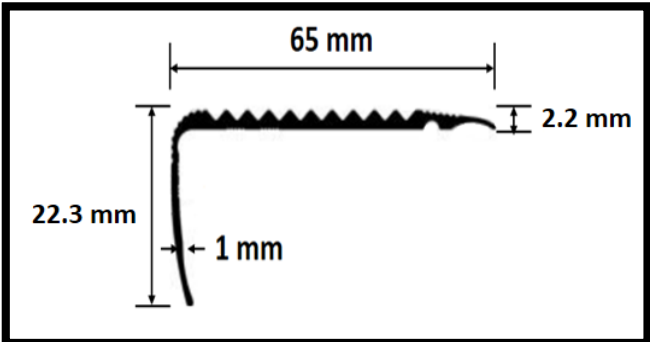

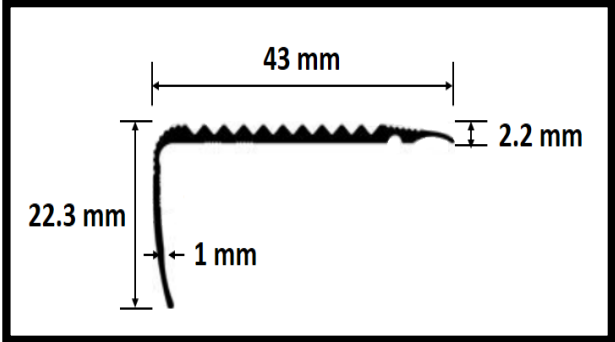

ALUMINIUM STAIR NOSING RETROFIT TRADITIONAL

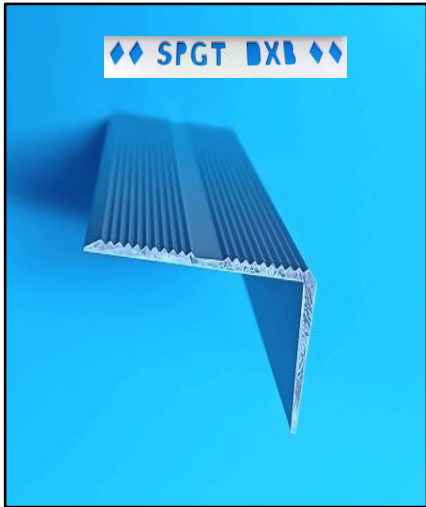

Product Code: SPGT-DXB-AL-SN-22.3X43-MS/PS SPGT-DXB-AL-SN-22.3X65-MS/PS		Grade: ALUMINIUM 6063 5T
Type : Retrofit Traditional		Finish : Matt Silver, Polish Silver
Length : 270 cm & 250 cm	H 22.3 mm X 43 mm & 22.3 mm X 65 mm	Thickness : 2.2 mm
Application Usage	<ul style="list-style-type: none">• This Aluminium Stair Nosing built in grooved tread makes the impact of anti slip and anti skidding also provides extra excellent gripping.• This Aluminium Stair Nosing profiles used at the heel and toe corners of Stair steps because of their inherent smoothness and glossy finish tend to be slippery.• Suitable for use on commercial & domestic wide-ranging of substrates for instance wood, vinyl, laminate flooring, ceramic & thin carpet• No need of mechanical fixing on ceramic, laminate wood flooring or vinyl Provides elegant looking to the corners of steps in ceramic, marble• Prevents & protects stairs from scratches and general wear• <u>Adhesive fixing</u>: bonded with adhesive or self adhesive strip.	
Features	<ul style="list-style-type: none">• Attractive and elegant looking, High Corrosion Resistance• High weather & wear resistance, Framing of decorative elements• Environment friendly, Reduces collision

ALUMINIUM VERTICAL JOINT STRIP

Product Code: SPGT-DXB- YT-AL-ST-14X5 BMA SPGT-DXB-SJ-AL-FDS-20X5/MA		Grade: ALUMINIUM 6063 5T
Type : Vertical Joint/Floor divider Strip		Finish : Anodized Matt Silver, Black matt, Titanium Matt, Bronze
Length : 250cm, 300cm	Dimension : 14 mm X 5 mm, 20 mm X 5 mm	Thickness : 3mm, 5 mm
Application Usage	<ul style="list-style-type: none"> Floor divider strip in Aluminium Mill finish, Anodized, powder coated in any RAL color makes it elegant impression for create decorative pattern purpose It can be use in different applications such as Terrazzo, Ceramic, Marble & wood floor dividing between two different tiles with same height. Utmost epoxy terrazzo floor will use Aluminum divider strips, It has many reason using aluminum strips it's inexpensive, is a good source of recycled content if LEED points are applicable to your project, and is easy to use on a project to form patterns. It play an significant role in preventing the cracking of the terrazzo topping 	
Features	<ul style="list-style-type: none"> Attractive and elegant, High Corrosion resistance Environment friendly, reduces collision 	
Available Sizes	Other sizes Can be customized as required	

PROFILE DRAWING

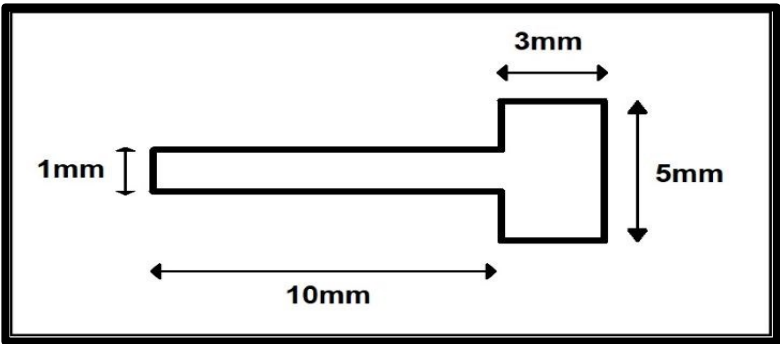

ALUMINIUM FLOOR DIVIDER STRIP

Product Code: SPGT-DXB-AL-FD-5X3X10-MT		Grade: ALUMINIUM 6063 5T
Type : Floor divider T Shape Trim		Finish : Mill finish, Anodized Matt titanium
Length : 250cm, 300cm	Dimension : 5mm X 3mm X10mm	Thickness : 3mm
Application Usage	<ul style="list-style-type: none">• Floor divider Trim in Aluminium is design to a joint to separate and decorate level Marble floors positioned with bonded or mortar floors in Mill finish, Anodized Matt silver when used between floors of same heights and types.• Floor divider Trim has a top head width of 5mm thickness permits perfect smoothing and sanding, The vertical arrowhead portion permits tremendous anchorage with the adhesive.• Floor divider Trim Also can be used for decorative purpose & to join different or similar floor materials between & flooring, tiles to tiles, and wooden to marble, ceramic, palladiana & terrazzo .Designed to endure heavy traffic.	
Features	<ul style="list-style-type: none">• Attractive and elegant, High Corrosion resistance• High weather & wear resistance, Environment friendly, reduces collision	
Available Sizes	<ul style="list-style-type: none">• We can customize specific size as per your requirement

STAINLESS STEEL TILE TRIM L SHAPE

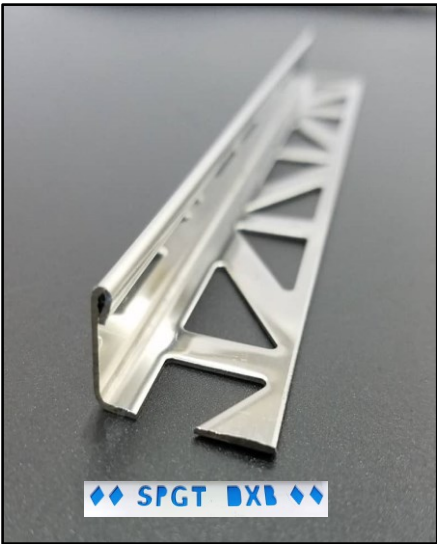

Product Code: SPGT-DXB-JA-SS-L-12-GS/RGS/BS		Grade: 304 & 316
Type : L Shape		Finish : Gold Shiny, Rose Gold Shiny, Black Shiny with PVD Coating
Length : 244cm, 270cm	Dimension : Height : 12 mm	Top Thickness : 3 mm
Application Usage	<ul style="list-style-type: none">Stainless Steel L Shape Tile Trim is designed to create seamless joints, finish and protect tile exposed raw edges on floor and wall surfacesIt is ideal & suitable for creating floor transitions between tile and another surface of the same height such as carpet or woodIt is designed with a moveable transition arm that is adjustable to reach the height of adjacent floor coveringsIt features an integrated joint spacer that creates a defined joint cavity between the tile and profile	
Features	<ul style="list-style-type: none">PVD Coating doesn't get tarnished or discolored. It is hard & has high corrosion resistance. Environment friendlySS Grade 304 has great mechanical strength and is highly durableHigher resistance to corrosion, abrasion, chemicals & water vapor	
Available Sizes	Height: 8mm,10mm, 12mm

