

Veterans Environmental Group, LLC

"An innovative approach to providing responsive, adaptive support to emerging requirements"

A Service-Disabled Veteran-Owned Small Business

Veterans Environmental Group Overview

- **Service-Disabled, Veteran-Owned Small Business (SDVOSB)**
- **Founded in 2019**
- **Extensive Environmental Outreach**
- **Range and Training Land Program Service Support**
- **Strong Construction Arm**
- **Demonstrated Ability in relating to customer's mission and unique needs**
- **Vets Enviro serves the DoD's Integrated Natural Resource Management Plans**

Providing a quality sustainable natural environment for the Warfighter

What makes Vets Enviro Different?

Refusing to except status quo

- Reduced procurement timeline; federal contract already exists
- We are flexible and adaptive to meet your evolving requirements
- A tailorable solution so you get exactly what you want “ no more one size fits all”
- Experienced knowledgeable staff, Veterans who have traveled the same roads and understand your challenges
- Getting you solutions in the year of execution, no longer will you have to wait
- Contract will accept MIPRs through 30 Sep

Vets Enviro Meets DoD Training Initiatives

Vets Enviro Supports Key Objectives:

- Land Use Management
- Environmental / Natural Resources
- ITAM Work Plan
- Cultural Resources Support
- Biological Surveys
- GIS Support

Provides An Innovative Solution:

- A low-cost, rapid delivery, alternative approach
- Installation training lands and range expertise
- Experienced, knowledgeable and professional staff

Objectives:

- Provide cost effective, timely, flexible, relevant approach to contracting services and support
- Reduce Installation Schedule
- Increase flexibility for evolving requirement
- Flexible funding sources (OMA/OPA)
- User-friendly contract vehicle - MIPR Capable

