LESIKAR RANCH
angus production sale
1:30 p.m. at the ranch near Athens, TX

April 25, 2010

preferences * donors * pairs * bred heifers * pregnancies * open heifers

Celebrating 50 Years
Welcome to the Sale!

Lesikar Ranch

Dear Angus Friends and Fellow Cattlemen,

It is our pleasure to invite you to join us for this our Third Annual Female Production Sale, being held at our Athens Division on Sunday, April 25, 2010 at 1:30pm.

Our goal here at Lesikar Ranch is to continue to produce Angus cattle that have balanced performance with emphasis on carcass merit and efficiency and to offer genetics that will enhance anyone’s program.

This years offering will include progeny from some of our foundation donors such as A+ Black-cap 0037, Sedgwicks Barbara 087, LaGrand Primrose 8244 and GAR Precision 183.

We are grateful to have on our staff Tom Baker, Ranch Manager and Martin Lopez, Assistant Manager. Without their hard work and dedication this event would not be possible.

All cattle in this sale, except those that have no carrier ancestry have been tested free of the genetic defects for Arthrogryposis Multiplex and Neuropathic Hydrocephalus.

Please plan on having lunch with us at noon followed by our sale at 1:30 pm on Sunday, April 25th. We look forward to seeing you!

Lyn & Harriet Lesikar

William Walther, (405) 612-7554
Roger West, (254) 434-1095
If you wish to make purchases but are unable to attend the sale, please contact the sale management, auctioneer or one of the sale staff to make arrangements.

Accommodations:
Holiday Inn Express, Athens, (903) 675-2500
Quality Inn, Athens, (903) 675-9214

Herd Health:
All cattle will be accompanied by proper health certificates for immediate shipment.

Inspection of sale cattle:
Cattle may be inspected any time at the Lesikar Ranch, located near Athens, Texas. Arrangements can be made by contacting Tom Baker (214) 577-0958 and Jason Lesikar (817) 726-7998.

Pregnancy Examination Information:
All females indicated as A.I. bred as listed in the sale book were not exposed to a bull.

Terms & Conditions:
All cattle are to be settled for sale day unless prior arrangements have been made. The cattle sell under the Terms and Conditions of the American Angus Association with the following conditions. Supplements to the sale book and announcements made from the block take precedent over what is written in the sale book. Scramble Certificates welcome.

Trucking:
Cattle may be loaded following the sale or may remain at the ranch until trucking can be arranged. If you are unable to haul the cattle yourself, reliable truckers will be available to assist you with hauling. Trucking will be provided by Randy Lathrop, 847-426-5009. Neither MCS Auctions, LLC nor Lesikar Ranch make any guarantees regarding cost of shipping. Those arrangements are between buyer and hauler.

Food & Refreshments:
Join us at noon Sunday for a chicken fried steak lunch.

Liability:
All persons attending the sale and related functions do so at their own risk. Lesikar Ranch and staff, MCS Auction, LLC and sale staff assume no liability, legal or otherwise, for any accidents or injuries that may occur. The sale management is only an agent for the seller and has no responsibilities other than those involved in conducting the sale.

### Featured Lots

**The dam of this female, A Plus Blackcap 0037, is a daughter of the legendary GAR Scotch Cap 867, the foundation of the most recognized and valuable carcass genetics family in the Angus breed today. 0037 is a full sister to the $300,000 valued Limestone, LLC and Blue Sky Ranches donor, GAR EXT 2104, the dam of GAR Precision 2536. Another full sister, GAR EXT 2114, is the $120,000 Whitestone/Sandpoint/Harry Meyer/B&B donor that has generated over a million dollars in progeny sale to date. Other full sisters to 0037 include, the $480,000 Coleman Blackcap 0813, EXT 3104, the $150,000 valued donor for Pollard Farms, Express Ranches and Limestone; the $175,000 A Plus Blackcap 0097, the $120,000 Callaways Blackcap 0943, Blackcap 0880; Blackcap 0652, the $23,000 Brasstown Valley headliner; and Blackcap 0651, the $17,500 Morgan Angus foundation Blackcap.**

**Backed by generations of successful breeding, this young female offers genetic excellence and phenotypic value.**

### Lesikar Ranch Angus Production Sale

Selling a heifer calf pregnancy by Bismarck and out of this Impressive young donor, LaGrand Primrose 8244, the $8000 lot 2 in the 2009 Denim and Diamonds sale. The dam of 8244 was the Lot 1 second high selling feature of the 2007 LaGrand Elite Fall Female Sale selected by Bushy Park Farm. Famous maternal brothers to Primrose 2424 also include the legendary Pathfinder sire N Bar Emulation EXT, the now deceased LaGrand and Genex/CRI sire WCC Special Design L309, EXAR New Look 2971, EXAR Foundation 1806 and WCC Precision E161 J239. From the famed $100,000 N Bar Primrose 2424, who also produced EXAR Primrose 2972, who sold for $200,000 for half interest, the $102,000-valued VAR Primrose 9006, the $60,000 Roth Primrose 1247, the $40,000-valued Roth Primrose 1263 and the $50,000 North Fork Primrose 6028, among others. A flush sister to 004 produced LaGrand Primrose 2231, who sold to Travis Turner of Texas for a valuation of $42,000 and went on to be the 2003 American Royal ROV Senior Heifer Calf Champion and the 2004 Southwest Regional Junior Preview Show Senior Champion. A heifer pregnancy from this donor and QLC LaGrand Forum sold to Classic Oaks Ranch for $7,000 last year at the Genex/CRI Angus Sale in Denver. A full brother to 8244 sold in the 2008 LaGrand Bull Sale for $6,750. 8244 ranks in the top 4% for YW.
Featured Lots

Lesikar Barbara X937

- Birth Date: 2/20/2010
- Coxe: Registration Pending
- Tattoo: X937

This exciting sale feature is out of the cornerstone donor for Lesikar Ranch, Barbara 087. Combining the proven genetic performance her dam is known for, adding the power and style of Emblazon provides profit generating potential to this young donor prospect. Her super attractive donor dam has a production record of 4 at 101 for weaning and 3 at 104 for yearling with 21 at 104 for RE.