Available Sizes	12mm X 12mm Other sizes can be customized as per requirement	

PROFILE DRAWING

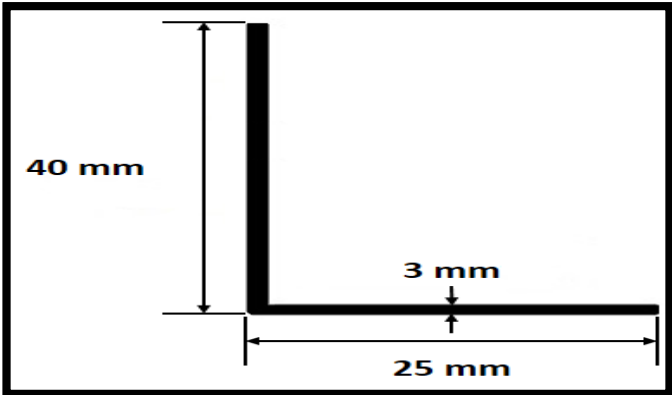

STAINLESS STEEL L ANGLE

Product Code: HD-SS-FD-40X25-LMC-BN		Grade: 316
Type : L Angle/Floor Divider		Finish : LMC-Black Nickel
Length : 244cm	Dimension : H 40 mm X W 25 mm	Thickness : 3 mm
Application Usage	<ul style="list-style-type: none">• Stainless Steel angle profile designed to give elegant metal line between tile to tile floor or tile to carpet, between carpet & parquet, ceramic & flooring, laminates to marble• Prevents & protects tile edges from chipping.• Framing of decorative elements.• Hide and protect the exposed raw edges of tiles	
Features	<ul style="list-style-type: none">• It will not rust or develop a patina, prevents oxidation• It behaves well when exposed to tensile stresses• Greater mechanical strength• Higher resistance to abrasion and force dents & water vapor• Higher corrosion & chemical resistance, highly durable	
Available Sizes	Other sizes can be customized and PVD coating, Electroplating, Liquid metal coating as required	

PROFILE DRAWING

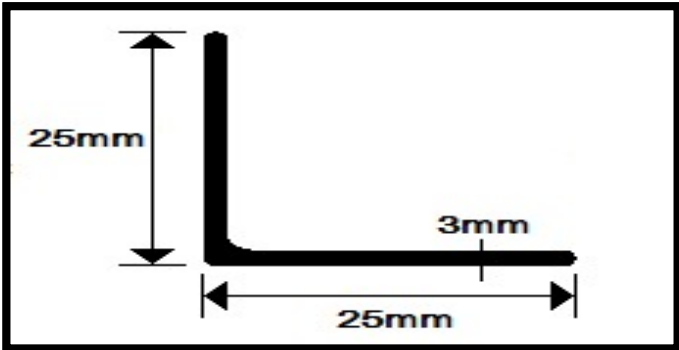

STAINLESS STEEL EQUAL ANGLE

Product Code: SPGT-DXB-HD-SSEA-25X25-BR		Grade: 304
Type : Equal angle		Finish : Brush, Mirror
Length : 300 cm	Dimension : H 25 mm X W 25 mm	Thickness : 3 mm
Application Usage	<ul style="list-style-type: none">• SS Equal angle profile designed to give elegant metal line between tile to tile floor or tile to carpet, between carpet & parquet, ceramic & flooring, laminates to marble• Grade 304 - Suitable to use in chemical, food processing & hospital environment with strict hygiene requirements• Prevents & protects tile edges from chipping	
Features	<ul style="list-style-type: none">• It will not rust or develop a patina, prevents oxidation• It behaves well when exposed to tensile stresses• Greater mechanical strength• Higher resistance to abrasion and force dents & water vapor• Higher corrosion & chemical resistance, highly durable	
Available Sizes	Other sizes can be customized and PVD coating, Electroplating, Liquid metal coating as required	

PROFILE DRAWING

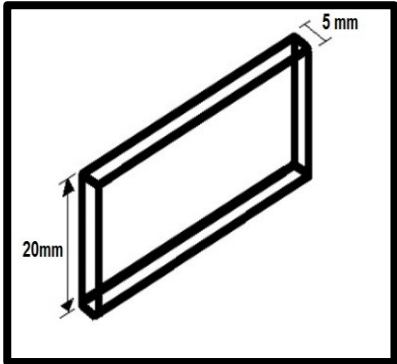

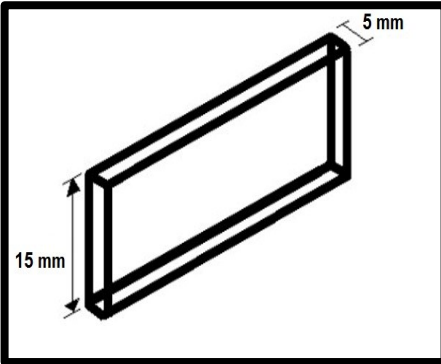

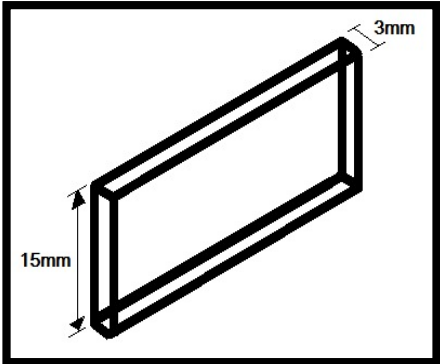

STAINLESS STEEL VERTICAL JOINT STRIP

Product Code: SPGT-DXB-SSFD-15,20-BR/MR		Grade: 304,316
Type : Vertical Joint strip		Finish : Brush, Mirror
Length : 300 cm	Dimension : Height 15 mm, 20mm	Thickness : 3 mm,5mm
Application Usage	<ul style="list-style-type: none">• Stainless Steel strip makes it elegant impression for decorative purpose• It can be use in different applications such as floor dividing between two different tiles with same height.• It can be use in mat wells, walls area between two different section• Framing of decorative elements.• Grade 316 - Suitable to use in swimming pools, shower trays & water exposed areas with strict hygiene requirements• Prevents & protects tile edges from chipping	
Features	<ul style="list-style-type: none">• Greater mechanical strength, highly durable• Higher resistance to abrasion and force dents• Higher corrosion & chemical resistance	
Available Sizes	Other sizes can be customized and PVD coating, Electroplating, Liquid metal coating as required

STAINLESS STEEL VERTICAL JOINT STRIP

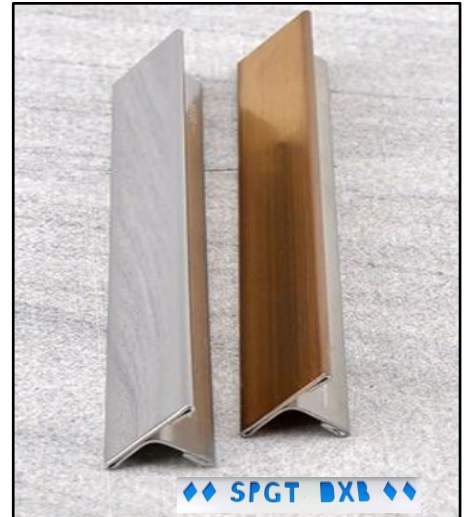

Product Code: SPGT-DXB-HD-SSVJS-25-10/20-3/25-5/10-5/BR		Grade: 304
Type : Vertical Joint/Floor Divider Strip		Finish : Brush
Length : 300 cm	Dimension : 10 mm X 5 mm, 25 mm X 3 mm, 20 mm X 3 mm, 25 mm X 10 mm	Thickness: 3mm,5mm,10mm
Application Usage	<ul style="list-style-type: none">• Stainless Steel strip makes it elegant impression for decorative purpose• It can be use in different applications such as floor dividing between two different tiles with same height.• It can be use in mat wells, walls area between two different section &• Grade 304 - Suitable to use in chemical, food processing & hospital environment with strict hygiene requirements• Framing of decorative elements.• Prevents & protects tile edges from chipping	
Features	<ul style="list-style-type: none">• Greater mechanical strength, highly durable• Higher resistance to abrasion and force dents• Higher corrosion & chemical resistance	

PROFILE DRAWING

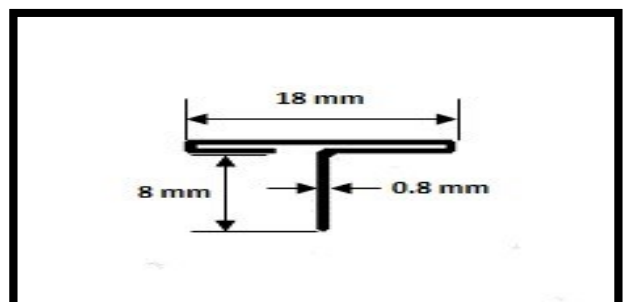

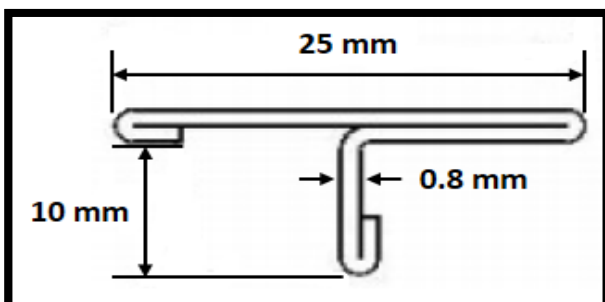

STAINLESS STEEL TRANSITION T STRIP

Product Code: SPGT-DXB-JA-SSTT-10X25, 8X18 -BR/MR/GS		Grade: 304, 316
Type : Transition T Trim		Finish : Mirror, Brush, Gold Shiny
Length : 244 cm	Dimension : 25mm X 10mm & 18mm X 8mm	Thickness : 0.8 mm
Application Usage	<ul style="list-style-type: none"> • T shape transition trim in Stainless steel with PVD coated features are designed for transitions between hard surface floor coverings that are the same-height. • It is designed to overlaps the edges of the floor coverings, protect tile edges and provide a smooth transition between tile coverings and floor coverings at lower elevations. • Designed with a moveable transition arm that is adjustable to reach the height of adjacent floor coverings. • Creates smooth transitions to eliminate trip hazards. • Features an integrated joint spacer that creates a defined joint cavity between the tile and profile. 	
Features	<ul style="list-style-type: none"> • Greater mechanical strength, highly durable • Higher resistance to abrasion and force dents • Higher corrosion & chemical resistance 	
Available Sizes	<ul style="list-style-type: none"> • 25mm X 10mm, 18mm X 8mm. We can customize specific size as per your requirement 	

