

Why 3D Scans & TruePlan Integration Benefits Homeowners

1. Accurate and Detailed Documentation:

- **3D scans** create a precise, immersive digital twin of your property, capturing every detail and measurement accurately

2. Faster Estimates with TruePlan:

- **TruePlan** converts 3D scans into detailed floor plans that can be directly imported into **Xactimate**, the industry-standard software for insurance estimates

3. Reduced Claim Processing Time:

- With detailed scans and accurate measurements readily available, contractors can provide fast and precise estimates. This efficiency can significantly reduce the claim process from months to days, as there is less back-and-forth and fewer delays

4. Enhanced Transparency and Trust:

- Homeowners can see the exact details of their property and the proposed repairs, fostering transparency and trust between all parties involved—homeowners, contractors, and insurance adjusters

5. Cost Savings:

- By catching potential discrepancies early and avoiding costly project delays, homeowners can save money on repairs and reduce the overall cost of the claim