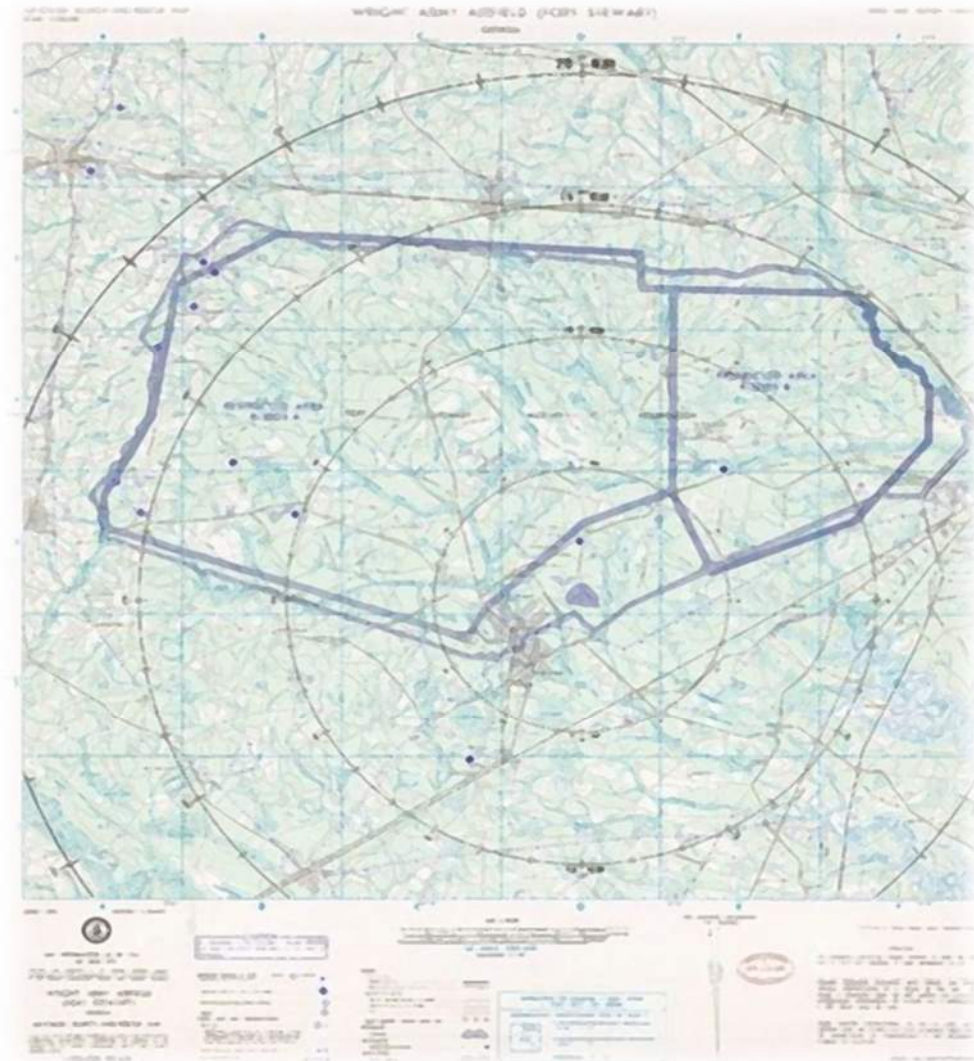

Assumptions:

- Use INRMP & RTLP guidance
- Maintain life-cycle & sustainability
- 1-year warranty for all technologies

Supporting the Sustainable Range Program

- Vets Enviro provides DoD – Wide range operations, maintenance, development, engineering, construction, environmental services and sustainment
- Range and Training Land Program
 - Environmental Enhancement
 - Land Use Management
- Integrated Training Area Management
 - Training Requirements and Integration
 - Range and Training Land Assessment
 - Land Rehabilitation and Maintenance
 - Geographic Information Services
- Direct mission support to all Installation Environmental Managers, Range Managers, HQDA-G3 (DAMO-TRS), HQs IMCOM G3/5/7

Natural Resources Support

- **Vegetation Management**
 - Control of non-native invasive species
 - Surveying flora and fauna
- **Wildlife Management**
 - Habitat Management – food, water, cover, space
 - Pest Control – installation of Clemson Beaver Pond Levelers
- **Wetlands Management**
 - Wetlands delineation
 - Wetlands mitigation
- **Soil Conservation**
 - Land restoration post wildfire - Hillslope treatments, dry mulch, erosion mats, silt fence
 - Erosion mitigation - Revetment systems, Turbidity Barriers, Geotextiles, French Drains

Cultural Resource Support

- **Cultural Resource Surveys**
 - National Historic Preservation Act
 - Archeological Resource Protect Act
 - Work Directly with CRM & SHPO
- **Cultural Resources Site Protection**
 - Protect historic assets while maximizing training
 - Designate locations
 - Incorporate Signage to replicate realistic encounters in theater
- **Helping to integrate installations cultural resource program with ongoing missions**
- **Identify compliance actions to keep mission-essential properties and acreage ready for use**

Vegetation Management

Total Solutions / Increased Land Use Capabilities

- Recover Overgrown Training Ranges
- Increase the "Line of Sight" & Visibility
- Facilitate EOD/UXO Clearance
- Increase Maneuver Corridors
- Provide Invasive Species Management
- Enhance Wildlife Habitat
- Maintain Bare Ground & Facility Maintenance
- Conduct Environmental Analysis
- Recommend Alternative Strategies
- Perform Post Treatment Evaluation & Analysis
- Recommend Sustainability Solutions
- Guarantee Performance