PROFILE DRAWING

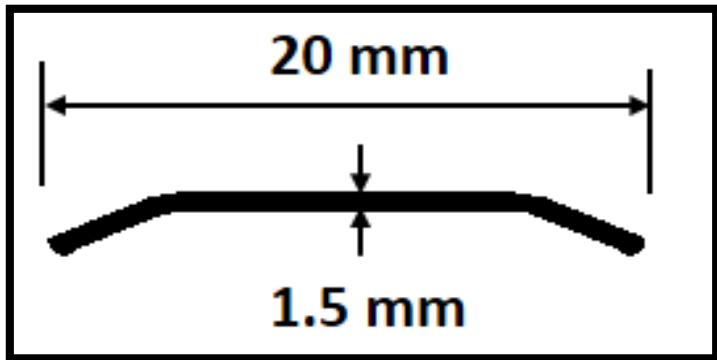

STAINLESS STEEL THRESHOLD STRIP

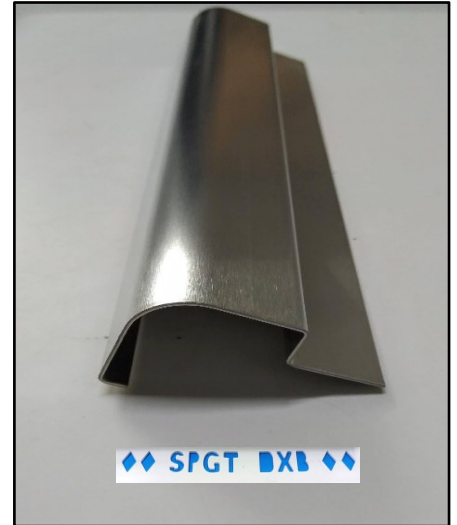

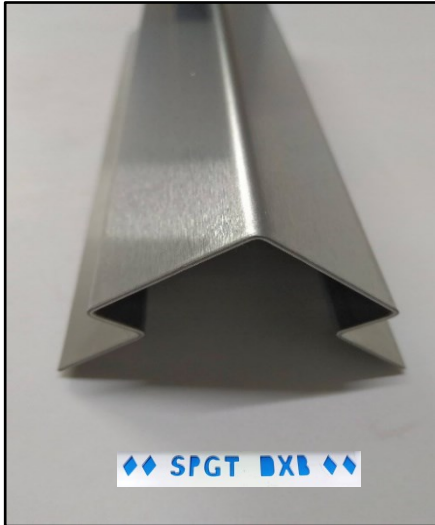

Product Code: SPGT-DXB-VN-SST-20-MR/BR		Grade: 304
Type : Threshold Transition		Finish : Mirror, Brush
Length : 300 cm	Dimension : 20 mm	Thickness : 1.5 mm
Application Usage	<ul style="list-style-type: none">• Stainless Steel Transition Threshold Strip used to join and recompense two floors of differing height, thickness & material.• It is suitable as a finishing terminal, it covers blemishes and chipping or rupture of tiles, carpeting & wood, Suitable to use for floor tiles• It hold two bevel edges• Grade 304 - Suitable to use in chemical, food processing & hospital environment areas with strict hygiene requirements• Hide and protect the exposed raw edges of tiles.	
Features	<ul style="list-style-type: none">• Greater mechanical strength, highly durable• Higher resistance to abrasion and force dents• Higher corrosion & chemical resistance	
Available Sizes	30mm,40mm	

PROFILE DRAWING

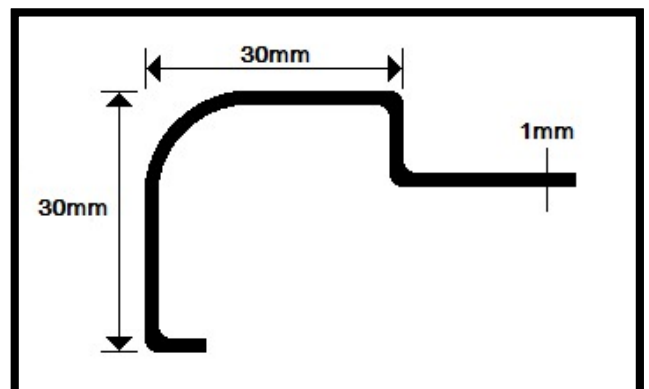

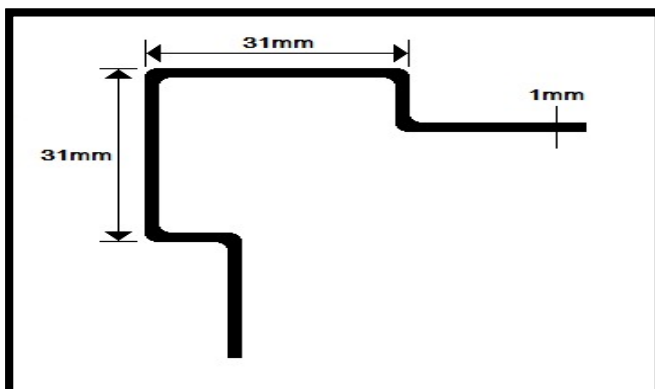

STAINLESS STEEL EXTERNAL PROFILE

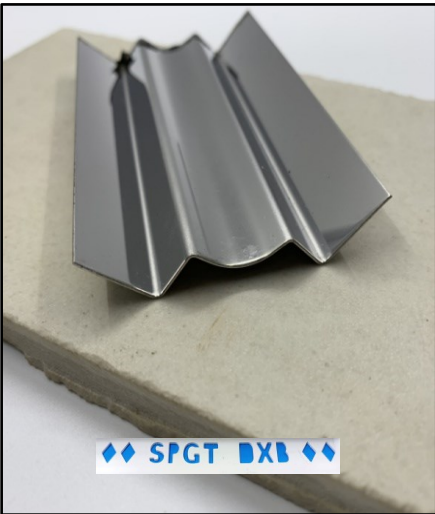

Product Code: SPGT-DXB-VN-SSEXT-30R/31S-MR/BR		Grade: 304
Type : External Corner square edge protector External Corner round edge protector		Finish : Brush, Mirror
Length : 300 cm	Dimension: 31 mm X 31 mm & 30 mm X 30 mm	Thickness : 1 mm
Application Usage	<ul style="list-style-type: none"> Stainless Steel External corner Profiles are designed to protects external corners of walls and columns against trolleys and general wear and tear It does maintain the same level of hardness and strength, ability to last longer even when exposed to harsh environments Grade 304 - Suitable to use in chemical, food processing & hospital environment with strict hygiene requirements Hide and protect the exposed raw edges of tiles. 	
Features	<ul style="list-style-type: none"> Greater mechanical strength, highly durable Higher resistance to abrasion and force dents Higher corrosion & chemical resistance 	

PROFILE DRAWING

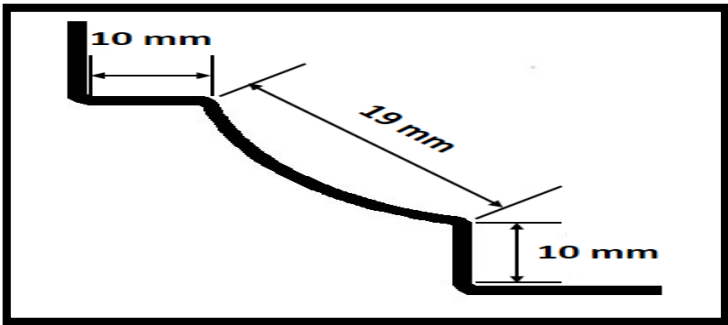

STAINLESS STEEL CONE SHAPE INTERNAL CORNERS

Product Code: SPGT-DXB-HM-SSCT-19-MR/BR		Grade: 304
Type : Internal corner Cone		Finish : Mirror, Brush
Length : 250 cm	Dimension: 10 mm X 19 mm X 10 mm	Thickness : 1 mm
Application Usage	<ul style="list-style-type: none">• The Stainless Steel corner profile cone in Grade 304 is designed & is fitted with tiles between internal walls and between wall and floor as an internal cove or skirting to prevent water exposed surface areas such as Kitchens & Bathrooms• It is a joining profile ideal to be used for decorative purposes as well as creating a hygienic corner preventing a dirt trap in kitchens & bathrooms• Grade 304 - Suitable to use in chemical, food processing & hospital environment with strict hygiene requirements• Hide and protect the exposed raw edges of tiles.	
Features	<ul style="list-style-type: none">• Greater mechanical strength, highly durable• Higher resistance to abrasion and force dents• Higher corrosion & chemical resistance	
Available Sizes	Height: 8mm, 10mm , 12mm,14mm	

