

Fast Track Career Center Waiver of Liability

The Phlebotomy Program at Fast Track Career Center recognizes the importance of performing selected invasive procedures as part of the educational experience.

As a student in Fast Track Career Center Phlebotomy Program, I understand that I am required, as a condition of participation in the Program, to perform venipuncture and capillary puncture procedures as part of the competencies for the Program.

I realize that I am under no obligation to have venipuncture or capillary puncture performed on me, however. I understand that I cannot test out of the required competencies unless I demonstrate these procedures on another person. I also realize that even though all precautions will be taken to prevent injury, accidents do occur in cases where directions are not followed, or safety precautions are not adhered to. Fast Track Career Center will not be held responsible for any injuries that occur due to the above.

Laboratory attendance is essential for the lab procedure experience 100% attendance is important. Students must complete all the required competencies and laboratory requirements to be successful in the laboratory. There is little room to make-up for the missed laboratory time, and each student will need to be flexible in working with their instructor to complete 50 hours of required laboratory time (hands-on-training).

By signing below, I acknowledge that as a student at Fast Track Career Center in the Phlebotomy program, I voluntarily agree to participate in the laboratory experiences for the completion of the Phlebotomy program. I agree to always exercise reasonable care with respect to my own safety and the safety of others. I agree to abide by all rules, policies, and procedures set forth as a phlebotomy student at FTCC.
