

# *Luke Air Force Base - Children's Clinic*

*The Children's Clinic needs diaper bag blankets. These blankets are around 18 inches in both directions. New Moms use them to cover their newborn in the clinic and to use as a drop blanket while changing diapers.*

*1. Use 19 inch square of flannel and one of cotton. Prewashed and a children's print on one or the other.*

*2. With right sides together sew  $\frac{1}{4}$  or  $\frac{1}{2}$  inch from the edge leaving a whole around four inches wide so you can turn the blanket inside out.*

*3. Turn inside out. Push out the corners. Iron. Topstitch around the edge. This will close the opening. If you would like, quilt the two pieces together but it's not necessary.*