PROFILE DRAWING

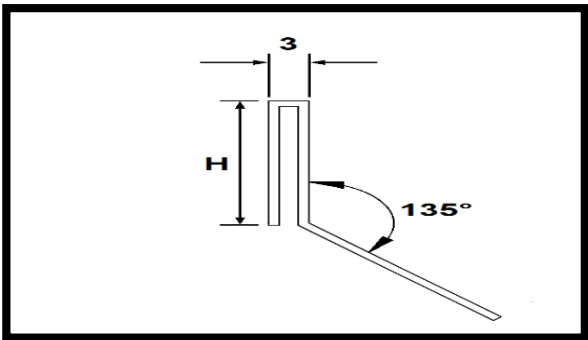

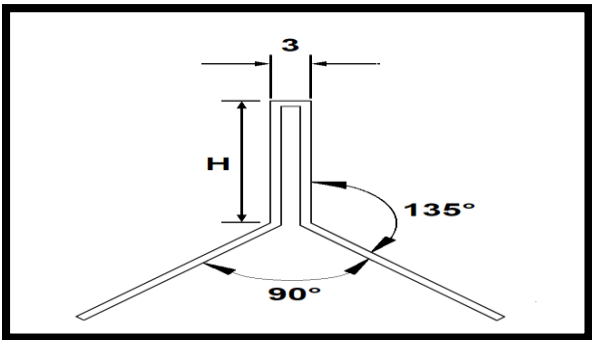

STAINLESS STEEL CORNER PROTECTION PROFILE

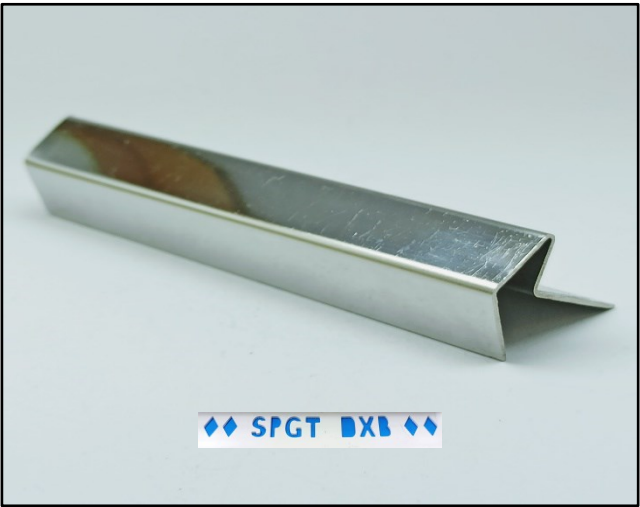

Product Code: SPGT-JA-SSCP-10/14.5/17/BR/MR		Grade: 304
Type : Corner Protection for Wall corners covers		Finish : Mirror, Brush
Length : 244 cm	Dimension: 10 mm X 3 mm	Top Thickness : 3 mm
Application Usage	<ul style="list-style-type: none">• Stainless steel 304 corner protection tile trim is designed with a 45° design to finish and protect exposed tile raw edges walls corner covers.• They are available in a variety of finishes. The exposed area of the profiles forms a smooth connection between tiles or stone edging.• The profiles, which are available in a wide range of finishes, allow for decorative design and create interesting optical contrasts.• In addition to an appealing look, the profiles allow for easy and thorough cleaning of surface.• (1st Profile) Its designed to attach to tile corner protection on both sides, while (2nd Profile) can be connected to two sides of wall corner edging.	
Features	<ul style="list-style-type: none">• Greater mechanical strength, highly durable• Higher resistance to abrasion and force dents• Higher corrosion & chemical resistance	
Available Sizes	Height : 10mm , 14.5mm, 17mm	

PROFILE DRAWING

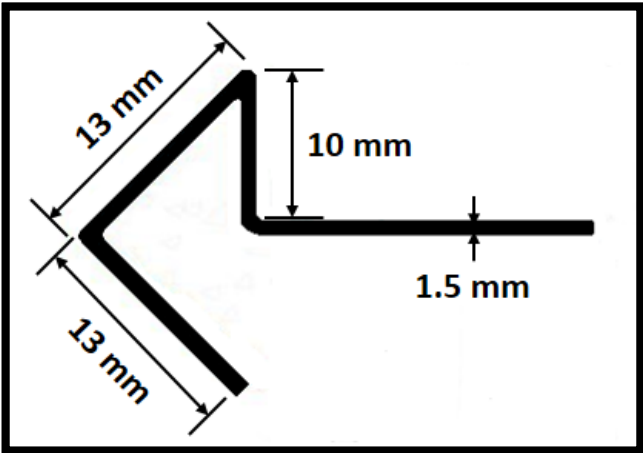

STAINLESS STEEL MULTIFUNCTIONAL TRIANGLE TRIM

Product Code: SPGT-DXB-HM-SS-MFTT-10X13-MR		Grade: 316
Type : Triangle Multifunctional		Finish: Mirror, Brush
Length : 260 cm	Dimension : 10 mm X 13 mm	Thickness : 1.5 mm
Application Usage	<ul style="list-style-type: none">• It is an triangle edge stainless steel trim profile in Grade 316 forming a rounded edge for the protection and neat finishing of tiled corners and edge• It is rust resistant, and makes this trim ideal for use in wet areas such as Kitchen counter tops, swimming pools, balconies and other areas where it is constantly exposed to moisture• Hide and protect the exposed raw edges of tiles.	
Features	<ul style="list-style-type: none">• Greater mechanical strength, highly durable• Higher resistance to abrasion and force dents• Higher corrosion & chemical resistance	
Available Sizes	Height: 10mm, 12mm, 14mm

COLOR CHART FOR STAINLESS STEEL PROFILES

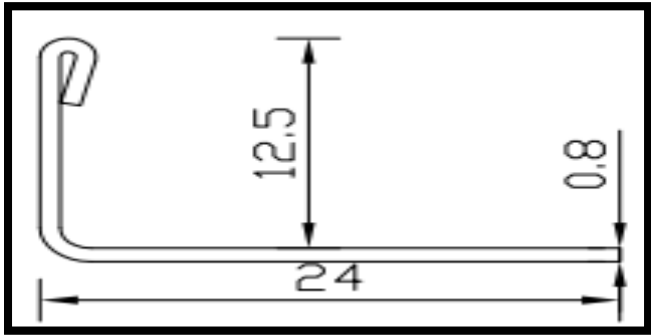

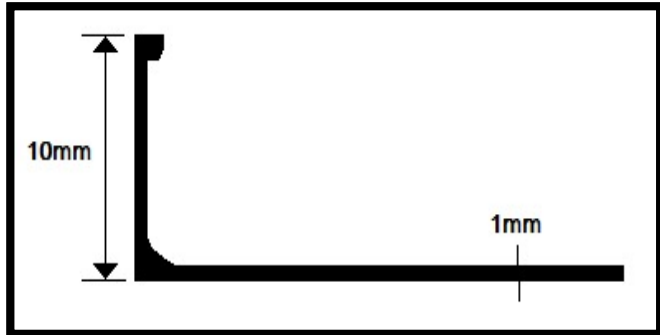

BRASS TILE TRIM L SHAPE

Product Code: SPGT-FS-BRSL-10-12.5 BG-BA		Grade: 62
Type : L Shape		Finish : Brush Antique, Brush gold, Brush dark gold
Length : 260 cm	Dimension : Height: 10 mm & 12.5 mm	Top Thickness : 2.5 mm, 3 mm
Application usage	<ul style="list-style-type: none"> • Brass Tile Trim in L shape is designed to finish and protect tile exposed raw edges on floors and walls • It is ideal & suitable for creating floor transitions between tile and another surface of the same height such as carpet or wood • A perforated anchoring leg highlights fixing glue or mortar bond beneath the tiled surface • Also can be used for decorative purpose & to join different or similar floor materials between carpet & parquet, ceramic & flooring, tiles to tiles, and laminates to marble • To sustain higher level of mechanical stress • Brass trim is considered to be more durable & more resilient to harsh installation environments • Brass trim is naturally more resistant to chemicals that are commonly used during the installation 	
Features	<ul style="list-style-type: none"> • Protects the edges of tiled surfaces • Protects and prevents tile edges from chipping • Higher resistance to abrasion and force dents • Higher corrosion and chemical resistance 	

