—12<sup>TH</sup> ANNUAL—

## FEMALE SALE

SATURDAY, APRIL 27, 2024  
1PM | ATHENS, TEXAS

# Lesikar Ranch

A TEXAS TRADITION SINCE 1960

**Harriet & Lyn Lesikar**

**Katie, Jason, Luke & Savannah Lesikar**

**Katelin & Scarlett Parrish**

**Maria & Martin Lopez  
Athens Manager**

**Ana & Jacinto Nunez  
Poolville Herd Manager**

**Matthew Bagwell  
Poolville Herdsman**

Dear Angus Friends and Fellow Cattlemen,

We would like to take this opportunity to welcome you back to Lesikar Ranch and invite you to attend the 12th Back to Basics Sale being held at our Athens Ranch on Saturday, April 27, 2024. The cattle will be available for viewing by appointment before the Sale and all day on Friday, April 26th. We will begin with coffee and donuts for break-fast and then continue with our tradition of serving an old fashioned Southern chicken fried steak lunch at noon, followed by our sale starting at 1:00 pm. If you cannot make the Sale in person, please join us online with CCI.Live to view and make your purchase.

Looking through the catalog, you will notice that we have been concentrating on cattle that have great Maternal traits and growth. The Sires we use bring great value to the Angus breed and the cattle we raise and are offering to you. Having great pride in our program allows us the confidence to stand behind and guarantee all of our cattle. Our genetics are moderate framed, cost efficient, great maternal traits and growth. The efficiency of these cattle requires less feed to keep them in shape and for maintenance. Especially during a time when a lot of area has not seen the normal rains. These cattle have not only survived but are producing and paying their way during these difficult weather times.

The Back to Basics production sale and theme is the motto of our operation. These cattle work for you, not the other way around. The 12th Production Sale will feature everything from open/ bred heifers to prospective donors.

We would like to express our sincere gratitude to Martin Lopez, Athens Manager and Jacinto Nunez, Poolville Herd Manager and Matthew Bagwell, Poolville Herdsman. Our entire breeding program, along with this sale, would not be possible without all of their hard work and dedication.

Lesikar Ranch is a family ranching operation centered on family values. Please bring your family and join ours for a full weekend of fun!

We look forward to seeing you!

# 12th ANNUAL FEMALE SALE

## SATURDAY, APRIL 27, 2024 | 1:00 PM

at the ranch near Athens, Texas

### AUCTIONEER:

Jerry Lehmann .....573-999-4759

### SALE DAY PHONES:

Jason Lesikar.....817-726-7998  
Sale Barn Office ..... 903-675-SALE (7253)

**If you wish to make purchases but are unable to attend the sale, please contact Lesikar Ranch, auctioneer, or livestock press representatives to make arrangements.**

### LIVESTOCK PRESS:

Radale Tiner, *Angus Journal* ..... 979-492-2663  
Phil Stoll, *Weekly Livestock Reporter* ..... 817-366-7332  
Greg Goodrum, *Weekly Livestock Reporter* ..... 903-388-2544  
Kenny Dolsen, *Southern Livestock Stadard*.....254-485-8454

### SALE LOCATION:

Lesikar Ranch  
12121 CR 3903, Athens, TX 75752 (See map on page IBC.)

**VIDEO:** All cattle have been recorded and the video is available for viewing on the Lesikar Ranch YouTube page.

**Online Bidding:** View the sale from your phone, tablet or desktop computer and bid with confidence! Visit [www.CCI.Live](http://www.CCI.Live) for complete sale information and online registration.

### ACCOMMODATIONS:

Holiday Inn .....903-675-2500  
Best Western.....903-292-1750  
Please call to reserve rooms early.

**AIR TRAVEL:** Lesikar Ranch is 1.5 hours from Dallas/Fort Worth International Airport.

### FOOD AND REFRESHMENTS:

Join us at noon on Saturday for an old fashioned Southern chicken fried steak lunch.

**TERMS & CONDITIONS:** All cattle are to be settled for on sale day, prior to load out, unless prior arrangements have been made. Terms of the sale are cash or check. The cattle sell under the Terms and Conditions of the American Angus Association. Supplements to the sale book and announcements made from the block take precedence over what is written in the sale book.

