Whittley Club Queensland– Tangalooma Wrecks Trip Event

November 14 & 15, 2026

Hi All

Please see the following info for the upcoming November Club Trip.

Plan A:

Overview

The destination for our stay will be the Tangalooma Wrecks for both Saturday

14th and Sunday 15th of November 2026 (Early Birds from Friday afternoon).

Tangalooma is heralded as one of the most beautiful destinations in the whole of Moreton Bay but relies on fairly calm weather to travel across the bay and to peacefully anchor overnight. The Club has planned this trip on a number of occasions however the weather has not always played along.

A Plan 'B' or the Plan 'C' alternative will be posted up if weather dictates that a change in location is called for.

Launching:

8:30am Saturday morning departure.

Good ramps for Tangalooma are anywhere from Bribie Island through to Scarborough and Shorncliffe. We will be travelling up to and leaving from the Scarborough marina boat ramp. Anyone wanting to follow us over, you are welcome to join us (Michael & Vanessa - Bella Vita) at the carpark/ boat ramp.

Scarborough public boat ramp (@ blue yacht icon)

For those on the Southside preferring a nearby ramp, Manly South (Lota) boat ramp or Manly North, (MRQ) boat ramps are a good choice, and have excellent parking and pontoon facilities available. There may be some maintenance still being carried out at one or the other but should have been finalised by the time of our trip.

The plan is to anchor at Tangalooma, and we will aim to be self-reliant for meals on our own boats, as the nearby resort requires prebooked entry approval.

We will aim for happy hour on the beach at 4pm on Saturday. We will be departing after lunch on Sunday the 15th and you are welcome to follow us home back to the boat ramp.

Fuel: Please note that Tangalooma is a good 50 minute run across from Manly (a little less from Scarborough) and it is wise to have adequate fuel reserves on board for any extra exploring or fishing

Tides: Tangalooma

Routing (from Navionics):

Scarborough to Tangalooma: 16.0Nm

Manly to Tangalooma: 21.1Nm

Points to Note:

Beware of sandbanks, shallow areas, rocks, markers, and wrecks. It is High tide on Saturday at midday so make sure you keep an eye on your depth!!

Bring the Aeroguard or Mozzie coils for Saturday night as little bities may be present.

Contacts:

Monitor radio on Channel **VHF 72 for our Whittley club communications**.

Trip Coordinators

Michael & Vanessa Magrath

Michael's mobile: 0402933400, for those wanting to reach us off radio.

Hope to see you there!!