Lot 4 - The dam of these embryos is the Lesikar Foundation “Rita” and a daughter of the $400,000 GAR New Design 1440 and, thus, a maternal sister to the popular $90,000 Select Sires Member GAR Right Direction. Maternal sisters to the dam of 183 include: Rita 7105, the $610,000 world-record selling full interest female selected by Shoulderbone Plantation, Vintage Angus Ranch and Monarch farms through the first Deer Valley Farm sale; Precision 183, Precision 1680, the breed’s former number one proven dam for REA at Riverbend Ranch; Traveler 7042 selling to Shepard Hills Cattle Company through the 2006 GAR sale; Rito S0057, the $25,000 selection of Ray cattle company through the 2006 Three Trees Sale. Heifer pregnancies from New Design 1440 include: the $30,000 selection of Mud Creek Angus through the 2007 Prospect Hill sale; the $28,000 highlight of the 2006 Prospect Hill sale selected by Boyd Beef Cattle, Trowbridge Angus, Sunset Valley Angus and Grazin Angus; the $25,000 selection of 7S ranch and the $25,000 selection of Pine Ridge Angus through that same event. Other heifer pregnancies from New Design 1440 have sold through the 2005 Vintage sale and the 2006 Three Trees sale to Limestone, LLC for $40,000, to Mountain Meadow Cattle Company for $35,000 now featured in the Deer Valley Farm herd and to Prospect Hill for $31,000.

Sired by the legendary SAV 8180 Traveler 004, here is an impressive young female form the Sedgwicks Princess cow family. Offering generations of Angus heritage in her pedigree, W591 has profit generating potential written all over her.
Combining New Design 878 with the carcass power of Rockn D Ambush adds to the visual quality of this young female. Posts progeny ratios of WR 2@100 and RE 2@106. Sells bred AI on 3-3-10 to Summittcrest Complete 1P55. Due to calve 12-10-10.

Combining New Design 878 with the carcass power of Rockn D Ambush adds to the visual quality of this young female. Posts progeny ratios of WR 2@100 and RE 2@106. Sells bred AI on 3-3-10 to Summittcrest Complete 1P55. Due to calve 12-10-10.

This 004 son has the look, style and balance of a great future herd sire. His high growth performance traits adds to his genetic appeal of 838 and Ambush on the bottom side of his pedigree.

The combination of 6I6 and a dam that traces to the proven growth sire GT Maximum, results in a female with breed-leading growth and the maternal strength of EXT.
ABBREVIATIONS
Act. BW - Actual weight recorded at birth.
Adj. WW - Weight at weaning, adjusted to 205 days of age / ratio.
Adj. YW - Weight at yearling, adjusted to 365 days of age / ratio.
Adj. %IMF - Percentage intramuscular fat as recorded by ultrasonic scan data, adjusted to 365 days of age / ratio.
Adj. REA - Ribeye area measurement in square inches as recorded by ultrasonic scan data, adjusted to 365 days of age / ratio.
Adj. SC - Scrotal circumference measurement in centimeters, adjusted to 365 days of age.

Arthrogryposis Multiplex tested carrier animals are indicated by AMC; Arthrogryposis Multiplex tested free animals are indicated by AMF.

Neuropathic Hydrocephalus tested carrier animals are indicated by NHC; Neuropathic Hydrocephalus tested free animals are indicated by NHF.

Pathfinder animals are indicated by the pound (#) sign preceding the name or registration number. Embryo transplants are indicated by the plus (+) sign preceding the name or registration number.

Expected Progeny Difference (EPD) is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping or data edits needed for NCE.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Scrotal Circumference EPD (Scrotal), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size, compared to the progeny of an average bull in the Angus breed.

ULTRASOUND
Intramuscular Fat EPD (%IMF), is a predictor of the difference in a sire's progeny for percent intramuscular fat in the ribeye muscle compared to other sires.

Ribeye Area EPD (UREA), is a predictor of the difference in square inches of ultrasound ribeye area of a sire's progeny compared to the progeny of other sires.

Footnote information notes top ranking individuals as compared to the entire population of Angus breed contemporaries based on current EPDs.

Note that EPDs were current as reported by the American Angus Association as of 2/25/10 but may change as information is constantly being updated.

$VALUES
Weaned Calf Value (Wean), Feedlot Value (Feedlot), Grid Value (Grid) and Beef Value (Beef) are multi-trait selection indexes expressed in dollars per head to assist commercial beef producers by adding simplicity to genetic selection decisions. A $Value has meaning only when used in comparison to the $Value of another animal. For example, just as with EPDs, variation in $Values between animals indicates average expected differences in the relative value of progeny if random mating is assumed and the calves are exposed to the same environment. Weaned Calf Value (Wean), expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. $W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

Feedlot Value (Feedlot), expressed in dollars per head, is the expected average difference in future progeny performance for postweaning performance compared to progeny of other sires. Grid Value (Grid), expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Beef Value (Beef), expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.