PROFILE DRAWING

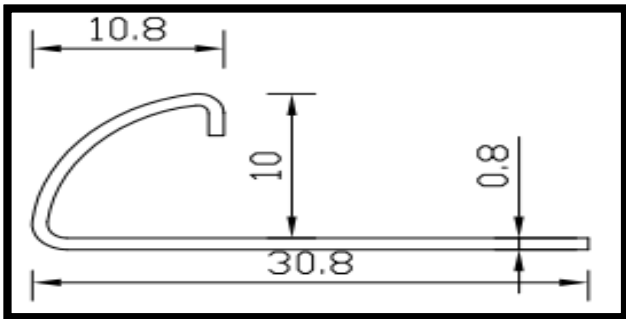

BRASS TILE TRIM ROUND SHAPE

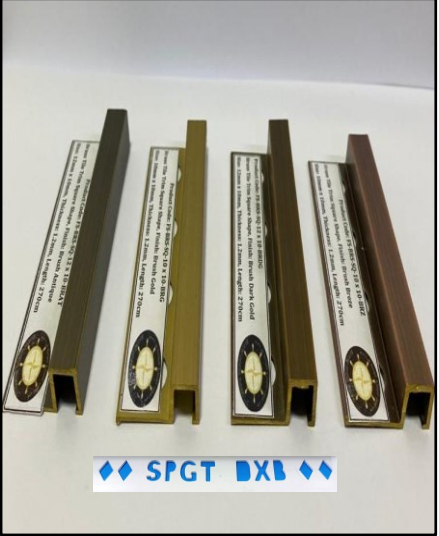

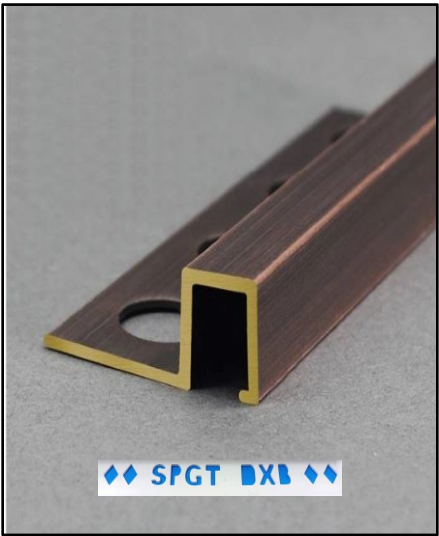

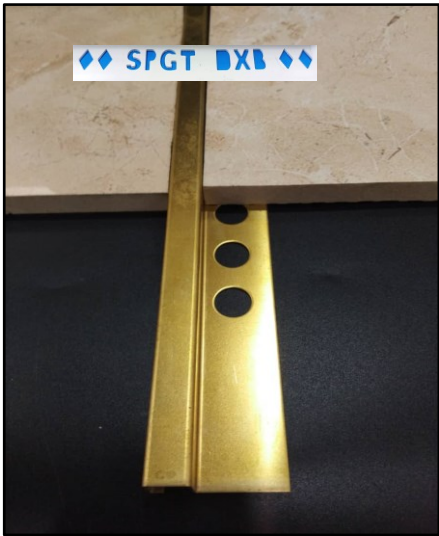

Product Code: SPGT-DXB-FS-BRSRD-10-BR		Grade: 62
Type : Round		Finish : Brush, Chrome, Antique
Length : 260 cm	Dimension : Height 10 mm	Thickness : 0.8 mm
Application usage	<ul style="list-style-type: none">• Brass Tile trim Round shape is naturally more resistant to chemicals that are commonly used during the installation• Suitable to use for floor tiles (horizontally) & wall tiles (vertically)• Also can be used for decorative purpose & to join different or similar floor materials between carpet & parquet, ceramic & flooring, tiles to tiles, or laminates to marble• Can sustain high level of mechanical stress• Brass trim is considered to be more durable & more resilient to harsh installation environments	
Features	<ul style="list-style-type: none">• A very tough edge protector, Protects the edges of tiled surfaces• Prevents tile edges from chipping,• Hides and protects the exposed raw edges of tiles• Higher resistance to abrasion and force dents• Higher corrosion and chemical resistance.	
Available Sizes	Height: 10mm,12mm	

PROFILE DRAWING

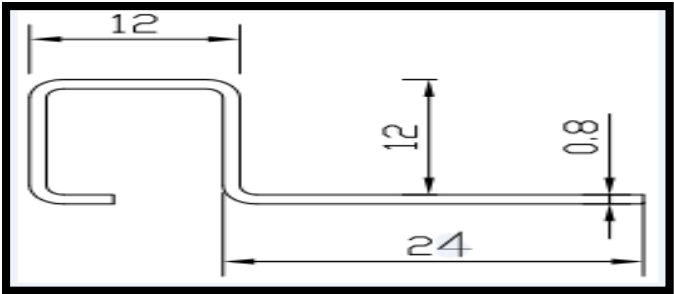

BRASS TILE TRIM SQUARE SHAPE

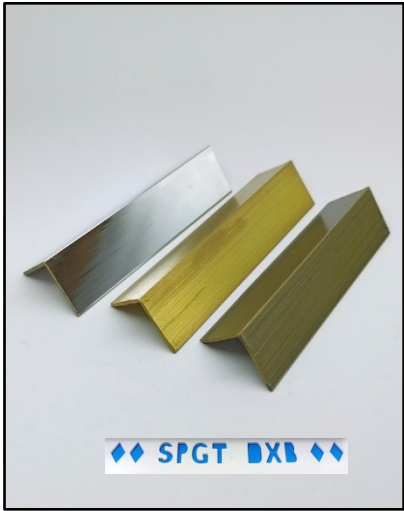

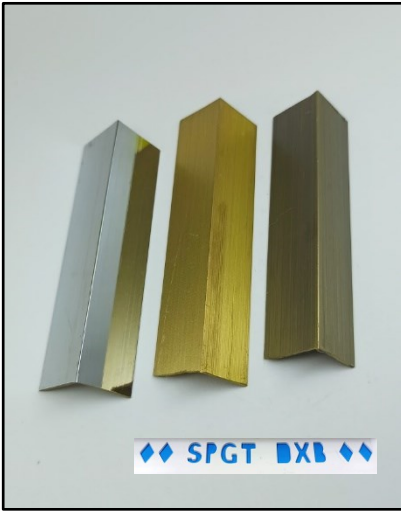

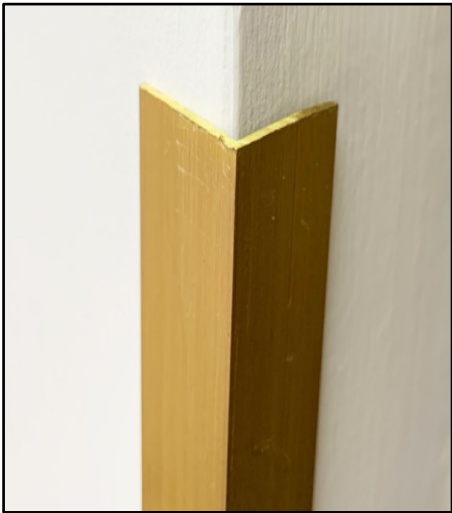

Product Code: SPGT-DXB FS-BRSQ-12-BR		Grade: 602
Type : Square Edge		Finish : Brush Gold, Brush Antique, Brush Bronze, Brush dark gold
Length : 260 cm	Dimension : H 12 mm X W 12 mm	Thickness : 0.8 mm
Application usage	<ul style="list-style-type: none">• Suitable to use for floor tiles (horizontally) & wall tiles (vertically)• Also can be used for decorative purpose & to join different or similar floor materials between carpet & parquet, ceramic & flooring, tiles to tiles, and laminates to marble• To sustain higher level of mechanical stress• Brass trim is considered to be more durable & more resilient to harsh installation environments• Brass trim is naturally more resistant to chemicals that are commonly used during the installation

BRASS EXTERNAL CORNER GUARD

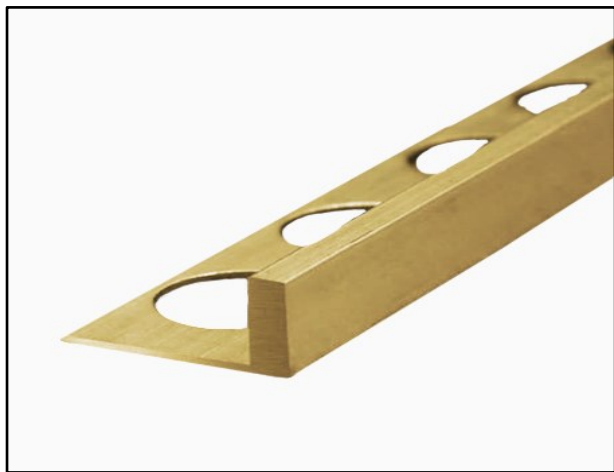

Product Code: SPGT-FS-BRCG-20-MR/BG/BRAT		Grade: 602
Type : External Corner guard		Finish : Polish, Golden, Antique
Length : 250 cm	Dimension : 20 mm X 20 mm	Thickness : 1 mm
Application Usage	<ul style="list-style-type: none">• Brass Corner guards prevents them from being vandalized or accidentally caught and pulled off as furniture/carts/people scrape by them• It is a finishing and edge-protection profile for tiled edges and outside wall corners. The reveal forms a square corner along the outside edge of the tile.• It have the ability to last longer even when exposed to harsh environments.• designed to protect corners from damage that could potentially weaken adjacent walls.	
Features	<ul style="list-style-type: none">• Greater mechanical strength• Higher resistance to abrasion and force dents & water vapor• Higher corrosion & chemical resistance	
Available Sizes	20mmX20mm, 25mmX25mm other sizes can be customized on request	

