

WARNINGS AND CAUTIONS

Please use caution when moving around while inside the booth. The process is wet and ingredients in the solution can cause slippery conditions.

Refrain from any unprescribed movement during the operation of the Pura Sunless booth. It is equipped with safety sensors to stop the process in the event a person moves into the path of the spray bar during operation. This can result in an unsatisfactory experience if the sensors are tripped.

Refrain from any abrupt movement during the session. Movement should follow the voice prompts and be gradual.

People with upper respiratory ailments you should contact their physician prior to spray tanning. We highly recommend the use of nasal plugs and a mouth filter to further enhance your experience.

For those who wear contacts, we suggest you remove them prior to spray tanning. Spray tanning may dry the eyes.

A person having any disorders of the skin should consult their physician before spray tanning. Do not consume any food or beverage while inside the spray booth.

Do not smoke when using the spray booth.

Only one (1) person should be inside the booth tanning at any one time.

Never spray any water or cleaning agent into the heater inlet or heater outlets (2).

Never make contact with the spray bar during operation while it is in motion.

Do not touch the heater outlets while in operation as this could cause an interrupt in the IR safety system.

Never place any flammable materials near the heater outlets during operation.

Never use or operate the Pura Sunless booth if not in a 100% alert state of mind. Persons who are sleepy, drowsy or under the influence of medications/drugs that can cause drowsiness should not spray until fully coherent.

Expectant mothers should consult their physician before using the Pura Sunless booth.

Minors and younger children should be supervised when using the Pura Sunless booth. We do not recommend those under the age of 15 do so without the supervision of a parent or other responsible adult. This means an adult should be in the room with the minor at all times during the spray tanning session. The adult should supervise so the minor understands the Salon directions for using the Pura Sunless unit, safety precautions and that they follow all voice prompts during the session.
