Full Duplex Remodel

240 Days

Awesome work! Robert did a full renovation for my duplex and it turned out wonderful. Both units had full kitchen and bathroom remodels, the plumbing and electrical were upgraded and everything looked stunning when it was done and I was able to get Tenants immediately. He also did outside decking and fencing which totally made the property look amazing. He does excellent work, is easy to work with, able to work around obstacles and find solutions to problems which arise and all at very reasonable prices. I highly recommend him and I will continue to use his expertise!

Hardworking and creative with a vast number of skills and solutions , Robert brings to each job along with the most positive and helpful attitude of any of my crews--

Working as a designer in New York, Miami, and Los Angeles for past 30 years I have designed and built many movie and television sets, along with bars, clubs and very high end homes .-working with a huge amount of different tradesmen and contractors- when ever I get a new project Robert is my first call-

- he understands the budget and timeline- in television we don't have the luxury of more time-the job must be done when contracted for and on budget --or I don't get the next job period !

Robert always has my back , his work is thoughtful and well executed ,

He always leaves the job site clean, which is important to me and my clients

I never think twice about sending him into any of my high profile clients homes to have him work alone -he is truly honest, hard working, intelligent and reliable -- my only fear of posting this that he will get too busy to work with me --

Great work! I have had Robert and his team do various projects at my home and business. over a period of the past 8 years so far.Very professional, knowledgeable,and always suggests ways to save time and money, without compromising workmanship. He has built amazing custom flip top benches in our breakfast nook, custom cabinets in our media room, painted our entire house inside and out, and multiple plumbing and electrical repairs and upgraded our water heater and electrical panel,countless handy projects and repairs over the years,and remodeled our guest house,and master bath shower. It's nice to trust your home with someone who knows what they are doing,delivers high quality,and we have always been comfortable with his prices. We highly recommend him but don't keep him too long because we want him to come back when we need him.