PROFILE DRAWING

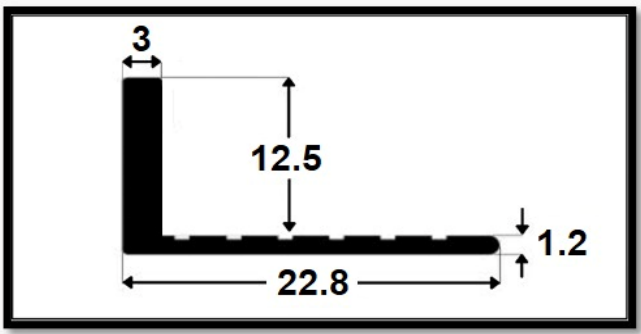

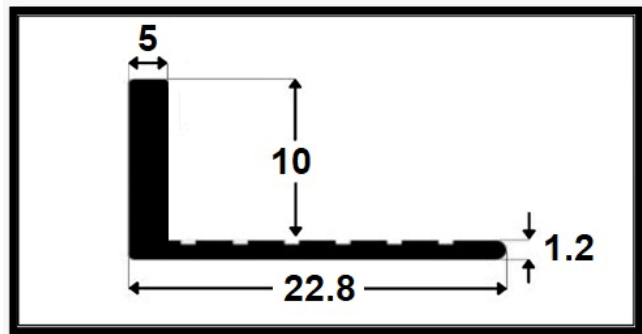

BRASS FLOOR DIVIDER PROFILE

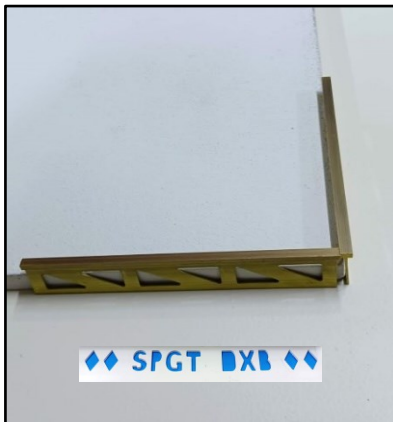

Product Code: SPGT-DXB-AL-FD-5XX10-MT		Grade: 602
Type : Floor divider Profile with perforated leg		Finish : Natural Brass, Antique
Length : 250cm, 300cm	Dimension : 5mm X 10mm	Thickness : 3mm, 5mm
Application Usage	<ul style="list-style-type: none">• Floor divider Trim in Aluminium is design to a joint to separate and decorate level hard surface floors positioned with bonded or mortar floors, when used between floors of same heights and types, such as marble, ceramic, wood palladiana & terrazzo• Floor divider Trim has a top head width of 3mm or 5mm thickness permits perfect smoothing and sanding, Floor divider Trim also can be used for decorative purpose & to join different or similar floor materials between & flooring, tiles to tiles, and wooden to marble, designed to endure heavy traffic.• A perforated anchoring leg highlights fixing glue or mortar bond beneath the tiled surface	
Features	<ul style="list-style-type: none">• Attractive and elegant, High Corrosion resistance• High weather & wear resistance, Environment friendly, reduces collision	
Available Sizes	<ul style="list-style-type: none">• 8mm X 3mm, 10mm X 3mm, 12.5mm X 3mm, 15mm X 3mm, 20mm X 3mm• We can customize specific size as per your requirement

TECHNICAL DATA SHEET

BRASS FLOOR DIVIDER STRIP

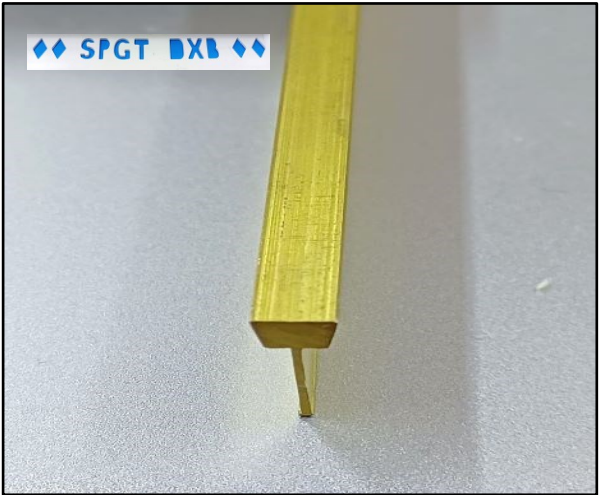

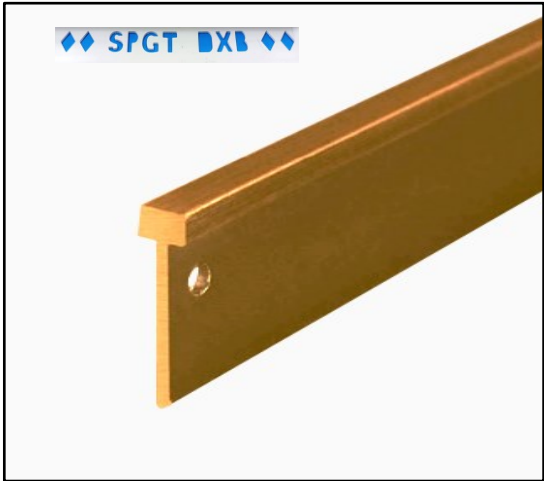

Product Code: SPGT-DXB-HM-BRFD-20X5X5-ANTQ		Grade: 602
Type : Brass Floor Divider Strip		Finish : Natural Brass, Antique
Length : 250cm, 300cm	Dimension : 20mm X 5 mm X 5 mm	Thickness : 1 mm
Application Usage	<ul style="list-style-type: none"> HM-BR-FD-20X5X5-ANTQ Floor divider is design to a joint to separate and decorate level Marble floors positioned with bonded or mortar floors in Antique brass finish, when used between floors of same heights and types. HM-BR-FD-20X5X5-ANTQ has a top head width of 5mm thickness permits perfect smoothing and sanding, allowing for polishing in Brass Antique type. HM-BR-FD-20X5X5-ANTQ Also can be used for decorative purpose & to join different or similar floor materials between & flooring, tiles to tiles, and wooden to marble, Designed to endure heavy traffic. Brass Floor Profile is considered to be more durable & more resilient to harsh installation environments. 	
Features	<ul style="list-style-type: none"> Brass Floor Profile is naturally more resistant to chemicals that are commonly used during the installation Prevents tile edges from chipping, Sustain higher level of mechanical stress Higher resistance to abrasion and force dents, Higher corrosion and chemical resistance. 	
Available Sizes	Other sizes Can be customized as required	

Profile Drawing

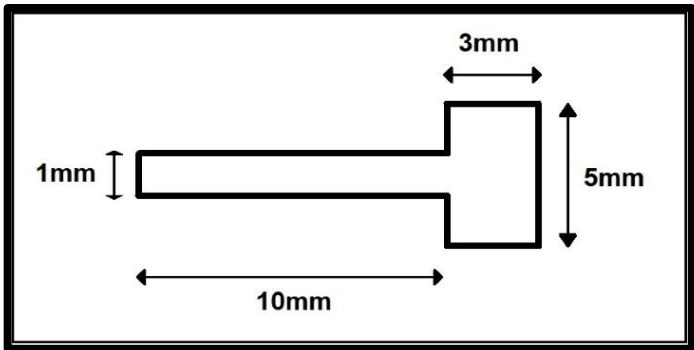

BRASS FLOOR DIVIDER STRIP

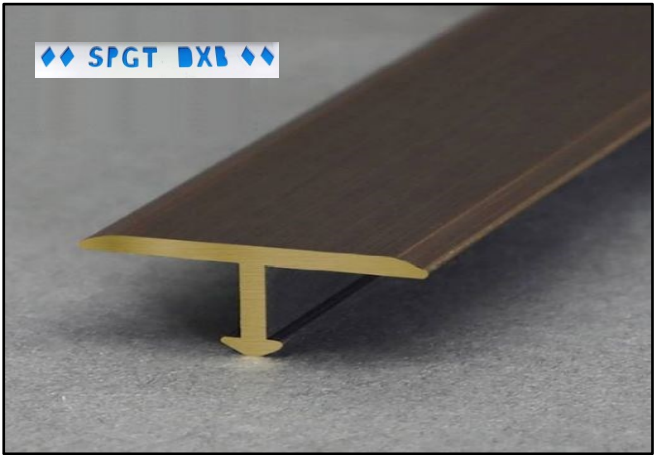

Product Code: SPGT-DXB-BRFD-10/20		Grade: 602
Type : Brass Floor divider T Type		Finish : Natural Brass, Polished
Length : 250cm, 300cm	Sizes : 10mm X 3mm X 5mm 20mm X 3mm X 5mm	Thickness : 3 mm
Application Usage	<ul style="list-style-type: none">• Floor divider Trim in Brass is design to a joint to separate and decorate level floors positioned with bonded or mortar floors in natural brass, polished brass or antique finish when used between floors of same heights and types• It can be use in different applications such as marble, ceramic, wood palladiana & terrazzo• Floor divider Trim has a top head width of 5mm thickness permits perfect smoothing and sanding, The vertical arrowhead portion permits tremendous anchorage with the adhesive.• Brass Floor divider trim is naturally more resistant to chemicals that are commonly used during the installation environments• Can sustain high level of mechanical stress	
Features	<ul style="list-style-type: none">• Greater mechanical strength, highly durable• Higher resistance to abrasion and force dents• Higher corrosion & chemical resistance	
Available Sizes	<ul style="list-style-type: none">• We can customize specific size as per your requirement	