**TRUCKING:** Cattle may be loaded following the sale or may remain at the ranch until trucking can be arranged. If you are unable to haul the cattle yourself, please contact Jason Lesikar for help in getting trucking arranged. Lesikar Ranch makes no guarantees regarding the cost of shipping. Those arrangements are between buyer and hauler.

**HERD HEALTH:** All cattle will be accompanied by proper health certificates for immediate shipment or held at our ranch until paperwork can be updated post sale.

**INSPECTION OF SALE CATTLE:** Cattle will be available for viewing any time on Friday, April 26, 2024 at the ranch near Athens, Texas. If you would like to view the cattle prior to the 27th, please contact Jason Lesikar, 817-726-7998.

**DNA TESTING:** All the cattle have been tested through ANGUS GS for DNA results.

### PREGNANCY EXAMINATION INFORMATION:

All females as listed A.I. bred in the sale book were not exposed to a bull. Pregnancy verification was performed using BioPRYN Testing.

**LIABILITY:** All persons attending the sale and related functions do so at their own risk. Lesikar Ranch, staff and sale staff assume no liability, legal or otherwise, for any accidents or injuries that may occur.

*EPDs current as of 04/10/2024*

**For up-to-date information regarding upcoming Events.**

**Follow us on:**

**@LesikarRanch**

**ANGUSMEDIA** EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at [www.angus.org](http://www.angus.org) and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHIR®, AngusLinkSM, CAB®, Pathfinder®.

## EPD Explanations

### PRODUCTION EPDS

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

### MATERNAL EPDS

**Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

### CARCASS EPDS

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

### ANGUS-ON-DAIRY \$VALUE INDEXES

Angus-On-Dairy \$Value Indexes are bioeconomic selection indexes that allow multiple change in several different traits at once pertaining to a dairy-beef crossbreeding objective. These values are terminal crossbreeding indexes to estimate of how future beef-on-dairy progeny of each Angus sire are expected to perform, on average, compared to beef-on-dairy progeny of other Angus sires if the sires were randomly mated and beef-on-dairy calves were exposed to the same environment. For more information on these \$AxH or \$AxJ, feel free to watch this informational video. These indexes were designed as specific crossbreeding tools for Angus bulls being mated to dairy cows. Two indexes have been developed for the dairy market:

**Angus-On-Holstein (\$AxH)**, a terminal index, expressed in dollars per head, to predict profitability differences in progeny due to genetic traits weighted by appropriated economics of each Angus sire when mated to Holstein females. The underlying breeding objective assumes Angus bulls will be mated to Holstein females to produce Angus-dairy crossbred calves to be fed and marketed on a quality-based grid. Traits included are as follows: calving ease, growth from birth through the feeding phase, feed intake, dressing percent, yield grade, quality grade, muscling, and height.

**Angus-On-Jersey (\$AxJ)**, a terminal index, expressed in dollars per head, to predict profitability differences in progeny due to genetic traits weighted by appropriated economics of each Angus sire when mated to Jersey females. The underlying breeding objective assumes Angus bulls will be mated to Jersey females to produce Angus-dairy crossbred calves to be fed and marketed on a quality-based grid. Traits included are as follows: calving ease, growth from birth through the feeding phase, feed intake, dressing percent, yield grade, quality grade, and muscling.

### \$VALUE INDEXES

\$Value indexes, an economic selection index allows multiple change in several different traits at once pertaining to a specific breeding objective. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if the sires were randomly mated to cows and if calves were exposed to the same environment. More Info

**Maternal Weaned Calf Value (\$M)**, an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

**Weaned Calf Value (\$W)**, an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

**Feedlot Value (\$F)**, an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics for postweaning feedlot merit compared to the progeny of other sires. The underlying objective assumes producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis, but with no consideration of premiums or discounts for quality and yield grade. Traits contributing directly to the index are as follows: yearling weight (gain), carcass weight and dry-matter intake.

**Grid Value (\$G)**, an index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for carcass grid merit compared to progeny of other sires. The underlying objective assumes producers will market cattle on an above-industry-average carcass grid. Traits included in the index are as follows (in no particular order): carcass weight, marbling, ribeye area, and fat.

**Beef Value (\$B)**, a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

**Combined Value (\$C)**, an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).
