

POST TAN INSTRUCTIONS

1. Remove the barrier cream from all application areas, wash with soap and water.
2. Remove hair nets, foot protection, nasal plugs and any other comfort items.
3. Refrain from any strenuous activities that would cause sweating.
4. Prevent exposure to rain or any other water or mist.
5. PURA SHOWERING REQUIREMENTS: Pura Sunless solutions are specially formulated to reach their full golden bronze potential after 24 hours. We suggest showering after 24 hours of your initial spray tan. Do not use hot water when you shower - this will dry skin out. Avoid using a washcloth or loofah when you shower. Note: if waiting the 24 hours is not possible, you are able to warm water rinse after 10 hours.
6. Enjoy your wonderful tan.
7. Applications of Pura lotions will extend the longevity of your spray tan.
8. Wear loose dark clothing during your waiting period.
9. Refrain from using acne products as they will accelerate the exfoliation process.
10. Avoid hot tubs and swimming as it will accelerate fading.