PROFILE DRAWING

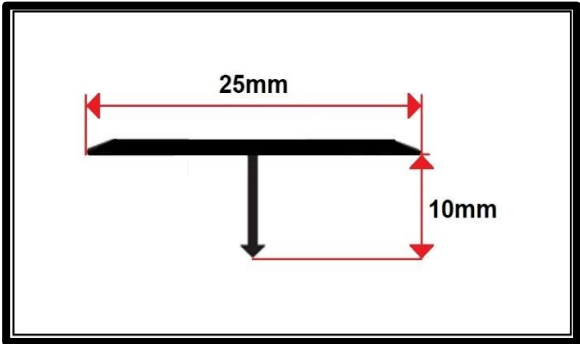

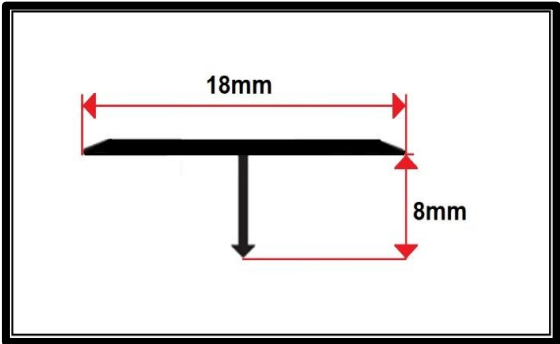

BRASS TRANSITION T STRIP

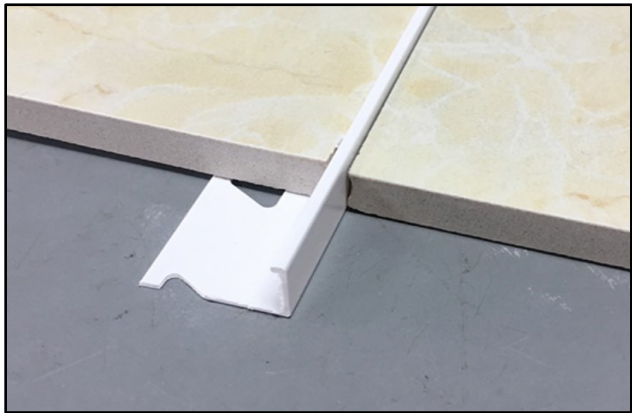

Product Code: SPGT-DXB- JA-SS-TT-10X25, 8X18-NB/P/A		Grade: 602
Type : Transition T Strip Trim		Finish : Natural Brass, Polished, Antique
Length : 244 cm	Dimension : 25mm X 10mm & 18mm X 8mm	Thickness : 0.8 mm
Application Usage	<ul style="list-style-type: none">• T shape transition trim in Brass features are designed for transitions between hard surface floor coverings that are the same-height. such as Terrazzo, Marble, Ceramic,Wood• It is designed to overlaps the edges of the floor coverings, protect tile edges and provide a smooth transition between tile coverings and floor coverings at lower elevations.• Designed with a moveable transition arm that is adjustable to reach the height of adjacent floor coverings.• Creates smooth transitions to eliminate trip hazards.• Features an integrated joint spacer that creates a defined joint cavity between the tile and profile.	
Features	<ul style="list-style-type: none">• Greater mechanical strength, highly durable• Higher resistance to abrasion and force dents• Higher corrosion & chemical resistance	

PROFILE DRAWING

PVC TILE TRIM L SHAPE

Product Code: SPGT-DXB-PVC-L-10-MW		Type : L Shape
Length : 270 cm	Height : 10 mm	Type of Colors: Glossy, Matt, Marble
Colors:	Matt White, Shiny White, Off White, Matt Grey, Matt Grey-1, Matt Ivory-1, Matt Beige-2, Matt Beach Ivory-2, Brown, Black, Burgundy. All other colors refer our Color chart	
Application Usage	<ul style="list-style-type: none">• PVC L Shape Tile Trim is ideal for a clean separation of different surfaces & suitable to use for floor & wall tiles horizontally and vertically, It protect corners placed with tiles particularly when the ending of tile surface connects with other type of surfaces• Suitable for interior use such as Kitchen, Bathroom to prevent & protects tiles edges from chipping• Has framing and decorative elements with nice straightness attractive and elegant looking.• A perforated anchoring leg highlights fixing glue or mortar bond beneath the tiled surface.	
Features	<ul style="list-style-type: none">• Plastic, polyvinyl chloride (PVC) Plastics are lightweight materials with a density of about half that of materials such as porcelain or glass or light metals• Resistance in: Mineral Oils, Diluted Acid, Diluted Lyes, Petroleum• Not Resistance in: Trichloroethylene, Carbon tetrachloride =• Application temperature limits Approx. -20° to 50°C	
Available Sizes	Height: 8mm, 10mm , 12mm, 12.5mm,	

PROFILE DRAWING

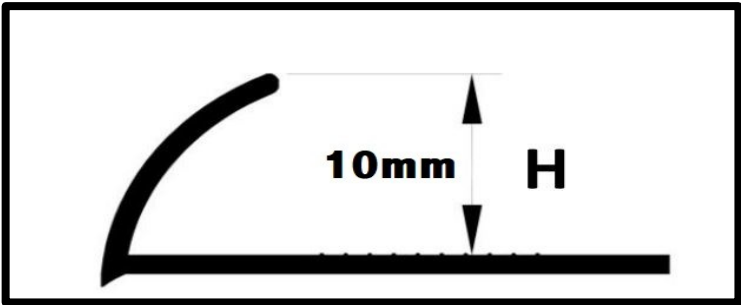

PVC TILE TRIM HALF ROUND SHAPE

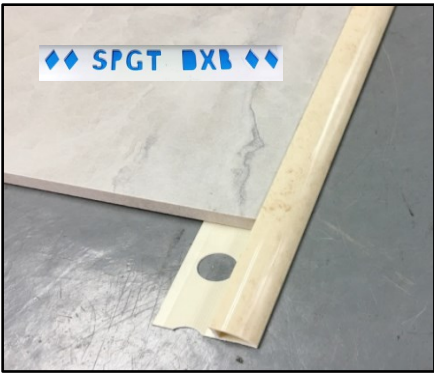

Product Code: SPGT-DXB-PVC-HR-10		Type : Curve Round Shape
Length : 270 cm	Height : 10 mm	Type of Colors: Glossy, Matt, Marble
Colors:	Matt White, Shiny White, Off White, Matt Grey, Matt Grey-1, Matt Ivory-1, Matt Beige-2, Matt Beach Ivory-2, Brown, Black, Burgundy. All other colors refer our Color chart	
Application Usage	<ul style="list-style-type: none">• The Round edge PVC Tile Trim profile forming a rounded edge for the protection and neat finishing of tiled external corners and edges• Suitable to use for tiling application such as wall tiles it prevent external corners.• Suitable for interior use such as Kitchen, Bathroom to prevent & protects tiles edges from chipping• Has framing and decorative elements with nice straightness attractive and elegant looking.• A perforated anchoring leg highlights fixing glue or mortar bond beneath the tiled surface	
Features	<ul style="list-style-type: none">• Plastic, polyvinyl chloride (PVC) Plastics are lightweight materials with a density of about half that of materials such as porcelain or glass or light metals• Resistance in: Mineral Oils, Diluted Acid, Diluted Lyes, Petroleum• Not Resistance in: Trichloroethylene, Carbon tetrachloride =• Application temperature limits Approx. -20° to 50°C	
Available Sizes	Height: 8mm, 10mm , 12mm, 12.5mm	

