

Your FREE Child Playground Accident Injury Checklist:

1. See the Doctor Right Away:

If you or your child gets hurt on the playground, it's important to go see the doctor right away.

The doctor can check out the injury and make sure it's taken care of properly.

The doctor will also write down exactly what happened, which can help later.

2. Look at the Playground:

After the doctor visit, go back to the playground and take a close look around.

Take pictures of anything that looks broken or unsafe, like equipment that's not working right.

Talk to any other kids or adults who saw what happened.

3. Find Out Who's Responsible:

The school, the city, or the company that made the playground equipment might be responsible for keeping the playground safe.

Your parents or a lawyer can help figure out who is responsible.

4. Keep Track of Everything:

Make sure to save all the papers from the doctor visits, like the bills and the report about what happened.

If your parent had to miss work to take care of you, write that down too.

Also write down how the injury made you feel and how it affected your daily life.

5. Get Help If Needed:

If your parents need some extra help with the claim, they can talk to a lawyer who specializes in playground accidents.

The lawyer can make sure everything is done the right way and that you get the help you need.

The most important thing is to **take care of your health first**, and then work with your parents to make sure the responsible party helps pay for any costs or problems caused by the playground accident. With the right steps, you can get the help you deserve.

AZ Law Now Injury Attorneys puts our focus on making sure all our clients get VIP treatment. If you have questions or would like to schedule time to talk or meet, feel free to email us at bf@azlawnow.com or call (480) 789-3852. Thank you! My information is also below if you want to contact me directly

Kind regards,