Installation Land Management & Planning

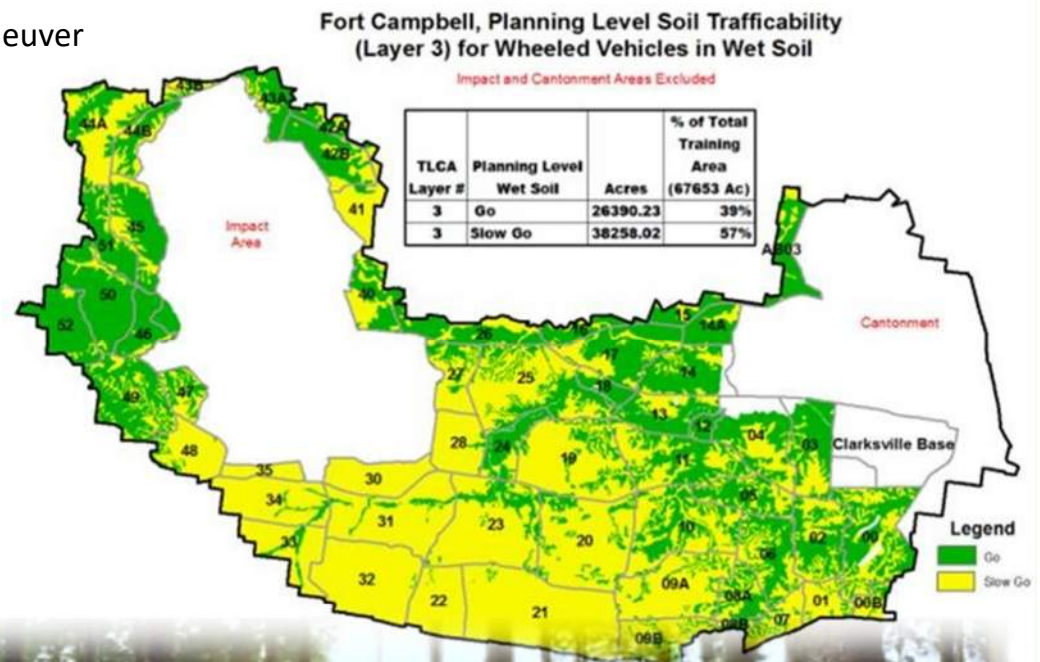

- **Vets Enviro has a firm understanding of integrated natural resources management and military training missions**
- **In-house Capabilities to execute a wide variety of land management projects**
 - Field Data Collection
 - Vegetation Removal
 - Wildlife Nesting Structures
- **Vegetation and Habitat Management**
 - Vegetation Control
 - Habitat Improvement
 - Maneuver Space Design and Maintenance
 - Low Water Crossings
 - Access Trail Network
 - Landing & Pickup Zones
 - Bivouac Areas
 - Maneuver Damage Repair

Training Land Capability Analysis

- **TLCA is designed to improve utilization of Army training lands for required maneuvers and to facilitate installation of natural resource project planning and project implementation**
 - Practical databases of land & vegetation characteristics
 - Ability to import into existing GIS
 - Used to support three main categories of ground maneuver
 - Movement by tracked vehicles
 - Movement by wheeled vehicles
 - Movement by foot
- **Using the raster TLCA layers, geospatial analyses and spatial modeling can be performed to identify potential ITAM, LRAM, or other issues in support of training-land optimization, and ultimately, in support of the training mission**

Services

Environmental / Resource Support:

- Providing SME expertise
 - ✓ GIS
 - ✓ Environmental Assessments
 - ✓ Vegetation Management
 - ✓ Wetland restoration/mitigation
- All ITAM functional support areas
 - ✓ TRI
 - ✓ LRAM
 - ✓ RTLA
 - ✓ SRA
- Cultural Resource
 - ✓ Surveys
 - ✓ Site Protection

Objectives:

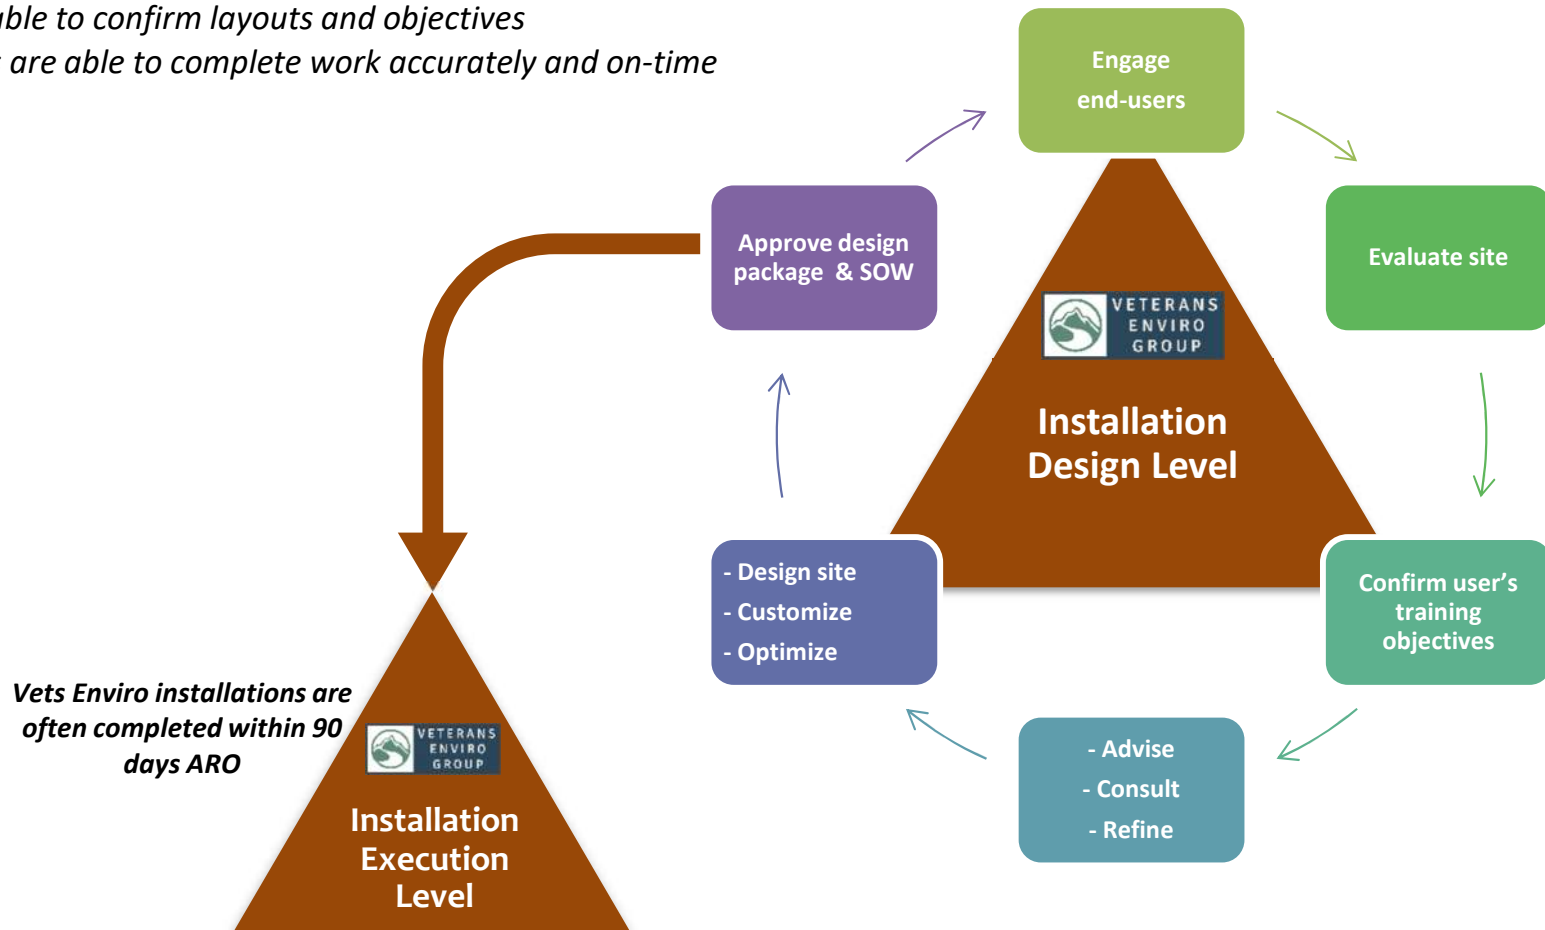

- Provide experienced personnel
- Streamline services
- User-friendly contract vehicle

Design and Delivery Process

Vets Enviro provides a Lean design and delivery process by using standardized libraries of proven building configurations.

- Users are able to confirm layouts and objectives
- Fabricators are able to complete work accurately and on-time

Benefits = Cost savings, Linear Supply Chain and Accelerated Delivery

Vets Enviro

Approach

- Vets Enviro understands the unique nature of DoD Installations and their challenge to sustain training lands with limited funding and minimal resources while Commanders need to maintain Warfighter Readiness
- Our approach will quantify and qualify training assets in a consistent, comprehensive, and standardized manner of current and projected training lands, as well as determine realistic training requirements in support of the DoD in a manner to maintain readiness
- Enable current requirements and utilization levels for available training assets, providing a near and long-term project plan for training providing a cost-efficient solution to outdated/legacy ranges
- Vets Enviro specializes in environmental / natural resource management that address operational shortfalls on legacy/outdated ranges
- Provide a turn-key solution for Range and Training lands

Objective

- Revitalize, enhance, and expand current training lands to meet tomorrow's mission requirements.
- Implement a lower cost, sustainable capabilities.
- Deliver a small-business cost savings & value engineering vs. large-business over engineering
- Provide low-cost upgrades enabling sustainment of current training lands
- SDVOSB – Friendly Adaptive Contract Vehicle

Contract Vehicle

- Vets Enviro Requirements Contract that supports the Sustainable Range Program with a MIPR
- Our Contract Vehicle is efficient and effective
- The 'right' vehicle brings success to the customer
- With current resource challenges, Installations are relying on OMA
- MIPR provides you a solution up until the end of the FY
