INCLUDED

Include a neighbor on the same day & you receive an additional 10% off.

Dear Homeowner:

I hope this letter finds you and your family safe and healthy during these challenging times.

As your local FAA Licensed Drone Pilot, I am excited to introduce a valuable new FULL SERVICE

Comprehensive Home Documentation:

3D Tour + Interactive Floorplan - Interior/Exterior Drone Video – Document Scanning

Having a 3D tour and drone video of your property can be incredibly valuable to an insurance adjuster if your home is lost to a fire or other natural disaster.

Here are some key benefits:

1. **Comprehensive Documentation:** A 3D tour provides a detailed and immersive view of your home, capturing every room and its contents with high accuracy. This helps in creating a thorough inventory of your belongings, which is crucial for insurance claims.
2. **Accurate Valuation:** The detailed visuals and annotations from a 3D tour can help accurately assess the value of your possessions and the property itself. This ensures you receive fair compensation for your losses.
3. **Streamlined Claims Process:** Providing a 3D tour and drone footage can speed up the claims process by reducing the need for multiple site visits and minimizing disputes over the extent of the damage.
4. **Remote Adjustments:** Insurance adjusters can review the damage remotely, which is especially useful in catastrophic events when in-person visits might be delayed.
5. **Enhanced Transparency:** The visual and detailed nature of 3D tours and drone videos adds transparency to the claims process, helping to avoid discrepancies and ensuring all parties have a clear understanding of the damage.
6. **Privacy & Security:** To protect your privacy, the video will not be stored or backed up. The only version will be given to you on a flash drive.

Overall, these tools can significantly improve the efficiency and accuracy of the insurance claims process, providing peace of mind during a challenging time. Warm regards,

Kirk LaMar
