

As a longtime resident of Colorado – I can remember when coming to Parker seemed like an all-day drive since it was a dirt road – and you’d be hard pressed to get me out of the state. I moved to Cottonwood in 1992 when there were 4 stop lights on Parker Road and the “dip” in Jordan was great fun. I have enjoyed living in the neighborhood and have seen it’s many changes over the years. Along with Parker’s and Cottonwood’s growth, I felt it was time to get more involved with the community, and while I understand the need for development, there is also the necessity to balance a vibrant community with limited resources.

I’m excited for the opportunity to help Cottonwood Water provide options for our water supply now and in the future.
