

# Welcome to the DIY Clutterbuck Wreath making workshop

These instructions are also on our web site

[www.clutterbuck.net/crafts](http://www.clutterbuck.net/crafts)

(Use the link above and scroll down the page to “key documents”)

Paper bag containing pre-wired cones, cinnamon sticks and orange slices

Pre-mossed wreath

Wire on dowell

Pre-made  
wired bow

Groups of  
Foliage

Scissors

Apron

In your wooden box you will find everything you need to make your Christmas wreath. Carefully remove all the materials and familiarise yourself with each component using the photograph above

**1** Collect your pre-mossed wreath and your wire. Place wire around the wreath leaving enough to tie. Note: make sure you know where the wreath hanger is positioned as you must not wrap around it

**2** Wrap once around wreath, pull tight and tie

**3** Take the loose end and push this into the back of the wreath ensuring a good secure fix. Leave remaining wire attached and on the dowell

**4** 4-5 Take your chosen foliage and cut to the required size. Some may need to be stripped (approx. 2" (50mm) to allow a stem to secure when wrapping.

**5**

**6** Cut long stems so they fit with your group

**7** Large holly stems can be cut into several smaller sections

**8** Strip leaves to allow the berries to be the "stars" of the show

**9** 9-10 Cut remaining foliage to have similar stem lengths

**10**

**11**

Put your chosen foliage in piles of 4 or 5 as you wish

**12** 12-13 Put together your 4 or 5 pieces of foliage into a bunch (all stems facing same way)

13

14

14-16 Lay your bunch onto the wreath foliage facing outwards, your wire is on the inside. Wrap around the stems twice, pulling tightly after each wrap.

15

17

17-18 Repeat 14-16 with another bunch of foliage. This can be the same foliage grouping or different, the design is absolutely your choice. The second bunch should be placed foliage inwards and should cover the stems of the previous bunch. Then continue "out" and "in" until the wreath is covered. Remember not to make your bunches too small as this makes it much more difficult to achieve the "criss-cross" effect