PROFILE DRAWING

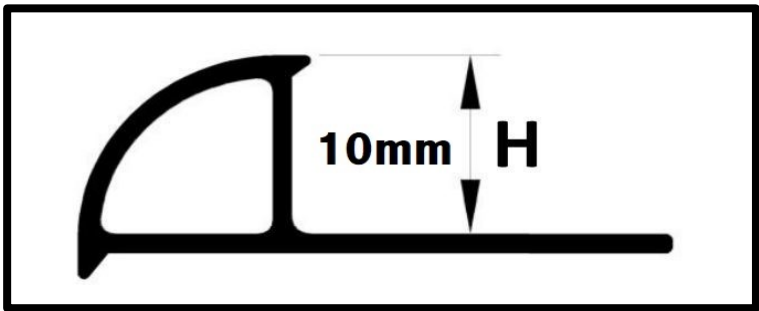

PVC TILE TRIM ROUND CLOSED END

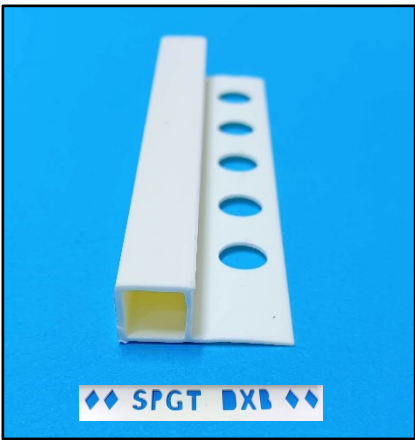

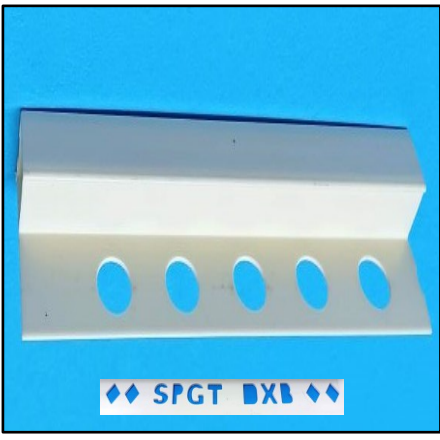

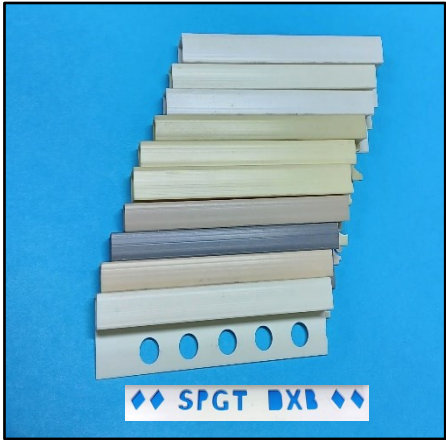

Product Code: SPGT-DXB-PVC-RCE-10		Type : Round Closed End Shape
Length : 270 cm	Height : 10 mm	Type of Colors: Glossy, Matt, Marble
Colors:	Matt White, Shiny White, Off White, Matt Grey, Matt Grey-1, Matt Ivory-1, Matt Beige-2, Matt Beach Ivory-2, Brown, Black, Burgundy. All other colors refer our Color chart	
Application Usage	<ul style="list-style-type: none">• PVC Tile Trim Round closed end shape has been designed to provide a nice, round corner shape,• It can be used to round off and turn a corner. It can be used with a “beak” trim piece to create a corner• Suitable to use for tiling application such as wall tiles it prevent corner edges• Suitable for interior tiling application wall tiles such as Kitchen, Bathroom to prevent tiles edges from chipping• Has framing and decorative elements with nice straightness attractive and elegant looking.• A perforated anchoring leg highlights fixing glue or mortar bond beneath the tiled surface	
Features	<ul style="list-style-type: none">• Plastic, polyvinyl chloride (PVC) Plastics are lightweight materials with a density of about half that of materials such as porcelain or glass or light metals• Resistance in: Mineral Oils, Diluted Acid, Diluted Lyes, Petroleum• Not Resistance in: Trichloroethylene, Carbon tetrachloride =• Application temperature limits Approx. -20° to 50°C	
Available Sizes	Height: 8mm, <u>10mm</u> , 12mm, 12.5mm.	

PROFILE DRAWING

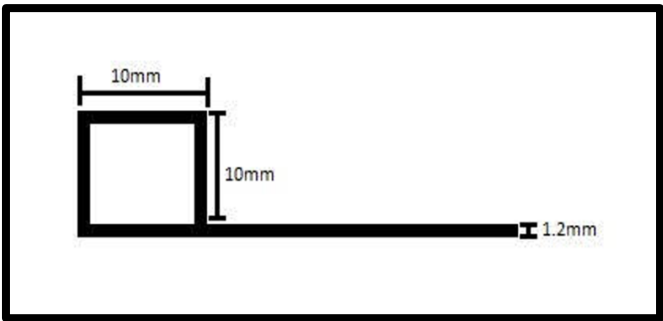

PVC TILE TRIM SQUARE SHAPE

Product Code: SPGT-DXB-PVC-SQ-10		Type : Square Shape
Length : 270 cm	Height : 10 mm	Type of Colors: Glossy, Matt, Marble
Colors:	Matt White, Shiny White, Off White, Matt Grey, Matt Grey-1, Matt Ivory-1, Matt Beige-2, Matt Beach Ivory-2, Brown, Black, Burgundy. All other colors refer our Color chart	
Application Usage	<ul style="list-style-type: none">• PVC Square Tile Trim with Square edge is suitable to use for floor tiles (horizontally) & wall tiles (vertically)• Square type features all four sides of equal length to give elegant appearance to the profile• A perforated anchoring leg highlights fixing glue or mortar bond beneath the tiled surface• Suitable for interior use such as Kitchen, Bathroom to prevent tiles edges from chipping• Has framing and decorative elements with nice straightness attractive and elegant looking.	
Features	<ul style="list-style-type: none">• Plastic, polyvinyl chloride (PVC) Plastics are lightweight materials with a density of about half that of materials such as porcelain or glass or light metals• Resistance in: Mineral Oils, Diluted Acid, Diluted Lyes, Petroleum• Not Resistance in: Trichloroethylene, Carbon tetrachloride =• Application temperature limits Approx. -20° to 50°C	
Available Sizes	Height: 8mm, <u>10mm</u> , 12mm, 12.5mm.	

PROFILE DRAWING

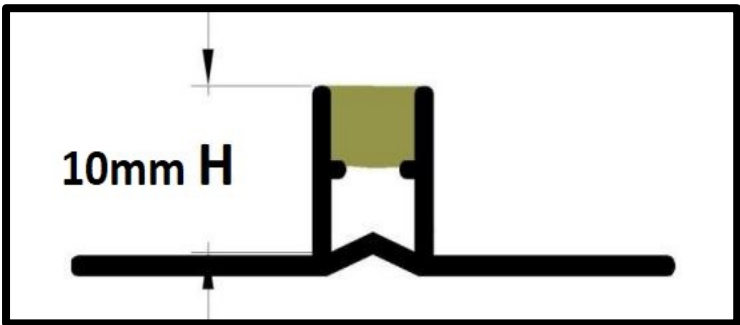

PVC MOVEMENT JOINT T SHAPE

Product Code: SPGT-DXB-PVC-MJ-10		Type : T Shape
Length : 270 cm	Dimension : Height : 10 mm	
Colors:	Matt White, Shiny White, Off White, Matt Grey, Matt Grey-1, Matt Ivory-1, Matt Beige-2, Matt Beach Ivory-2, Brown, Black, Burgundy. All other colors refer our Color chart	
Application Usage	<ul style="list-style-type: none">• PVC Movement Joint has been designed for floor application permit to absorb minor variations movement capability of ± 2.5 mm.• Due to its higher yield strength permits the movement without permanent distortion.• PVC Movement Joint will prevent tiles and grout from cracking. Avoids cracking of floor and delamination of floor from the substrate.• Perfect for creating a smooth transition between two tiles• Prevents tiles from chipping & protects the exposed raw edges of tiles	
Features	<ul style="list-style-type: none">• Plastic, polyvinyl chloride (PVC) Plastics are lightweight materials with a density of about half that of materials such as porcelain or glass or light metals• Resistance in: Mineral Oils, Diluted Acid, Diluted Lyes, Petroleum• Not Resistance in: Trichloroethylene, Carbon tetrachloride =• Application temperature limits Approx. -20° to 50°C	
Available Sizes	Height: 8mm, 10mm , 12mm, 12.5mm.	

PROFILE DRAWING

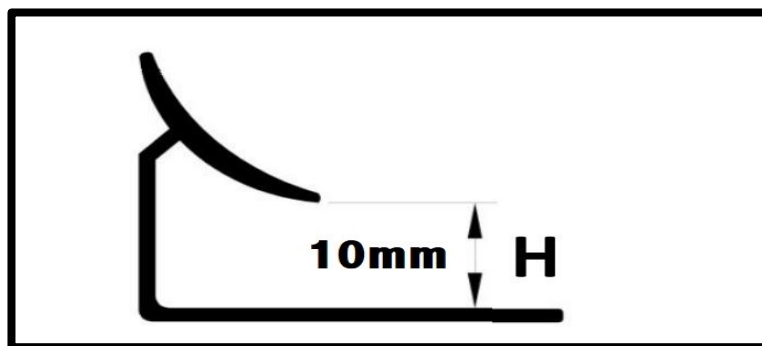

PVC COVE INTERNAL TRIM

Product Code: SPGT-DXB-PVC-CIT-10		Type : Cove Internal Trim
Height: 10mm	Length: 270cm	Type of Colors: Glossy, Matt, Marble
Colors:	Matt White, Shiny White, Off White, Matt Grey, Matt Grey-1, Matt Ivory-1, Matt Beige-2, Matt Beach Ivory-2, Brown, Black, Burgundy. All other colors refer our Color chart.	
Application Usage	<ul style="list-style-type: none"> PVC Internal Cove trim is design & ideal to be used for tile inside corner decoration for dry or wet areas It is perfect to create a radius between the wall and floor and thus reducing potential areas of contamination It prevents dust forming in the corners and as well as prevent water penetration in the wall joints of shower tray or bath tub. It is ideal to use in Kitchen counter tops, It prevents liquid penetration 	
Features	<ul style="list-style-type: none"> Plastic, polyvinyl chloride (PVC) Plastics are lightweight materials with a density of about half that of materials such as porcelain or glass or light metals Resistance in: Mineral Oils, Diluted Acid, Diluted Lyes, Petroleum Not Resistance in: Trichloroethylene, Carbon tetrachloride = Application temperature limits Approx. -20° to 50°C 	
Available Sizes	Height: 8mm, 10mm , 12mm, 12.5mm,
