The AICFC has considered the options available for expansion while taking costs/ resources into consideration as well as our obligations to serve our community as a 501c organization.

At this time, we agree that the most beneficial option is to collaborate with AI Health Advocates to build out a common class room that could be utilized by not only the AICFC but the clinic and other community groups if so desired. In doing this, we could accomplish 2 goals- 1) improving the current location by 2) enabling a separate classroom for fitness classes that did not interfere with regular gym utilizers. Moving classes to the common classroom would allow the AICFC to make improvements to the internal gym facility, upgrade and/or add equipment and serve more islanders in their quest for fitness. This plan is more aligned with our financial capabilities as well.

Thank you for your consideration.
