Treats

Our treats are made with real, healthy and functional ingredients...

The ingredients we use in our treats are hand picked from only the best farms and ranches. We grind all of the meats in-house so we can be sure only the highest quality meats are used. We mill our own grains to maximize digestibility and nutrient absorption. The fruits and vegetables we use are fresh enough you can see them in the treats. Each and every ingredient serves a purpose - no fillers and nothing weird, just simple, healthy dog treats.

WHY DOES JIMINY'S USE CRICKETS?

Dogs (and humans) have been eating insects for thousands of years. But, at Jiminy's, we are one of the first to add powdered cricket protein to our dog food and treats. AND, we're working with experts to better understand and unlock the many health benefits for our dogs!

The star ingredient in Jiminy's products is insect protein. We started with crickets (roasted and ground with nothing else added) and have recently added recipes with grubs.
